The Religious and Romantic Origins of Psychoanalysis Suzanne R. Kirschner, 1996-02-23 In this book Suzanne Kirschner traces the origins of contemporary psychoanalysis back to the foundations of Judaeo Christian culture and challenges the prevailing view that modern theories of the self mark a radical break with religious and cultural tradition Instead she argues they offer an account of human development which has its beginnings in biblical theology and neoplatonic mysticism Drawing on a wide range of religious literary philosophical and anthropological sources Dr Kirschner demonstrates that current Anglo American psychoanalytic theories are but the latest version of a narrative that has been progressively secularized over the course of nearly two millennia She displays a deep understanding of psychoanalytic theories while at the same time raising provocative questions about their status as knowledge and as science

Human Development and Faith (Second Edition) Felicity B. Kelcourse, 2015-07-28 This book now in its second edition brings together the best available understandings of human development from a multidisciplinary perspective Uniquely inclusive of the moral and faith dimensions of context and life cycle development Human Development and Faith examines the interplay of mind body family community and soul at every stage of development It addresses two central questions What are the good enough conditions of parenting family and community in each phase of life from birth to death which support growth and

development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface

Towards a Christian Literary Theory L. Ferretter, 2002-12-17 Most modern literary theory is explicitly anti theological This book states the case for a contemporary literary theory whose principles derive from Christian theology Ferretter argues that it remains rationally and ethically legitimate to use theological language in literary theory despite the objections to such a theory posed by deconstruction Marxism and psychoanalysis He concludes with an assessment of how such a theory can be formulated and used in contemporary cultural analysis
