Regulation in the US

GMOs are regulated pursuant to health, safety, and environmental legislation governing conventional products. The US approach to regulating GMOs is premised on the assumption that regulation should focus on the nature of the products, rather than the process in which they were produced.

- FDA regulates the safety of all human and animal food products in the US (other than meat, poultry, and eggs), as well as drugs and biological products;
- EPA regulates pesticides and microorganisms developed through genetic engineering.
