Regional Integration A Comparison Of European And Central American Dynamics:

Regional Integration Louis A. McCall, 1976 **Regional Integration**, 1976 **Comparative Regionalism** Fred H. Lawson, 2017-03-02 Regionalism has regained momentum in the post Cold War era New economic groupings continue to spring up across the globe while older regional organizations have strengthened their institutional bases and broadened their scope Explaining the reinvigoration of regionalism requires comparative analyses that not only highlight the commonalities that characterize various regional experiments but also account for the differential outcomes and divergent trajectories such projects exhibit This collection of seminal articles on regionalism advances theoretical concepts that can stimulate useful comparisons along with scholarly surveys of important instances of regionalism in the contemporary world Besides classic studies of the European Union the volume includes authoritative overviews and case studies of regionalist projects in East Asia Sub Saharan Africa Latin America the Middle East and Central Eurasia An introductory essay situates these articles in the context of the five decade long research program on regional integration theory *Central America Integrat* Royce Q. Shaw, 2019-04-09 This study challenges several widely held assumptions about Central American economic integration arguing that the key to understanding the failure of the integration program lies in neither advanced economic nor regional integration theory but in the domestic politics of the states involved Thus the author contends that the Common Market was not the cause of the balance of payments and balanced growth crises in Central America rather domestic political forces were the major factor in the collapse of the market and the subsequent attempts at restructuring Professor Shaw disputes the standard interpretations of the role of the technocrats in the integration process and demonstrates that the domestic political elites played an important role throughout He also challenges the assumption that economic integration is always a force for conciliation pointing out that the Common Market aggravated some of the conflicts that led to war between El Salvador and Honduras in 1969 Nor are integration programs among less developed countries necessarily instruments of political and social change according to this analysis on the contrary political elites used the Common Market to bypass the internal economic reforms necessary for national development This study incorporates new material interview data and other primary source material on events of the past eight years *Beyond Regionalism?* Matteo Legrenzi, 2016-04-15 Regional cooperation regionalism and regionalization in the Middle East are usually considered to be weak and rather ceremonial However since September 11 2001 a new regional order is emerging and the impact of geostrategic changes in the international environment has yet to be satisfactorily studied With older regional organizations suffering from weaknesses new forms appear to be developing and flourishing due either to European support or growing sub regional identities This volume offers refined theoretical models and approaches which are attuned to the new dynamics and contradictions of a wide range of regionalist projects in the contemporary Middle East Case studies of the most important regional organizations in different policy fields offer comprehensive overviews of the main actors institutions historical development and current

Constitutionalizing Globalization Daniel Judah Elazar, 1998 The gradual development of appropriate constitutional mechanisms and controls is part of a general shift from modern statism to postmodern federalism Reliance on the sovereignty of the nation state which marked the era from the Treaty of Westphalia in 1648 to the end of World War II gave way to the beginning of a world order that links states in various ways through enforceable constitutional bonds These trends have been recognized by students both of federalism and of international relations Constitutionalizing Globalization is the first book to join the perspectives of both in order to explain the new paradigm

Duchacek, Helena Duchacek, 2019-07-09 This comparative study examines the dialectical tensions between global and regional interdependence and the fragmentation of humankind into territorial entities Political authority may remain territory bound but borders increasingly are penetrated by pollutants individuals noncentral governments in search of foreign trade and investment and transnational corporations as well as the traditional exchanges of trade media and culture The result of these transborder flows accelerated by new technologies is a new variety of international relations among perforated sovereignties Dr Duchacek analyzes the territorial organization of political authority in both democratic and authoritarian frameworks as well as in unitary and federal systems Case studies focus on new forms of transborder interactions between neighboring countries especially in North America and in Western Europe The book is of major interest to scholars in the fields of political science and political economy Quotations from a variety of political theorists and practitioners illustrative diagrams and maps make the book suitable for students of comparative politics international relations comparative federalism and public policy

Limits to Regional Integration Søren Dosenrode, 2016-03-09 Regionalization in general and regional integration in particular have taken place at a growing pace since the end of the Cold War when states were set free from various security overlays Regional integration is logical as it is

supposed to advance wealth and peace Still the picture is far from clear and the process of regional integration is not automatic disintegration takes place as we saw in the cases of the Soviet Union Yugoslavia and Czechoslovakia to mention a few This is the case not only in states recently brought together but also in traditional states like Britain The Netherlands and Spain where strong groups strive for independence In some places regionalization is flourishing but regional integration is not Some regional integration projects like the North American Free Trade Agreement and Mercosur seem to stagnate Certainly there are limits to regional integration This comprehensive volume written by high profiled academics covers these themes by examining eleven cases ranging from the lack of integration in the Arctic and the Middle East to ongoing or progressing integration in Europe to uncover what blocks regional integration the results of which are used for developing new theoretical insights
