DATA PROCESSING AT THE EDGE Dr. Aadam Quraishi MD, 2024-12-30 It is possible that the idea of situating computing resources in close proximity to the sources of data is not that original Serve apps and move them from the cloud data center to the network edge This is something that is advised from a business point of view It was in the year 2002 when the term edge computing was first used to characterize this development When the phrase was first used in 2004 it was used to describe a system that enhanced the performance of the system by distributing program approaches and data to the edge of the network End users were able to take advantage of elastic resources located at the network s peripheral which allowed edge computing to finally overcome many of the problems that cloud computing had Previously cloud computing could only provide resources that were distributed and hosted on cloud data centers located in the heart of the network This was the reason for this limitation This section provides an overview of edge computing defines what it is covers some popular use cases and outlines potential challenges that may arise during the design and implementation of edge computing systems Additionally this section provides an explanation of what edge computing is This article not only provides an overview of potential future work in related approaches but it also highlights a few opportunities and challenges that may arise in the future **Publications of the National Institute of Standards and Technology ... Catalog** National Institute of Standards and Technology (U.S.), 1981 Data Processing and Networking Abhishek Swaroop, Bal Virdee, Sérgio Duarte Correia, Jan Valicek, 2025-07-04 This book includes selected papers presented at the International Conference on Data Processing and Networking ICDPN 2024 organized by Institute of Technology and Business in esk Bud jovice Near Prague Czech Republic during 25 26 October 2024 It covers up to date cutting edge research on big data processing and analytics data mining and machine learning artificial intelligence and deep learning wireless mobile and ad hoc networks network security and privacy internet of things IOT and sensor networks data communication and computer vision and image processing **A Five-year Plan, Meeting the Automatic Data Processing and Telecommunications Needs of the**
