Sir John Soane?

Influence on Architecture from 1791 Oliver Bradbury,2017-07-05 Sir John Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753-1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture

Architects, Angels, Activists and the City of Bath, 1765-1965 Cynthia Imogen Hammond,2012 Approaching the past as both historian and artist Cynthia Imogen Hammond documents how women across classes shaped the built environment of one of England's most architecturally significant cities Architects Angels Activists and the City of Bath 1765-1965 Engaging with Women's Spatial Interventions in Buildings and Landscape documents Hammond's own creative spatial interventions in the city through which she brings the history of women to the foreground of Bath's urban image

"Architects, Angels, Activists and the City of Bath, 1765-1965" Cynthia Imogen Hammond,2017-07-05 A unique contribution to the architectural and social history of Bath Architects Angels Activists and the City of Bath 1765-1965 Engaging with Women's Spatial Interventions in Buildings and Landscape approaches the past with the methods of the architectural historian and the site specific interventions of the contemporary artist Looking beyond and behind Bath's strategic marshalling of its past Cynthia Imogen Hammond presents the ways in which women across classes shaped the built environment and designed landscapes of one of England's most architecturally significant cities This study argues that Bath's efforts to preserve itself as an idealized Georgian town reveal an aesthetics of exclusion Jane Austen may be well known but the role of historic women in the creation of this city has had minimal treatment within the city's collective public memory This book is an intervention into this memory the author uses site specific works of public art as strategic counterparts to her historical readings Through them she aims to transform as well as critique the urban image of Bath At once a performative literature an extensively researched history and an alternative guide to the city Architects Angels Activists engages with current struggles over urban

signification in Bath and beyond *The Image of Georgian Bath 1700-2000* Peter Borsay, 2000-07-06 This interdisciplinary study explores the evolution structure and uses of the image of Georgian Bath from its genesis in the eighteenth century to its renaissance in the twentieth century In recent decades there has been both a popular resurgence of interest in heritage and tradition and a growing academic awareness of the power of imagery in shaping the lives of individuals and societies There is perhaps no city in Britain so saturated in history and layered with historic imagery as Bath It therefore provides an ideal case study to investigate the dynamic fusion and impact of the forces of past and representation The dominant perception of Bath today is that of a classical and particularly Georgian city In this stimulating and scholarly study Peter Borsay examines the construction and development of this image Its principal components biography and architecture are explored together with the media through which it was constructed and transmitted as well as its commercial social political and psychological uses Dr Borsay concludes by relating the findings for Bath to current debates on towns heritage and the nature of history **Urban History 19:2** Kajal Lahiri, Geoffrey H. Lahiri, 1992-12-10 **Oxford Jackson** William Whyte, 2006-08-31 This is the first biography of T G Jackson an architect who transformed the image of Oxford rebuilt public schools and became a leading architect of the arts and crafts movement Although many of his buildings are famous until now he has been little known Yet his work illuminates a whole society as well as an individual **Strange Spaces** André Jansson, 2016-12-05 Certain bizarre spaces where disruption or disarray rule leave us estranged and out of place This book examines such spaces highlighting the emotional and mediated geographies of uncertainty and the state of being in between of cognitive displacement loss fear or exhilaration It expands on why space is sometimes estranging and for whom it is strange It is the first book to link strangeness and spatial production as well as empirical explorations of strange spaces within a profound theoretical discussion of what is strange about strange spaces and how they evolve in a modern media age **Journal of the Royal Institute of British Architects** ,1928 **The Architects' Journal** ,1992 *William Beckford* Timothy Mowl, 2013-02-21 William Beckford had two lives one real and sensational the other an elegant forgery he invented in retirement after the young Disraeli mischievously sent him a homoerotic epic based loosely on Beckford s own career Biographers have been bemused by Beckford s faked letters and dream encounters with celebrities but his real life was far more significant he is the pivotal Romantic between Horace Walpole and Byron Beckford was reared in exotic isolation in a Palladian palace where he grew up obsessed with dark grottoes towers and images of the living dead Rushed into marriage by an apprehensive mother he indulged his actual passions both legal and paedophile until a Tory administration staged a sex scandal that exiled him In his absence his novel *Vathek* was treacherously pirated Returned to England Beckford flung his wealth into the creation of Fonthill Abbey which by its shadowy vistas and glamorous camp furnishings paved the way for the wildest excesses of Victorian taste *The Architect* ,1926 *Fonthill Recovered* Caroline Dakers, 2018-05-16 Fonthill in Wiltshire is traditionally associated with the writer and collector William Beckford who built his Gothic fantasy house called

