Nutritional Implications Of Macronutrient Substitutes:

Nutritional Implications of Macronutrient Substitutes G. Harvey Anderson, Barbara J. Rolls, Daniel G. Steffen, 1997
The papers in this volume were presented at a conference entitled Nutritional Implications of Macronutrient Substitutes held by the New York Academy of Sciences Institute and the International Life Sciences Institute North America Technical Committee on Macronutrient Substitution on October 27-29, 1996 in Arlington, Virginia, USA. The focus of the volume is on the understanding of the impact of macronutrient substitutes on energy and nutrient intake, food selection, and dietary patterns. Currently, Americans are eating numerous lower fat and sugar free foods which are made possible by the technology of macronutrient substitutes. These include the intense sweeteners and fat replacers of which the carbohydrate and protein types are available. As a major reason for the initial development of macronutrient substitutes was the increase in obesity in the population of the United States, this volume discusses the energy balance. *Nutrition in Clinical Practice* David L. Katz, 2012-03-28. Written by one of America's foremost authorities in preventive medicine, *Nutrition in Clinical Practice* Second Edition is the practical, comprehensive, evidence-based reference that all clinicians need to offer patients effective, appropriate dietary counseling. This fully revised edition incorporates the latest studies and includes new chapters on diet and hematopoiesis, diet and dermatologic conditions, and health effects of coffee, chocolate, and ethanol. Each chapter concludes with concise guidelines for counseling and treatment based on consensus and the weight of evidence. Appendices include clinically relevant formulas, nutrient data tables, patient-specific meal planners, and print and Web-based resources for clinicians and patients. **Sweeteners and Sugar Alternatives in Food Technology** Kay O'Donnell, Malcolm Kearsley, 2012-07-13. This book provides a comprehensive and accessible source of information on all types of sweeteners and functional ingredients enabling manufacturers to produce low sugar versions of all types of foods that not only taste and perform as well as sugar-based products but also offer consumer benefits such as calorie reduction, dental health benefits, digestive health benefits, and improvements in long-term disease risk through strategies such as dietary glycaemic control. Now in a revised and updated new edition which contains seven new chapters, Part I of this volume addresses relevant digestive and dental health issues as well as nutritional considerations. Part II covers non-nutritive high-potency sweeteners and, in addition to established sweeteners, includes information to meet the growing interest in naturally occurring sweeteners. Part III deals with the bulk sweeteners which have now been used in foods for over 20 years and are well established both in food products and in the minds of consumers. In addition to the traditional polyol bulk sweeteners, newer products such as isomaltulose are discussed. These are seen to offer many of the advantages of polyols, for example, regarding dental health and low glycaemic response without the laxative side effects if consumed in large quantity. Part IV provides information on the sweeteners which do not fit into the above groups but which nevertheless may offer interesting sweetening opportunities to the product developer. Finally, Part V examines bulking agents and multifunctional ingredients.

which can be beneficially used in combination with all types of sweeteners and sugars *Family Economics and Nutrition Review*, 1997 **Appetite and Food Intake** Ruth Harris, Ruth B.S. Harris, Richard D. Mattes, 2008-02-21 A complex interplay of social economic psychological nutritional and physiological forces influence ingestive behavior and demand an integrated research approach to advance understanding of healthful food choices and those that contribute to health disorders including obesity related chronic diseases Taking a multifaceted approach *Public Health Reports*, 1998

Enhancing the Regulatory Decision-Making Approval Process for Direct Food Ingredient Technologies Institute of Medicine, Food Forum, 1999-04-29 The Institute of Medicine's IOM's Food Forum was established in 1993 to allow science and technology leaders in the food industry top administrators in the federal government representatives from consumer interest groups and academicians to discuss and debate food and food safety issues openly and in a neutral setting The Forum provides a mechanism for these diverse groups to identify possible approaches for addressing food and food safety problems and issues surrounding the often complex interactions among industry academia regulatory agencies and consumers On May 6 7 1997 the Forum convened a workshop titled Enhancing the Regulatory Decision Making Process for Direct Food Ingredient Technologies Workshop speakers and participants discussed legal aspects of the direct food additive approval process changes in science and technology and opportunities for reform Two background papers which can be found in Appendix A and B were shared with the participants prior to the workshop The first paper provided a description and history of the legal framework of the food ingredient approval process and the second paper focused on changes in science and technology practices with emphasis placed on lessons learned from case studies This document presents a summary of the workshop *Cumulated Index Medicus*, 1989 *Sweeteners and Sugar Alternatives in Food Technology* Helen Mitchell, 2008-04-15 Sugar replacement in food and beverage manufacture no longer has just an economic benefit The use of ingredients to improve the nutritional status of a food product is now one of the major driving forces in new product development It is therefore important as options for sugar replacement continue to increase that expert knowledge and information in this area is readily available *Sweeteners and Sugar Alternatives in Food Technology* provides the information required for sweetening and functional solutions enabling manufacturers to produce processed foods that not only taste and perform as well as sugar based products but also offer consumer benefits such as calorie reduction dental health benefits digestive health benefits and improvements in long term disease risk through strategies such as dietary glycaemic control Part I of this comprehensive book addresses these health and nutritional considerations Part II covers non nutritive high intensity sweeteners providing insights into blending opportunities for qualitative and quantitative sweetness improvement as well as exhaustive application opportunities Part III deals with reduced calorie bulk sweeteners which offer bulk with fewer calories than sugar and includes both the commercially successful polyols as well as tagatose an emerging functional bulk sweetener Part IV looks at the less well established sweeteners that do not conform in all respects to what may be considered to

bestandard sweetening properties Finally Part V examines bulkingagents and multifunctional ingredients Summary tables at the endof each section provide valuable concentrated data on each of thesweeteners covered The book is directed at food scientists andtechnologists as well as ingredients suppliers
