My Job My Self Work And Creation Of Modern Individual:

My Job, My Self Al Gini, 2013-10-31 In *My Job My Self* Gini plumbs a wide range of statistics interviews with workers surveys from employers and employees and his own experiences and memories to explore why we work how our work affects us and what we will become as a nation of workers *My Job My Self* speaks to every employed person who has yet to understand the costs and challenges of a lifetime of labor

Too Few Women at the Top Kumiko Nemoto, 2016-08-03 The number of women in positions of power and authority in Japanese companies has remained small despite the increase in the number of educated women and the passage of legislation on gender equality In *Too Few Women at the Top* Kumiko Nemoto draws on theoretical insights regarding Japan's coordinated capitalism and institutional stasis to challenge claims that the surge in women's education and employment will logically lead to the decline of gender inequality and eventually improve women's status in the Japanese workplace Nemoto's interviews with diverse groups of workers at three Japanese financial companies and two cosmetics companies in Tokyo reveal the persistence of vertical sex segregation as a cost saving measure by Japanese companies Women's advancement is impeded by customs including seniority pay and promotion track based hiring of women long working hours and the absence of women leaders Nemoto contends that an improvement in gender equality in the corporate system will require that Japan fundamentally depart from its postwar methods of business management Only when the static labor market is revitalized through adoption of new systems of cost savings employee hiring and rewards will Japanese women advance in their chosen professions Comparison with the situation in the United States makes the author's analysis of the Japanese case relevant for understanding the dynamics of the glass ceiling in U S workplaces as well

School Leadership - Heads on the Block? Pat Thomson, 2009-05-07 Most teachers become heads for idealistic reasons but heads are leaving work and there is a shortage of applicants for school leadership roles Arguing that pressure needs to be lifted from heads if this is to be redressed this book considers initial moves that could precipitate such change

Time Traps Todd Duncan, 2010-12-07 Sales quotas stress filled days and long working hours fill the schedules of salespeople everywhere In *Time Traps* author Todd Duncan teaches readers that this formula is all wrong and proclaims that it's possible to achieve more sales success with less stress earn more family time with less frustration and gain more money without investing life consuming hours at work The key he shares is not time management after all managing time is an impossible task to undertake Instead he shows readers how to manage what they do with the time they're given Highly acclaimed by some of the biggest names in the business sales and leadership industries including bestselling authors Stephen R Covey and John C Maxwell *Time Traps* includes tips for balancing and maximizing time saying no more often leveraging time saving tools and technology and prioritizing life amid professional chaos More than that the book explains why these things are so important in the first place and how allowing time for one thing can actually produce more output not less in other areas of your life Research shows that as much as 75 percent of the time people spend at work is a waste of

that valuable time used for menial tasks rather than making sales This straightforward and actionable guide will help you break out of this statistic so you can propel your career and your life to new heights starting right now The Mismanagement of Talent Phillip Brown,Anthony Hesketh,2004 The authors lift the veneer off employability to expose serious problems in the way that future workers are trying to manage their employability how companies understand their human resource strategies and government failure to come to terms with the realities of the knowledge based economy

Managing Diversity in Organizations María Triana,2017-03-31 This book equips students with a thorough understanding of the advantages and challenges presented by workplace diversity suggesting techniques to manage diversity effectively and maximize its benefits Readers will learn to work with diverse groups to create a productive organization in which everyone feels included The author offers a comprehensive survey of demographic groups and an analysis of their history allowing students to develop a deep understanding of the dimensions of diversity From this foundation students are taught to manage diversity effectively on the basis of race sex LGBTQIA religion age ability national origin and intersectionality in organizations and to understand the issues various groups face including discrimination Opening with current case studies and discussion questions to enhance comprehension the chapters provide practical insight into subconscious implicit bias team diversity and diversity management in the United States and abroad Global View examples further highlight how diversity management unfolds around the world Offering a fresh look at workplace diversity this book will serve students of diversity human resource management and organizational studies A companion website featuring an instructor s manual PowerPoint slides and test banks provides additional support for students and instructors **Opting for**