Fonthill Abbey at the end of the eighteenth century The collapse of the Abbey's tower in 1825 transformed the name Fonthill into a symbol for overarching ambition and folly a sublime ruin Fonthill is however much more than the story of one man's excesses Beckford's Abbey is only one of several important houses to be built on the estate since the early sixteenth century all of them eventually consumed by fire or deliberately demolished and all of them oddly forgotten by historians Little now remains a tower a stable block a kitchen range some dressed stone an indentation in a field Fonthill Recovered draws on histories of art and architecture politics and economics to explore the rich cultural history of this famous Wiltshire estate The first half of the book traces the occupation of Fonthill from the Bronze Age to the twenty first century Some of the owners surpassed Beckford in terms of their wealth their collections their political power and even in one case their sexual misdemeanours They include Charles I's Chancellor of the Exchequer and the richest commoner in the nineteenth century The second half of the book consists of essays on specific topics filling out such crucial areas as the complex history of the designed landscape the sources of the Beckfords' wealth and their collections and one essay that features the most recent appearance of the Abbey in a video game

The Builder, 1856 **The Early Temples of the Mormons** Laurel B. Andrew, 1978-01-01 This book is a study of the six temples which the Church of Jesus Christ of the Latter day Saints constructed in the nineteenth century Though sharing the characteristics of various revival styles the buildings demonstrate a progressive modification of these styles so as to express the functions of the temples and to reflect the theology and politics of the Mormons The four temples in Utah designed by the church president Brigham Young and his builder architects symbolize the merging of spiritual and temporal concerns and the author believes were meant to play an instrumental role in the transformation of America into a millennial kingdom of God and a second Garden of Eden Thus the temples are studied within the specific context of Mormonism and the broader spectrum of American cultural history as well The account begins in Ohio where the believers in Joseph Smith's restored gospel erected a temple resembling the New England meetinghouse in form and use It follows the Mormons to Nauvoo Illinois where the second temple was built in the 1840s The author demonstrates how the developing theology and the introduction of secret rituals began to change the meaning and the architectural form of the temple as the style and architectural symbols were incorporated on the exterior of the temple From Illinois the Mormons moved to Utah where four temples were built The most important at Salt Lake City is discussed in detail The author evaluates the contributions of Brigham Young to its design illustrates and discusses the drawings of the architect and offers an interpretation of the symbolism of the building She also discusses the attempt of the Mormons to establish an independent Kingdom of God in preparation for the Second Coming of Christ and relates the Salt Lake City temple and the other Utah buildings to this effort Her conclusion is that the Salt Lake City temple was to have a civic as well as religious function as the governmental center of the Kingdom of God The other three Utah temples were intended to extend the authority of the Mormon government throughout Utah

"Iron, Ornament and Architecture in Victorian Britain " Paul

Dobraszczyk,2017-07-05 Vilified by leading architectural modernists and Victorian critics alike mass produced architectural ornament in iron has received little sustained study since the 1960s yet it proliferated in Britain in the half century after the building of the Crystal Palace in 1851 a time when some architects engineers manufacturers and theorists believed that the fusion of iron and ornament would reconcile art and technology and create a new modern architectural language

Comprehensively illustrated and richly researched Iron Ornament and Architecture in Victorian Britain presents the most sustained study to date of the development of mechanised architectural ornament in iron in nineteenth century architecture its reception and theorisation by architects critics and engineers and the contexts in which it flourished including industrial buildings retail and seaside architecture railway stations buildings for export and exhibition and street furniture Appealing to architects conservationists historians and students of nineteenth century visual culture and the built environment this book offers new ways of understanding the notion of modernity in Victorian architecture by questioning and re evaluating both Victorian and modernist understandings of the ideological split between historicism and functionalism and ornament and structure *Journal of the American Institute of Architects* American Institute of Architects,1916

Representing the Environment John R. Gold,George Revill,2004-08-02 The development of the environmental movement has relied heavily upon written and visual imagery Representing the Environment offers an introductory guide to representations of the environment found in the media literature art and everyday life encounters Featuring case studies from Europe the Americas and Australia Representing the Environment provides practical guidance on how to study environmental representations from a cultural and historic perspective and places the reader in the role of active interpreter The book argues that studying representations provides an important lens on the development of environmental attitudes values and decision making

Ordering Law Clare Graham,2017-05-15 Over the last thirty years historical studies of building types have become something of a growth area As well as such general surveys as Nikolaus Pevsner s History of Building Types there are growing numbers of studies of individual types of which the most distinguished perhaps remain Mark Girouard s Life in the English Country House and Robin Evan s study of prisons The Fabrication of Virtue This growth is not surprising because the subject lends itself to the New Art History and to our increasing desire to set buildings within their social and cultural contexts as well as their stylistic and cultural ones This book by Dr Graham is a comprehensive study of a type of building the law court which has to date remained largely unexplored Ordering Law establishes when why and how the trial came to be housed in purpose built accommodation in England and what was architecturally distinctive about that accommodation in the period leading up to 1914 The main text concentrates on examining in depth a series of well documented individual buildings and groups of buildings using a wide range of contemporary sources to illuminate the way in which they were designed and used Other information gleaned about court buildings nationwide is placed in an appendix in gazetteer form originally drawn from the 200 or so examples listed in the Buildings of England guides this has expanded to include over 800 entries As a

piece of scholarly research this work draws on several disciplines and will be of interest to those studying social and legal history as well as those with a broader interest in architectural history
