Regions Spatial Strategies And Sustainable Development:

Regions, Spatial Strategies, and Sustainable Development Graham Haughton,Dave Counsell,2004-01-01

Regions, Spatial Strategies and Sustainable Development David Counsell,Graham Haughton,2004-07-31 This book focuses on recent regional policy and planning debates in all the English regions **Leadership and the City** Markku Sotarauta,2015-11-06 The 21st century has been dominated by an almost compulsive race to find new pathways for city development As cities seek to regenerate via the knowledge based economy now more than ever dynamic leadership is required order to navigate new and complex challenges while building community This book is about generative leadership in knowledge city development Leadership and the City is rooted in a conviction that the leadership in a city is crucial in order for it to adjust strategically to major transformations and thus secure a good future for its inhabitants The book opens a fresh view of leadership by focusing on generative leaders and their modes of leading instead of spatial categorisations governance structures and or policy contents and processes It investigates generative leadership by elaborating the modes of leadership power and strategies in influence networks The key points are highlighted with several empirical cases These include Akron and Rochester USA Munich Germany Leeds UK Barcelona Spain as well as Helsinki Tampere and Seinäjoki Finland This book will be of interest to researchers and practitioners concerned with Leadership Urban Studies and Strategic Management

Beyond Territory Harald Bathelt,Maryann Feldman,Dieter F. Kogler,2012-03-29 The main purpose of the book is to discuss new trends in the dynamic geography of innovation and argue that in an era of increasing globalization two trends seem quite dominant rigid territorial models of innovation and localized configurations of innovative activities The book brings together scholars who are working on these topics Rather than focusing on established concepts and theories the book aims to question narrow explanations rigid territorializations and simplistic policy frameworks it provides evidence that innovation while not exclusively dependent on regional contexts can be influenced by place specific attributes The book will bring together new empirical and conceptual work by an interdisciplinary group of leading scholars from areas such as economic geography innovation studies and political science Based on recent discussions surrounding innovation systems of different types it aims to synthesize state of the art know how and provide new perspectives on the role of innovation and knowledge creation in the global political economy **The Recession and Beyond** David Bailey,Caroline

Chapain,2012-03-29 How has the recession impacted on firms people and places How have local and regional authorities responded This book aims to answer these questions by offering an overview of the impacts of the recession on people and places and how it has affected local authorities in the UK and other OECD countries The volume makes a fresh contribution to understanding local economic development and governance by providing a unique perspective and original data on the way local authorities have dealt with the recent economic shock across countries **Business Networks in Clusters and**

Industrial Districts Fiorenza Belussi,Alessia Sammarra,2009-09-10 During the 1980s the Marshallian concept of industrial

district ID became widely popular due to the resurgence of interest in the reasons that make the agglomeration of specialised industries a territorial phenomenon worth being analysed The analysis of clusters and IDs has often been limited considering only the local dimension of the created business networks The external links of these systems have been systematically under evaluated This book offers a deep insight into the evolution of these systems and the internal external mechanism of knowledge circulation and learning This means that the access to external knowledge information or R showing that existing capabilities expand when locally embedded knowledge is combined with accessible external knowledge In this view external knowledge linkages reduce the danger of cognitive lock in and over embeddedness which may become important obstacles to local learning and innovation when technological trajectories and global economic conditions change A selection of international experts

Skills and Cities Sako Musterd,Marco Bontje,Jan Rouwendal,2016-03-17 Creative industries have become fundamental in signalling the economic wellbeing of cities and urban regions Workers who are attracted to the sector tend to have strong preferences when it comes to the neighbourhoods they want to live in with factors such as job availability and urban amenities playing a large part in their decision Skills and Cities analyses these factors and looks at the implications for urban and regional policy across a range of European cities Drawing conclusions from the Netherlands and Scandinavian cities Copenhagen and Helsinki this book sheds new light on the debate about the importance of jobs and urban amenities for attracting high skilled employees This edited collection brings together international literature and individual residential experiences from different cities presenting policy simulations and highlighting the differences between urban and suburban groups Subsequent chapters discuss the location preference and settlement process of international migrants and students in an attempt to understand what it is that attracts highly skilled workers to a particular area This book concludes by expertly drawing together the key issues surrounding the residential behaviour of highly educated workers and students This collection will be of interest to researchers and policy makers in urban planning as well as Postgraduate students researching housing preferences

Urban Innovation Systems Willem van Winden,Erik Braun,Alexander Otgaar,Jan-Jelle Witte,2014-04-11 Why are some regions and cities so good at attracting talented people creating high level knowledge and producing exciting new ideas and innovations What are the ingredients of success Can innovative cities be created and stimulated or do they just flourish by mere chance This book analyses the development and management of innovation systems in cities in order to provide a better understanding of what makes such systems perform The book opens by developing a conceptual model that combines insights from urban economics with economic geography urban governance and place marketing This highlights the relevance of path dependence different types of proximity and the role of clusters networks and platforms institutional conditions place attractiveness and place identity in the evolution of local innovation systems The authors then draw on this conceptual framework to structure empirical case studies in three cities with a relatively high innovation performance Eindhoven the Netherlands Stockholm Sweden and Suzhou China

Through these case studies they provide a detailed analysis of how successful innovation systems evolve and what makes them tick Unique to this book is the linking of analysis to concrete policy and management responses The book ends with a discussion on six themes in the development of successful urban innovation systems firm capabilities and leader firms higher education and research attractive environment place branding institutional environment and entrepreneurship Each theme is examined fully drawing lessons from the case studies and from recent insights and other cases discussed in the literature This title will be of interest to students researchers and policymakers involved in regional innovation systems knowledge locations and cluster development

Manufacturing in the New Urban Economy Willem van Winden, Leo van den Berg, Luis Carvalho, Erwin van Tuijl, 2010-10-04 This book looks at the changing link between manufacturing and knowledge based activities in urban regions drawing on insights from organization studies and regional economics and looking at case studies in Europe South America and Asia

Smaller Cities in a World of Competitiveness Peter Karl Kresl, Daniele Ietri, 2016-04-28 Much recent research in Urban Studies has concentrated on the notion of the global city but discussion has also covered a larger set of mega cities with populations in excess of 10 million This analysis has begged the question of the optimal size for a city is larger always better Smaller Cities explores the advantages and disadvantages of different sized cities trying to determine their place in the global economy and hierarchy How can smaller cities gain or retain their competitiveness in a world of large cities In a globalized world the nation has perhaps been diminished as an economic actor with fiscal shortcomings and political gridlock leaving cities more or less on their own in the task of enhancing their competitiveness and improving the economic lives of their residents This book argues that smaller cities of varying population can be important actors in competitiveness and aims to bring attention to an area often overlooked by researchers In short are Pittsburgh San Diego and Austin less competitive than London and Mumbai This volume will be of interest to students researchers and city professionals who work in urban economy and urban geography