Elsewhere Brian A. Hoey,2014-12-31 Do you get told what the good life is or do you figure it out for yourself This is the central question of Opting for Elsewhere as the reader encounters stories of people who chose relocation as a way of redefining themselves and reordering work family and personal priorities This is a book about the impulse to start over Whether downshifting from stressful careers or being downsized from jobs lost in a surge of economic restructuring lifestyle migrants seek refuge in places that seem to resonate with an idealized potential self Choosing the option of elsewhere and moving as a means of remaking self through sheer force of will are basic facets of American character forged in its history as a developing nation of immigrants with a seemingly ever expanding frontier Building off years of interviews and research in the Midwest including areas of Michigan Brian Hoey provides an evocative illustration of the ways these sweeping changes impact people and the communities where they live and work as well as how both react devising strategies for either coping with or challenging the status quo This portrait of starting over in the heartland of America compels the reader to ask where we are going next as an emerging postindustrial society **Women Leaders in Higher Education** Tanya

Fitzgerald,2013-08-15 Leadership in universities is physically intellectually and emotionally demanding work It involves multiple and complex tasks and responsibilities such as staff management strategic management operational planning

financial and resources management policy development quality assurance processes improving student outcomes and engaging with community and the professions industry Leadership is not simply the act of being a leader it is the act of leadership that projects success and desirable attributes Leadership has the capacity to be deeply seductive yet it is not an immediately attractive option for women particularly for those who carry the burden of family and domestic responsibilities for whom finding a space for leading is no easy task Yet despite the almost pessimistic research evidence women are in senior leadership positions in higher education however precarious their numbers There can be little doubt that universities benefit from diversity in their student and staff population This book addresses the central questions Who are the women who survive and occupy elite leadership roles in universities How might their leadership be shaped by and a consequence of institutional climate What strategies do they learn and adopt and how do they lead and manage their female colleagues What about those women who do not fit the gender script The chapters overview the changing policy landscape in higher education provide a critical commentary on the interplay between gender leadership higher education and organisational diversity and draw on education and critical management literatures in order to offer a broader understanding of gender and elite leadership This book will be essential reading for anyone involved or interested in higher education policy and management academic leadership organisational diversity and gender studies Ethics, the Heart of Leadership Joanne B.

Ciulla, 2014-09-09 Top academic scholars ponder the question of ethics as it pertains to all aspects of leadership in business government and nonprofit organizations If leaders were defined by their influence on history Hitler would be on par with Gandhi Lincoln and Mother Theresa Yet most of us believe that our superiors have a responsibility to exercise power with a purpose far greater than any political agenda and a motive more noble than personal gain This thought provoking collection of essays explores the ethical challenges that leaders face in their relationships with followers the choices they make and the ways in which they influence others Joanne Ciulla and her contributors examine the traits and characteristics of top tier leaders She questions the assumption that moral fortitude is an inherent part of being in charge analyzes the roles that charisma morality and delegation play in the leadership paradigm and considers whether individuals who want to lead with integrity but are sometimes forced to get their hands dirty for their constituents can be called moral leaders Readers will gain an appreciation for how ethics is not an add on to the practice of leadership but rather an integral part of it an element that informs the very idea of what it means to lead and to lead well Gender, Management and Leadership in Initial

Teacher Education Barbara Thompson, 2016-10-26 This book highlights the difficulties that women working as managers and leaders in initial teacher education face Teacher education is at the forefront of education reforms and yet little is known about the professional lives of those who work within it Whereas many women are moving into positions of authority in teacher training some existing women managers are being marginalized within new internally differentiated layers of managerial structures Yet other female managers mainly new appointees seem to endorse the discourses associated with

new managerialist practices Simultaneously some women who manage in teacher training are engaged in a struggle for survival individually and professionally In the main men seem to be missing from authority positions and will conclude that in the current climate the management of teacher training is no job for a man
