Safety Can't Be Measured Andrew S. Townsend,2016-04-08 The British Prime Minister has avowed to kill off the health and safety culture which he described as a monster Nonetheless industries face ever increasing public expectation and legislative pressure to improve safety when actually rates of safety improvement have slowed to a standstill In *Safety Can t Be Measured* Andrew Townsend suggests the main reason for the stagnation of safety improvement is the failure to recognise the evolution in accident causation and to evolve with it He severely criticises some aspects of current day management of occupational safety and contends that everyone is trying to continuously improve something in which improvement cannot be measured so the received wisdom underpinning safety management and regulation is not evidence based and much of it is misguided What is measured is the absence of safety through incidents injuries and the occurrence of ill health We cannot continue to justify these ways of doing things and claiming success by association without admitting there might be other explanations In this series of short chapters occupational health and safety is put in context by demystifying the research regulation and management of health and safety Using evidence Townsend challenges orthodox dogma by demonstrating that currently unused data could help deduce how safety really works and thus support alternative thought processes from which new approaches to risk reduction and safety management could emerge

Ghaly, 2015-01-23 A CHRISTIAN FROM EGYPT LIFE STORY RAMSIS F GHALY MD FACS This is my life story as a Coptic Christian born and raised in Egypt in an environment of limited opportunities and scarce resources especially for Christian minorities Seeking the promise opportunity I came to the United States nearly 30 years ago as a young man As I flew westward on the plane it did not occur to me that I would become a prominent neurosurgeon with a practice in one of the great cities of America Nor did I anticipate that I would ever be in a position to fight for save lives and fight for patients lives protecting them from the specter of financial greed permeates the health care industry This book chronicles my journey in America from my early struggles to get past closed doors to my current practice serving the mission set before me with uncompromising zeal and devotion Eventually I became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines My story takes the reader through my first hand experiences through the eight health care systems and Chicagos history of neuroscience over the last three decades providing an in depth view of the medical practices in the surrounding suburban communities My book also includes the lessons that I have learned my personal views and patient testimonials What I have faced and seen since my plane landed in this country in 1984 is almost inexpressible It is my sincere wish that others may find hope and inspiration from my story as well as an understanding of the challenges that the healthcare industry faces today along with my own passion for excellence in neuroscience as I confront them I owe my success to God to my cherished parents my teachers my mentors and most importantly my beloved patients
