Remaking The Body Explorations In Embodiment:

Remaking the Body Wendy Seymour,2012-11-12 In *Remaking the Body* Wendy Seymour interviews men and women who have suffered profound bodily paralysis and explores how they deal with their appearance relationships sexuality incontinence and sport She finds that even major impairment hasn't annihilated these people's experience of an embodied self She shows that the process of self reconstruction is interwoven with social expectations and argues that the experience of disability highlights the continuous work involved in embodiment for everyone *Remaking the Body* is a major contribution to the field of the sociology of the body and essential reading for rehabilitation professionals and students

Remaking the Body Wendy Seymour,1995 *Remaking Humanity* Adam Beyt,2024-08-22 Drawing upon Edward Schillebeeckx's theology and Judith Butler's philosophy Adam Beyt uses the framework of nonviolent hope to construct a Catholic political theology responding to dehumanizing violence Dehumanizing violence names words institutions or acts violating the inherent dignity of being made in the image and likeness of God Theology can participate in dehumanizing violence by claiming an uninterrogated universality that marginalizes bodies due to their perceived differences such as gender race sexuality or ability The book's constructive project integrates Schillebeeckx's and Butler's thought with queer theory and phenomenology to model embodiment as an enfleshing dynamism between bodies and signification The text then posits Catholic discipleship as incarnating hope by defending the humanum the new humanity announced through God's Reign Combining reflections from Schillebeeckx and Butler this hope centers discipleship as nonviolent world building Concluding with a sustained reflection with the writings of Franz Fanon and Walter Benjamin the final chapter sketches a Catholic solidaristic response to contemporary struggles against the necropolitics of colonizing and state violence through assemblies of hope

The Sociology of the Body Kate Cregan,2006-03-31 Through a provocative analysis this book contextualizes explicates and critically analyses the work of those key theorists and texts that have been most influential in refocusing our gaze on human embodiment Upon this foundation the author builds her own distinctive theoretical framework towards the analysis of embodiment This is a valuable addition to the field of body studies Chris Shilling University of Kent Over the last 20 years the social sciences have witnessed a remarkable inter disciplinary surge of interest in the body The latter is now recognized as a core concept and is the subject of intensive study at undergraduate and postgraduate levels But how can we map this work What are the contributions and differences of the various approaches This lucid and authoritative text Provides a critical evaluation of the work of Elias Aries Foucault Bourdieu Mary Douglas Kristeva Butler Haraway and Bordo Guides the reader through the inter disciplinary influence of these ideas Gives a clear and compelling analysis of the significance of the turn towards the body Explains the complex way in which embodiment is formed across different social formations Clearly organized and powerfully expressed the book provides the best available guide to the turn to the body in the social sciences

Cosmopolitan Sexuality Ahonaa Roy, 2023-02-16 In a historic verdict the Supreme Court of India in September 2018 struck down Section 377 of the Indian Penal Code and decriminalized homosexuality and granted personal rights and freedom to the LGBTQIA community at large However in December 2018 the Transgender Persons Bill was passed in the Lok Sabha the People's House and lower house of Indian Parliament that has negated and undermined the rights of the trans community in India The Bill omits the reference to a neither male nor female formulation and covers any person whose gender does not match the gender assigned at birth as well as transmen transwomen those with intersex variations the gender queer and those who designate themselves based on socio cultural identities such as hijra aravani kinner and jogta This book articulates the ethnographic and anthropological studies of hijras eunuchs and the popular transgender culture in India through the case study of contemporary Mumbai It studies how their identity is shaped through consumption of various practices of beauty and takes into account the direct provincial dialogues as to how the hijras negotiate different spaces of surgeries clinics and medicine to shape their new forms of identity It highlights how globalizing modernity would build a concrete understanding of the way local patterns of transgender sexuality and eroticism are shaped by this sort of culture It attempts to build a more robust and complex understanding of sexual experiences among these subjects in the locale thus projecting the intersection of local meanings of transgender eroticism that intersect global patterns of similar identities with their desire and sexuality The local specificity of the hijra sexual economy relates to global transgender practices thus proposing a nuanced discourse of space culture and sexuality to the local context of the globalized and modernized India instead of the articulation of global homogeneity of transgender identities

