Regional Development In China States Globalization And Inequality:

Regional Development in China Yehua Dennis Wei, 2000 *Regional Development in China* Yehua Dennis

Wei, 2013-04-15 This study systematically examines uneven regional development in China focusing on three central agents the foreign investor the state and the region Wei's findings have important implications for theories of and policy towards Chinese regional development This book is a vital resource for those with an interest in transition economies Regional

Inequality in Transitional China Felix Haifeng Liao, Yehua Dennis Wei, Li Huang, 2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition Regional Inequality in Transitional China will appeal to scholars and students of geography economics and Chinese studies more broadly Globalizing Regional Development in East Asia Henry Wai-chung Yeung, 2013-09-13 Significant historical

and geographical differences account for the many processes and trajectories of regional development in East Asia These historical and geographical specificities in East Asia have prompted serious re examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world's most dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers students and policy makers interested in East Asia This book was published as a special issue of Regional Studies

Innovation and Regional Development in China Ingo Liefner, Yehua Dennis Wei, 2013-07-24 Although China is now

the factory of the world there is no reason to expect that it will always be content with manufacturing labor intensive goods for foreign corporations Scholars must now ask What is the current level of innovation in China And how can we face this challenge and renovate industrial production and innovation capacities in developed countries This edited volume investigates the unique characteristics of Chinese innovation and regional development China s policy framework and the role that transnational corporations play in China s increasing innovation activities This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries and identifies the ways in which local production networks respond to different configurations of external linkages Linking patterns of global and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether and how particular configurations of production networks generate divergent long term local productivity growth and technological development outcomes Innovation and Regional Development in China will be of interest to geographers economists China specialists development specialists and scholars working on innovation and regional development in developing areas and transition countries Globalization and Beyond Jon Shefner, Patricia Fernandez-Kelly, 2011-01-01 The enormous turnout in Washington DC for Barack Obama s presidential inauguration and the worldwide rejoicing at this signal of change offered a tangible demonstration of people s desire for a new world order In the waning months of the Bush administration crushing global recession dealt a critical blow to the neoliberal project The hegemony of the United States and of the international institutions it has used to maintain its economic dominance has been in decline for some years now suggesting the need to explore alternative ways to carry out globalization s imperatives In Globalization and Beyond leading scholars take up the challenge of examining the current state of economic crisis and the variety of ways in which different countries as well as different groups are responding to it **Small Town China** Beatriz Carrillo Garcia, 2011-04-19 While much has been written about rural migrant workers experiences in the big cities population movements into China s vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers experiences in a small town in a north China county The author explores the processes and institutions that enable or preclude the social inclusion of rural workers into the town s socio economic system Inclusion and exclusion are assessed through an examination of rural workers immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers It stresses the fact that the particular socio economic structure of towns where the state owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers Though shortcomings are still observed the book suggests that China s transformation may not necessarily result in dysfunctional and socially polarized urban environments This book will be of interest to students and scholars of China s rural migrant workers

bottom up urbanization and small town development social policy and more broadly on contemporary social change in China

Choosing China's Leaders Chien-wen Kou,Xiaowei Zang,2013-10-08 Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites entry and exit including age limits term limits and step by step promotion By examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in China While existing studies have developed our understanding of Chinese elite politics two key puzzles regarding institutionalisation remain Although institutionalisation is recognised as an important trend in Chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this Further it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics Drawing on a wide range of studies this book looks at Politburo members senior People s Liberation Army officers provincial leaders heads of major central state owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China This book will be of great interests to students and scholars of Chinese politics and government Chinese studies and Asian politics more broadly

Policing Serious Crime in China Susan Trevaskes,2012-08-06 Despite a resurgence in the number of studies of Chinese social control over the past decade or so no sustained work in English has detailed the recent developments in policy and practice against serious crime despite international recognition that Chinese policing of serious crime is relatively severe and that more people are executed for crime in China each year than in the rest of the world combined In this book the author skilfully explores the politics practice procedures and public perceptions of policing serious crime in China focusing on one particular criminal justice practice anti crime campaigns in the period of transition from planned to market economy from the 1980s to the first years of the twenty first century Susan Trevaskes analyzes the elements that led to the Hard Strike becoming the preferred method of attacking the growing problem of serious crime in China before going on to examine the factors surrounding the failure of the Hard Strike as a way of addressing the main problems of serious crime in China today that is drug trafficking and organized crime Drawing on a rich variety of Chinese sources *Serious Crime in China* is an original and informed read for scholars of China criminologists generally and the international human rights community

Rural Policy Implementation in Contemporary China Anna Ahlers,2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability At that time the term three rural problems sannong wenti was coined which defined the main issues of rural life that needed to be targeted by government action agriculture nongye villages nongcun and farmers nongmin In turn

with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still home to half of the Chinese population This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside BNSC policy framework Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005 2006 Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation Altogether the results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies strategic agency can actually push forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China s state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally
