Behling,2001 Focuses on late 19th and early 20th century American society where the author says the beginnings of modern sexuality and psychology intersect with the foundations of modern womanhood Suffragettes demanding social and political independence were often transformed by literature and the popular press into masculine women and female sexual inverts While Judith Halberstam s *Female Masculinities* 1998 say focused on contemporary society and the idea of male masculinity Behling English Gustavus Adolphus College exclusively addresses an earlier time when sartorial and political masculinity in relation to the female body was often interpreted as a medical as well

The Marsh Builders Sharon Levy, 2018-05-17 Swamps and marshes once covered vast stretches of the North American landscape. The destruction of these habitats long seen as wastelands that harbored deadly disease accelerated in the twentieth century. Today the majority of the original wetlands in the US have vanished, transformed into farm fields or buried under city streets. In *The Marsh Builders* Sharon Levy delves into the intertwined histories of wetlands loss and water pollution. The book's springboard is the tale of a years-long citizen uprising in Humboldt County, California, which led to the creation of one of the first US wetlands designed to treat city sewage. The book explores the global roots of this local story: the cholera epidemics that plagued nineteenth-century Europe; the researchers who invented modern sewage treatment after bumbling across the insight that microbes break down pollutants in water; the discovery that wetlands act as efficient filters for the pollutants unleashed by modern humanity. More than forty years after the passage of the Clean Water Act, launched a nation-wide effort to rescue lakes, rivers, and estuaries fouled with human and industrial waste, the need for revived wetlands is more urgent than ever. Waters from Lake Erie and Chesapeake Bay to China's Lake Taihu are tainted with an overload of nutrients carried in runoff from farms and cities, creating underwater dead zones and triggering algal blooms that release toxins into drinking water sources used by millions of people. As the planet warms, scientists are beginning to design wetlands that can shield coastal cities from rising seas. Revived wetlands hold great promise for healing the world's waters.

Dark Tales from the Long River David Price, 2021-06-01 From searches for serial killers and missing persons to the persecution of migrants and Aboriginal people, David Price takes us back to a time when the line between lawmakers and criminals was lightly drawn. Based on a wide array of contemporaneous accounts of life in the Gascoyne, these sometimes shocking, sometimes disturbing true crime stories depict an era when laws served to maintain order rather than to secure justice. *Dark Tales from the Long River* offers a window into an evolving history of colonisation that is still struggling into the light.
