Wankhade, Balaji Dabade, 2010-06-16 It has been observed that the studies of quality are pursued in various disciplines like economics quality management and marketing science and are seen isolated The treatments imparted to these studies are also different and has the backdrop of discipline in which the work has been pursued The nature of isolation is equally seen when quality uncertainty and perceived quality were pursued separately without showing any inkling that these can be complimentary Economist and Nobel Laureate Akerlof 1970 wrote a seminal piece The market for lemons quality uncertainty and market mechanism where he described quality uncertainty due to information asymmetry It refers to the fact that a party in a transaction may have more information than the other This is information asymmetry If the seller has more information than the buyer about the product quality he she may sell it as if it is a high quality product In reality it could be a low quality product The buyer does not have the information regarding the quality of the offered product The market condition that led to this transaction is quality uncertainty due to information asymmetry **Condition Monitoring and Maintenance**

Total Productive Maintenance For Organisational Effectiveness Aftab Ahmad Niazi, 2014-01-01 Rising costs domestic and international competition more demanding customers increasingly complex machines require safe uninterrupted operation consistent quality competitive pricing and timely deliveries Most effective operation and maintenance of machines and equipment assumes far greater importance in this situation While it is true that no one including various levels of management and workers want conflict loss of time due to breakdowns poor quality and accidents these continue to occur Top Management sometimes takes some initiatives like inviting consultants or getting people trained in specified areas However by and large the situation remains the same The reason therefore is not lack of desire to do well The fundamental malice is in the system of management It is this aspect that this book tries to address while also discussing some basic principles of maintenance It focuses on need and measures for enhancing effectiveness of the organization by evolving and implementing fundamental changes in managerial philosophy and practices Choice of the title of the book is very deliberate The whole approach discussed in the book is directed towards building a system and climate that would enable ensuring most effective operation and maintenance of capital equipment while also developing a collaborative and co

ordinated functioning of various wings and levels in the organization Far too often people concerned want and try to achieve results like no breakdowns no rejects and no accidents quickly This book attempts to convey to them that quick fixes and quick results are not possible and that concentrated and committed effort is required over a long period of time to create conditions and environment for results It is in this context that while the book discusses various approaches to maintenance and describes some elementary techniques for planning it lays emphasis on the need for a change in management thinking and on involvement of all from top to the lowest for achieving desired results
