Regression Analysis A Constructive Critique:

Regression Analysis Richard A. Berk, 2003-07-17 Berk has incisively identified the various strains of regression abuse and suggests practical steps for researchers who desire to do good social science while avoiding such errors Peter H Rossi University of Massachusetts Amherst I have been waiting for a book like this for some time Practitioners especially those doing applied work will have much to gain from Berk's volume regardless of their level of statistical sophistication Graduate students in sociology education public policy and any number of similar fields should also use it It will also be a useful foil for conventional texts for the teaching of the regression model I plan to use it for my students as a text and hope others will do the same Herbert Smith Professor of Demography Sociology University of Pennsylvania Regression is often applied to questions for which it is ill equipped to answer As a formal matter conventional regression analysis does nothing more than produce from a data set a collection of conditional means and conditional variances The problem though is that researchers typically want more they want tests confidence intervals and the ability to make causal claims However these capabilities require information external to that data themselves and too often that information makes implausible demands on how nature is supposed to function Convenience samples are treated as if they are random samples Causal status is given to predictors that cannot be manipulated Disturbance terms are assumed to behave not as nature might produce them but as required by the model Regression Analysis A Constructive Critique identifies a wide variety of problems with regression analysis as it is commonly used and then provides a number of ways in which practice could be improved Regression is most useful for data reduction leading to relatively simple but rich and precise descriptions of patterns in a data set The emphasis on description provides readers with an insightful rethinking from the ground up of what regression analysis can do so that readers can better match regression analysis with useful empirical questions and improved policy related research An interesting and lively text rich in practical wisdom written for people who do empirical work in the social sciences and their graduate students David A Freedman Professor of Statistics University of California Berkeley [Interrogating Illiberal Peace in Eurasia](#) Catherine Owen, Shairbek Juraev, David Lewis, Nick Megoran, John Heathershaw, 2018-01-09 The collapse of the USSR wrought dramatic changes in Eurasia both in terms of the structure of state power within the region and the ways in which Western states and international organisations engaged with it Analyses of conflict in this region remain rooted in supposed global models often assuming that patterns of state failure are due to resistance to the liberal model of peacebuilding This book sets out a challenge to these assumptions and framings It not only questions but resolutely dismisses the notion that the peacebuilding methods favoured by Western states remain the most salient in Eurasia Instead it develops a framework that seeks to conceptualise the ways in which non liberal actors contest or transform globally promoted norms of conflict management and promote alternative ones in their place Authoritarian Conflict Management ACM consists of an ensemble of norms and practices in which non liberal actors attempt to exert sustained hegemonic control over the local

discursive economic and spatial realms in a given territory With case studies ranging from Afghanistan to Uzbekistan Xinjiang to the Caucasus the chapters shed light on the ways in which local and regional actors enact practice of ACM in order to impose stability in conflict prone localities thereby challenging the Western led consensus known as the liberal peace

Making Sense of Statistical Methods in Social Research Keming Yang, 2010-03-25 Making Sense of Statistical Methods in Social Research is a critical introduction to the use of statistical methods in social research It provides a unique approach to statistics that concentrates on helping social researchers think about the conceptual basis for the statistical methods they re using Whereas other statistical methods books instruct students in how to get through the statistics based elements of their chosen course with as little mathematical knowledge as possible this book aims to improve students statistical literacy with the ultimate goal of turning them into competent researchers Making Sense of Statistical Methods in Social Research contains careful discussion of the conceptual foundation of statistical methods specifying what questions they can or cannot answer The logic of each statistical method or procedure is explained drawing on the historical development of the method existing publications that apply the method and methodological discussions Statistical techniques and procedures are presented not for the purpose of showing how to produce statistics with certain software packages but as a way of illuminating the underlying logic behind the symbols The limited statistical knowledge that students gain from straight forward how to books makes it very hard for students to move beyond introductory statistics courses to postgraduate study and research This book should help to bridge this gap

Dangerous Trade Jennifer Erickson, 2015-05-19 The United Nations s groundbreaking Arms Trade Treaty ATT which went into effect in 2014 sets legally binding standards to regulate global arms exports and reflects the growing concerns toward the significant role that small and major conventional arms play in perpetuating human rights violations conflict and societal instability worldwide Many countries that once staunchly opposed shared export controls and their perceived threat to political and economic autonomy are now beginning to embrace numerous agreements such as the ATT and the EU Code of Conduct Jennifer L Erickson explores the reasons top arms exporting democracies have put aside past sovereignty security and economic worries in favor of humanitarian arms transfer controls and she follows the early effects of this about face on export practice She begins with a brief history of failed arms export control initiatives and then tracks arms transfer trends over time Pinpointing the normative shifts in the 1990s that put humanitarian arms control on the table she reveals that these states committed to these policies out of concern for their international reputations She also highlights how arms trade scandals threaten domestic reputations and thus help improve compliance Using statistical data and interviews conducted in France Germany Belgium the United Kingdom and the United States Erickson challenges existing IR theories of state behavior while providing insight into the role of reputation as a social mechanism and the importance of government transparency and accountability in generating compliance with new norms and rules

