Religion In Primitive Cultures A Study In Ethnophilosophy:

Religion in Primitive Cultures Wilhelm Dupré, 2011-10-10 Since its founding by Jacques Waardenburg in 1971 *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include among others: category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. **Religion in Primitive Cultures** Wilhelm Dupré, 1975. **The Notion of "religion" in Comparative Research** Ugo Bianchi, 1994. Nel 1990 si tenne a Roma il XVI Congresso del I A H R che ebbe come tema la nozione di religione. Venne particolarmente analizzato l'uso di tale termine da parte degli studiosi di lingua europea nei rapporti con le culture non europee e viceversa. *The Study of Religion and its Meaning* J.E. Barnhart, 2011-11-21. Since its founding by Jacques Waardenburg in 1971 *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include among others: category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. **Also a History of Philosophy, Volume 1** Jürgen Habermas, 2023-08-23. This is the first volume of a ground-breaking new work by Jürgen Habermas on the history of philosophy. In this major new work Habermas sets out the ideas that inform his systematic account of the history of Western philosophy as a genealogy of postmetaphysical thinking. His account goes far beyond a vindication of the enduring relevance of philosophical reflection founded on communicative reason as a source of orientation in the modern world. He contrasts this conception with prominent diagnoses of the supposed crisis of Enlightenment reason and culture that seeks redemption in the affirmation of traditional religious authority. Schmitt the timeless validity of Greek metaphysics. Strauss a numinous conception of nature. Levinas an occurrence of being that speaks to us from beyond the mists of pre-Socratic thought. Heidegger. Habermas situates Western philosophy in relation to traditions of thought founded in the major worldviews: Judaism, Buddhism, Confucianism and Taoism that continue to shape contemporary culture and civilization. At the same time he lays the groundwork for his analysis in the later volumes of the constitutive role played by the discourse on faith and knowledge in the development of Western philosophy which is the result of the unique symbiosis that Christianity entered into with Greek thought with the Christianization of the Roman Empire. Far from raising claims to exclusivity, completeness or closure, Habermas's history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come. **A Primal Perspective on the Philosophy of Religion** Arvind Sharma, 2006-09-09. What am I trying to accomplish through the exercise which I have undertaken, namely to examine the philosophy of religion in the light of primal religions? If I choose

someone else's expression to characterize one's own intellectual endeavour is an indication of one's own lack of imagination then I must plead guilty to that charge but not to that of lack of gratitude for I have to thank Robin Horton for describing better than I can what I have attempted in the book It is an exercise in what he calls translational understanding I quote him now By translational understanding I mean the kind of understanding of a particular thought system that results from the successful translation of the language and conceptual system that embody it into terms of a language and conceptual system that currently enjoy world status In talking of translation of course I am not just talking of the provision of dictionary equivalents for individual words or sentences I am talking about finding a world language equivalent for a whole realm of discourse and of showing in world language terms what the point of that realm of discourse is in the life of the people who use it Translation in this broader sense can be very arduous There may be no realm of discourse in the world language that exactly fits the bill We may have to bend and refashion existing realms and even redefine their guiding intentions
