**Seeing Beneath the Soil** Anthony J. Clark, 1990 Geophysical and chemical methods can give dramatic pictures of buried archaeological sites and even information on what occurred within them Dr Clark one of its pioneers has now written a survey of the subject as a whole As well as descriptions of the development and present state of the art it includes previously unpublished material and glimpses of future developments that will make this subject even more fundamental to archaeological research A glossary and comprehensive bibliography complete this survey of an important area of practical archaeology

**Seeing Beneath the Soil** Oliver Anthony Clark, Anthony Clark, 2003-09-02 Scientific soil prospecting methods can give dramatic pictures of buried archaeological sites and sometimes information on what occurred within them before any earth has been removed Dr Clark who was one of the earliest to work in this field has written the first general survey of an increasingly important area of practical archaeology The emphasis is on the principles and practical application of the well established techniques of resistivity magnetometry and magnetic susceptibility with shorter sections on emerging and less common techniques such as ground penetrating radar electromagnetic methods and phosphate survey This paperback edition updates and enhances the earlier book adding new material such as the large scale evaluation exercises now required as a precondition of planning consent for major developments

Digital Methods and Remote Sensing in Archaeology Maurizio Forte,Stefano Campana,2017-02-10 This volume debuts the new scope of Remote Sensing which was first defined as the analysis of data collected by sensors that were not in physical contact with the objects under investigation using cameras scanners and radar systems operating from spaceborne or airborne platforms A wider characterization is now possible Remote Sensing can be any non destructive approach to viewing the buried and nominally invisible evidence of past activity Spaceborne and airborne sensors now supplemented by laser scanning are united using ground based geophysical instruments and undersea remote sensing as well as other non invasive techniques such as surface collection or field walking survey Now any method that enables observation of evidence on or beneath the surface of the earth without impact on the surviving stratigraphy is legitimately within the realm of Remote Sensing The new interfaces and senses engaged in Remote Sensing appear throughout the book On a philosophical level this is about the landscapes and built environments that reveal history through place and time It is about new perspectives the views of history possible with Remote Sensing and fostered in part by immersive interactive 3D and 4D environments discussed in this volume These perspectives are both the result and the implementation of technological cultural and epistemological advances in record keeping interpretation and conceptualization Methodology presented here builds on the current ease and speed in collecting data sets on the scale of the object site locality and landscape As this volume shows many disciplines surrounding archaeology and related cultural studies are currently involved in Remote Sensing and its relevance will only increase as the methodology expands
