Bauer, 2012-01-12 The ability to remember unique personal events is at the core of what we consider to be memory Contributors to this volume use state of the art theories and methods to address questions of how the vivid experience of reinstatement of our past emerges and how recollection contributes to our life histories **Memory Editing Mechanisms** Susan E. Gathercole, Martin A. Conway, 2020-10-28 This special issue of Memory is devoted to an investigation of those mechanisms by which memory is edited for inaccuracies and inconsistencies In the past 20 years false memories have been investigated from a variety of different angles Substantial evidence indicates that false memories can be created in a number of different situations including word learning sentence and story memory eyewitness memory memory for faces and memory for naturalistic scenes In each of these cases it has been found that memory is subject to a range of distortions But there has also been an increasing recognition that this is only half the story For although memory is subject to distortion there are also quality control mechanisms that are utilized that allow our memories to be relied on as reasonably accurate under most circumstances These mechanisms include recollection rejection distinctiveness and source memory The focus of this special issue then is on the interplay between Street Railway Conditions in the District of Columbia United States. Congress. Senate. Special Committee to Investigate Street Railway Conditions in the District of Columbia. [from old catalog], 1917 *The Victorian Mind's Eye* Julia Thomas, 2025-01-12 The Victorian Mind's Eye Reading Literature in an Age of Illustration The Victorians lived in an age of illustration In a matter of decades words and images had become enmeshed and entangled printed alongside each other in a spectacular array of printed forms The exponential growth of illustration not only radically changed literature but also changed the way that literature was read This book offers a major conceptualisation of the difference that pictures made to the reading of words Analysing an extensive range of illustrated material and drawing on the accounts of Victorian readers reviewers authors artists and psychologists the book describes how the Victorians characterised the effects of illustration and how illustrations in turn elicited and anticipated responses from their readers What emerges from these sources is the notion of a distinct mode of reading that determined readers material and mental engagements with illustrated literature The presence of images on the page was said to impact on whether readers created images in their mind as they read Illustrations generated feelings of pleasure or displeasure they determined what was read first what was recalled and what was etched in the memory By peering into the recesses of the mind's eye this book identifies the cognitive mechanisms and cultural politics that were central to how the Victorians described their reading of illustrated literature It suggests the significance of these ideas of reading for understanding the place of illustration in Victorian culture and the relation between words pictures and historical values and meanings Illustration was fundamental to how the Victorians read and to how we read the Victorians *Music, Memory and Memoir*
