

What works is not perspective-taking but perspective-seeking: actually talking to people to gain insight into the nuances of their views. That's what good scientists do: instead of drawing conclusions about people based on minimal clues, they test their hypotheses by striking up conversations.

40 Years of Research on Rent Seeking 1 Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included

Experience Eric Brymer, Robert Schweitzer, 2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one s life then this confusion will continue to exist However an in depth examination of the phenomenology of the extreme sport experience yields a much more complex picture This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death Extreme sports are not necessarily synonymous with risk and participation may not be about risk taking Participants report deep inner transformations that influence world views and meaningfulness feelings of coming home and authentic integration as well as a freedom beyond the everyday Phenomenologically these experiences have been interpreted as transcendent of time other space and body Extreme sport participation therefore points to a more potent life enhancing endeavour worthy of further investigation This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk taking the death wish and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner This is valuable reading for students and academics interested in Sports Psychology Social Psychology

Health Psychology Tourism Leisure Studies and the practical applications of phenomenology **Implementing Social Europe in Times of Crises** Dorte Martinsen, Hans Vollaard, 2017-10-02 While the EU legitimacy crisis and the Great Recession prevail certain European Union principles and policies have to be implemented in the member states This volume explores the diverse processes stages and subjects of implementation in a variety of social policies to identify different institutional dynamics and actor behaviours at play The individual contributions examine the transposition of the patients rights directive to the Europeanisation of pension reforms the role of national parliaments in transposing social Europe judicial Europeanisation and the multi level enforcement of EU decisions Theoretically the contributions in this book highlights the fact that implementation is often conditioned by domestic politics or comes as a random walk due to organisational and cognitive constraints Empirically the volume has three main findings First the constitutive components of the EU tend to have a contradictory impact on the EU s social policies and the national welfare systems Second crises influence the implementation of social Europe at times leading to a modification of fundamental principles and content but not across the board Third as a result there is evidence of differentiated Europeanisation This book was originally published as a special issue of West European Politics Understanding FDI-Assisted Economic Development Sanjaya Lall, Rajneesh Narula, 2013-09-13 It is nowadays well accepted that both economic growth and development are highly dependent on improving not just the availability of capital but also access to technological capabilities infrastructure and resources This has gone hand in hand with an increasing economic liberalization of most developing countries The role of the MNE as a viable source of both capital and technology is one of the key features of this new openness In the process of embracing FDI as a solution to the myriad of economic ills something even the World Bank has begun to do little attempt is made to understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research **Confronting Corruption in Business** Alan T. Belasen, Roxana Toma, 2015-12-07 Confronting Corruption in Business focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership It provides students with a unique critical perspective on issues of leadership corruption and policy in different countries industries and companies While there isn t a universally agreed upon definition of corruption in social sciences it generally refers to efforts to secure wealth or power through misusing public power for private gain This kind of destructive leadership is typically treated as an anomaly but this book closes the gap in our understanding by highlighting the wider consequences of this behavior within business and on an international level Armed with this understanding one also learns how to mitigate its causes and consequences Edited by leading experts the book includes contributions from scholars with international expertise on
