Remaking Eden Harry Griffin,Pam Skelton,James McLean,John Haldane,1998 Remaking Eden Lee M. Silver,1998 A leading geneticist explores the brave new world of baby making in an age that looks onward from IVF and surrogacy to human clones and genetic engineering Lee Silver explains the science of embryology explores what science can and will be able to do to affect the natural processes and through a series of individual stories both contemporary and imagined from the future looks at the moral ethical and legal implications Who Gives a Gigabyte? Gary Stix,Miriam Lacob,1999-03-15 An exhilarating chronicle of the most revolutionary advancements in recent and future technology Which new technologies are bound to have the biggest impact on our lives in the years ahead This groundbreaking book looks at the latest technological superstars destined to reshape the upcoming century and offers easy to understand engaging explanations of what they are how they work and how they will affect our lives Written by a senior editor of Scientific American the world s premier science magazine and based on in depth interviews with today s leading innovators as well as extensive research of the latest scientific literature Who Gives a Gigabyte takes you on a fast paced tour into the brave new world of gene therapy quantum computation designer drugs and recyclable cars Surveying the wide range of technological wonders the authors investigate such diverse realms of scientific advancement as computing telecommunications laser beams bioengineering materials and alternative energy sources From the Human Genome Project which aims to spell out every letter of our genetic inheritance to the implications of altering genes in important agricultural projects to new strategies for attacking malignant cancer cells without the damaging side effects of traditional treatments to the startling but still unsuccessful attempts to make computer software more like the human mind Who Gives a Gigabyte demystifies the technology of today and provides an enlightening glimpse into the limitless possibilities of tomorrow An enjoyable and rewarding book Choice An informative overview of new and emerging technologies Booklist The reward for the reader is a solid grounding in technological literacy Scientific American *Blood Evidence* Henry Lee, Frank Tirnady,2003-04-17 Uses case studies to examine how investigators collect genetic evidence and discusses how DNA has altered crime solving and the court system as well as the ethical ramifications of cloning genetic modification and the death penalty **Transhumanist Dreams and Dystopian Nightmares** Maxwell J. Mehlman,2012-10-01 What will happen when technology allows us to direct our own evolution Transhumanists advocate for the development and distribution of technologies that will enhance human intellectual physical and psychological capacities even eliminate aging What if the dystopian futures and transhumanist utopias found in the pages of science journals Margaret Atwood novels films like Gattaca and television shows like Dark Angel are realized What kind of world would humans have created Maxwell J Mehlman considers the promises and perils of using genetic engineering in an effort to direct the future course of human evolution He addresses scientific and ethical issues without choosing sides in the dispute between transhumanists and their challengers However Transhumanist Dreams and Dystopian Nightmares reveals that

radical forms of genetic engineering could become a reality much sooner than many people think and that we need to encourage risk management efforts Whether scientists are dubious or optimistic about the prospects for directed evolution they tend to agree on two things First however long it takes to perfect the necessary technology it is inevitable that humans will attempt to control their evolutionary future and second in the process of learning how to direct evolution we are bound to make mistakes Our responsibility is to learn how to balance innovation with caution Biotechnology Sean D.

on the Highways of Human 'Progress' Lukman Harees,2012-01-16 The Modern Man is hypocritically boasting of unprecedented material progress in a world where inter alia millions daily go to bed hungry die or get killed through unwanted wars and preventable causes live in inhumane conditions vulnerable being exploited with ever widening inequality and might still ruling over right in international relations even in the post UDHR era an indictment on the collective conscience of mankind Besides the flame of materialism has been devouring time tested moral values causing chaos within the basic unit in society the family and relegating Man and his dignity to the level of animals and even manipulating his identity Therefore questions arise Is Moral law fading are political economic systems and institutions like UN failing in realizing the lofty goal of affording due dignity basic rights and social justice humanity deserves Can the bystanders be mere

onlookers anymore This book seeks to dispassionately survey the yawning gap between the rhetoric and the ground reality in bringing about dignity and social justice for humanity from bystanders perspective in the light of these questions and underlines the imperative need for moral progress to go hand in hand to make Man assume his due role as the trustee on earth It also exhorts bystanders to close ranks as human dignity champions rights defenders identity protectors against onslaughts from power hungry politicians mighty powers and vested interests This is the need of the times and what our future progeny demands

Genetics and Society Anne Kerr,2004-06-24 Genetics and Society looks at the history of genetic science and the wide ranging impact it has had on contemporary society using fascinating and cutting edge examples throughout

Our Posthuman Future Francis Fukuyama,2017-06-15 Is a baby whose personality has been chosen from a gene supermarket still a human If we choose what we create what happens to morality Is this the end of human nature The dramatic advances in DNA technology over the last few years are the stuff of science fiction It is now not only possible to clone human beings it is happening For the first time since the creation of the earth four billion years ago or the emergence of mankind 10 million years ago people will be able to choose their children s sex height colour personality traits and intelligence It will even be possible to create superhumans by mixing human genes with those of other animals for extra strength or longevity But is this desirable What are the moral and political consequences Will it mean anything to talk about human nature any more Is this the end of human beings Our Posthuman Future is a passionate analysis of the greatest political and moral problem ever to face the human race

The New Genetics and The Public's Health Robin Bunton,Alan Petersen,2002-09-11 The rapid advancement of genetic science fuelled by the Human Genome Project and other related initiatives promises a new kind of public health practice based on the pre detection of disease according to calculations of genetic risk This book by two well known sociologists explores the implications of the new genetics for public health as a body of knowledge and a domain of practice assesses the impact of new genetic information and technologies on conceptions of health illness embodiment self and citizenship critically examines the complex discourses surrounding human genetics and public health The New Genetics and The Public s Health addresses the emerging social and political consequences of the new genetics and provides a stimulating critique of current research and practice in public health

Taking Biology Seriously Inmaculada de Melo-Martín,2005 Inmaculada de Melo Martin carefully defend the importance of social and political policies to guide the bio ethical co construction of a better life for all As she argues with edifying balance only by taking biology seriously can we become serious in appreciating its true benefits and counter the illusory hopes and fears that are often projected upon it Carl Mitcham Colorado School of Mines