Reading Embodied Citizenship Emily Russell, 2011-02-25 Liberal individualism a foundational concept of American

politics assumes an essentially homogeneous population of independent citizens. When confronted with physical disability and the contradiction of seemingly unruly bodies, however, the public searches for a story that can make sense of the difference. The narrative that ensues makes abnormality an important part of the dialogue about what a genuine citizen is, though its role is concealed as an exception to the rule of individuality rather than a defining difference. Reading *Embodied Citizenship* brings disability to the forefront, illuminating its role in constituting what counts as U.S. citizenship. Drawing from major figures in American literature, including Mark Twain, Flannery O'Connor, Carson McCullers, and David Foster Wallace, as well as introducing texts from the emerging canon of disability studies, Emily Russell demonstrates the place of disability at the core of American ideals. The narratives prompted by the encounter between physical difference and the body politic require a new understanding of embodiment as a necessary conjunction of physical, textual, and social bodies. Russell examines literature to explore and unsettle long-held assumptions about American citizenship.

Being and Dwelling through Tourism Catherine Palmer, 2017-11-06. Much of the existing literature seeks to make sense of tourism based on singular approaches such as visibility, identity, mobility, performance, and globalised consumption. What is missing, however, is an overarching framework within which these valuable approaches can be located. This book offers one such framework using the concept of dwelling, taken from Heidegger and Ingold, as the starting point from which to consider the interrelatedness of being, dwelling, and tourism. The anthropological focus at the core of the book is infused with multidisciplinary perspectives that draw on a variety of subjects, including philosophy, material cultural studies, and cultural geography. The main themes include sensuous, material, architectural, and earthly dwelling, and each chapter features a discussion of the unifying theoretical framework for each theme, followed by an illustrative focus on specific aspects of tourism. This theoretically substantive book will be of interest to anyone involved with tourism research from a wide range of disciplines, including anthropology, sociology, geography, cultural studies, leisure studies, and tourist studies.

Remaking the Human Alvaro Jarrín, Chiara Pussetti, 2021-04-01. The technological capacity to transform biology, repairing, reshaping, and replacing body parts, chemicals, and functions is now part of our lives. Humanity is confronted with a variety of affordable and non-invasive enhancement technologies: anti-ageing, medicine, aesthetic surgery, cognitive and sexual enhancers, lifestyle drugs, prosthetics, and hormone supplements. This collection focuses on why people find these practices so seductive and provides ethnographic insights into people's motives and aspirations as they embrace or reject enhancement technologies, which are closely entangled with negotiations over gender, class, age, nationality, and ethnicity.

Embodied Experiences of Making in Early Modern Europe Sarah A. Bendall, Serena Dyer, 2025-10-01. Processes of making in early modern Europe were both tacit and embodied. Whether making pottery, food, or textiles, the processes of manual production rested on an intersensory connection between mind, body, and object. This volume focuses on the body of the maker to ask how processes of making, experimenting, experiencing, and reconstructing illuminate early modern assumptions and understandings around manual labour and

material life Answers can be gleaned through both recapturing past skills and knowledge of making and by reconstructing past bodies and bodily experiences using recreative and experimental approaches In drawing attention to the body this collection underlines the importance of embodied knowledge and sensory experiences associated with the making practices of historically marginalised groups such as craftspeople women domestic servants and those who were colonised to confront biases in the written archive The history of making is found not only in technological and economic innovations which drove progress but also in the hands minds and creations of makers themselves First interdisciplinary collection of essays to Synthesise experimental history approaches used to investigate a wide range of objects dress cosmetics cooking and art and their makers or wearers in the early modern period Demonstrate how attention to objects and making in both historical and modern experimental contexts can uncover knowledge of embodied and gendered experiences that are otherwise difficult to access Contributes to the recently termed making and embodied turns in history **The Cultural Politics of the**