Braverman Readings in Machine Learning. Key Ideas from Inception to Current State Lev Rozonoer, Boris Mirkin, Ilya Muchnik, 2018-08-30 This state of the art survey is dedicated to the memory of Emmanuil Markovich Braverman 1931 1977 a pioneer in developing machine learning theory The 12 revised full papers and 4 short papers included in this volume were presented at the conference Braverman Readings in Machine Learning Key Ideas from Inception to Current State held in Boston MA USA in April 2017 commemorating the 40th anniversary of Emmanuil Braverman s decease The papers present an overview of some of Braverman s ideas and approaches The collection is divided in three parts The first part bridges the past and the present and covers the concept of kernel function and its application to signal and image analysis as well as clustering The second part presents a set of extensions of Braverman s work to issues of current interest both in theory and applications of machine learning The third part includes short essays by a friend a student and a colleague

How to Make Sense of Statistics Stephen Gorard, 2021-02-10 In a new textbook designed for students new to statistics and social data Stephen Gorard focuses on non inferential statistics as a basis to ensure students have basic statistical literacy Understanding why we have to learn statistics and seeing the links between the numbers and real life is a crucial starting point Using engaging friendly approachable language this book will demystify numbers from the outset explaining exactly how they can be used as tools to understand the relationships between variables This text assumes no previous mathematical or statistical knowledge taking the reader through each basic technique with step by step advice worked examples and exercises Using non inferential techniques students learn the foundations that underpin all statistical analysis and will learn from the ground up how to produce theoretically and empirically informed statistical results

When Crime Appears Jean McGloin, Christopher Sullivan, Leslie Kennedy, 2011-10-19 In recent years the idea of emergence which suggests that observed patterns in behavior and events are not fully reductive and stem from complex lower level interactions has begun to take hold in the social sciences Criminologists have started to use this framework to improve our general understanding of the etiology of crime and criminal behavior When Crime Appears The Role of Emergence is concerned with our ability to make sense of the complex underpinnings of the end stage patterns and events that we see in studying crime and offers an early narrative on the concept of emergence as it pertains to criminological research Collectively the chapters in this volume provide a sense of why the emergence framework could be useful outlines its core conceptual properties provides some examples of its potential

application and presents some discussion of methodological and analytic issues related to its adoption *International Encyclopedia of Statistical Science* Miodrag Lovric, 2025-06-19 The International Encyclopedia of Statistical Science stands as a monumental effort to enrich statistics education globally particularly in regions facing educational challenges By amalgamating the expertise of over 700 authors from 110 countries including Nobel Laureates and presidents of statistical societies it offers an unparalleled resource for readers worldwide This encyclopedia is not just a collection of entries it is a concerted effort to revive statistics as a vibrant critical field of study and application Providing a comprehensive and accessible account of statistical terms methods and applications it enables readers to gain a quick insight into the subject regardless of their background This work serves to refresh and expand the knowledge of researchers managers and practitioners highlighting the relevance and applicability of statistics across various fields from economics and business to healthcare and public policy Furthermore it aims to inspire students by demonstrating the significance of statistics in solving real world problems thus encouraging a new generation to explore and contribute to the field *Technology-focused Acquisitions* Jan Paul Stein, 2017-07-24 Technology focused acquisitions are an important complement to the firm's internal product development efforts There is considerable heterogeneity when comparing individual technology focused acquisitions especially with respect to acquisition timing and the deal value To resolve some of this heterogeneity the author introduces the novel distinction between performance and functionality focused acquisitions He characterizes this distinction based on a theoretical analysis a qualitative study and turns to a sample of acquisitions in the field of artificial intelligence for the quantitative study There are two key findings First performance focused acquisitions take place earlier in a target's life cycle than functionality focused ones Second the deal value is at a comparable stage in a target's life cycle higher for performance focused acquisitions This thesis is relevant for management scholars and managers alike Scholars learn about the implications of the distinction between performance and functionality focused acquisitions on markets for technology Managers gain insights into how this distinction may guide their strategic decision making
