

English Bill of Rights

- The Rights of Englishmen were derived from the Magna Carta and verified in the Glorious Revolution of 1688. Essentially, the English parliament, in offering the throne to William of Orange in 1688, demanded that the king approve a bill of rights for all Englishmen, which became known as the English Bill of Rights in 1689. These rights included the following:
- No cruel punishment
- Right to bear arms
- There was freedom of speech in parliament.
- Bail was not to be excessive.
- Right to petition

Rights From The Sea:

Historic Waters and Historic Rights in the Law of the Sea Clive R. Symmons, 2019-03-27 The issue of historic rights and historic waters has long been a problematic area in the law of the sea where even basic definitions have been vague and interchangeably used in the past The first edition of this book was entitled *Historic Waters in the Law of the Sea A Modern Re Appraisal* and concentrated as the title implies on the doctrine of historic waters The title of this expanded new edition has been broadened to take account of the important clarifications as to the doctrine of historic maritime claims generally particularly historic rights in the narrow sense which fall short of sovereignty claims These latter rights such as they now are are discussed in depth in the new text This development has come about of course because of the Award of the Arbitral Tribunal in Philippines v China in 2016 This decision has for the first time in a judicial setting rationalised the terminology in this area of the law of the sea and most importantly has clarified the close interaction of historic rights with the Law of the Sea Convention This new edition discusses the latter issue passim showing that much of the former customary law doctrine has now been overridden by the Convention *Freedom of Seas, Passage Rights and the 1982 Law of the Sea Convention* Myron H. Nordquist, Tommy Koh, John Norton Moore, 2009-02-28 Freedom of the seas and passage rights is a highly topical subject for the international community that cuts across a broad spectrum of scholarly disciplines and maritime operations The contents of the book include in depth analysis of current international and regional approaches to freedom of navigation transit passage through straits used for international navigation archipelagic sea lanes passage scientific research and hydrographic surveys in the Exclusive Economic Zone EEZ military surveys in the EEZ as well as vessel source pollution and protection of the marine environment Many of the chapters describe measures in place at multilateral and regional levels to improve information sharing and operational coordination This collection will especially appeal to those concerned with freedom of the seas and passage rights The CD accompanying the volume includes important documents such as the UN Convention on the Law of the Sea as well many PowerPoint presentations delivered at the conference It also includes a draft index to the multi volume series United Nations Convention on the Law of the Sea 1982 A Commentary This book contains the edited papers and associated documents from the 32nd annual Virginia conference held in Singapore January 9 10 2008 Presentations were delivered by government officials senior naval and coast guard commanders as well as by leading jurists and academics with impressive expertise in the law of the sea *Navigational Rights and Freedoms and the New Law of the Sea* Donald R. Rothwell, Sam Bateman, 2021-10-18 Navigational rights and freedoms have been central to the development of the law of the sea since the original debates over whether the seas were open or closed to maritime traffic The 1982 UN Convention on the Law of the Sea recognises the legitimate rights of coastal states to proclaim sovereignty and assert jurisdiction over vast areas of maritime space In return maritime states are given a range of navigational rights over waters ranging from the territorial sea through to the high sea The new regime of the law of the sea created by the Convention

presents an opportunity to review developments in the law of navigational rights and freedoms This book assesses the navigational regime established by the 1982 Convention with emphasis given to the continuing importance of the freedom of the seas Navigation in the territorial sea and international straits is reviewed especially in the Straits of Malacca and Singapore and the Torres Strait Archipelagic navigation from the perspective of two claimant states Indonesia and the Philippines and a user state South Korea is also considered The interaction of environmental concerns with navigational rights is an important feature of the current law of the sea regime with relevant conventions assessed and the role of the International Maritime Organization in developing navigational standards considered Both European and Canadian practice in the protection of sensitive marine environments and the impact upon navigational rights is also considered Finally the roles of the International Tribunal for the Law of the Sea and the International Maritime Organization in dispute resolution are reviewed before a concluding consideration of the future for navigational rights and freedoms in the twenty first century

To Protect Rights of United States Vessels on High Seas United States. Congress. House. Committee on Merchant Marine and Fisheries,1954 *The Law of the Sea* Nele Matz-Lück,Øystein Jensen,Elise Johansen,2022-09-19 The United Nations Convention on the Law of the Sea follows a comprehensive approach and can be interpreted dynamically to include the regulation of all potential human uses of the ocean but the law of the sea cannot be viewed in isolation from other fields of international law International law does not resemble a hierarchically structured legal system its different parts interact when different rules address the same activity or situation The academic discussion concerning the specialization and proliferation of international legal rules and dispute settlement bodies has theoretical as well as practical relevance for the law of the sea and its interaction with other parts of international law The intensified use of the oceans for different purposes and the ongoing proliferation of international rules addressing different activities from different perspectives and with distinct foci require a more thorough evaluation of how the law of the sea relates to other fields of international law how the normative context can be approached theoretically and if interdisciplinary interfaces can be adequately addressed This book discusses the normative context of the law of the sea and the interactions of the law of the sea with other legal regimes By connecting high quality research with new ideas and perspectives this book offers expertise from different fields and perspectives in which the interaction between the law of the sea and other fields of international law becomes particularly relevant **Border Deaths at Sea under the Right to Life in the European Convention on Human Rights** Lisa-Marie Komp,2022-11-17 This book focuses on border deaths at sea It unravels how the interplay of the law of the sea and rules on jurisdiction widen the opportunity for states to make and enforce rules outside their territory and questions whether this is also accompanied with an obligation to respect the right to life under the European Convention on Human Rights ECHR when doing so By embarking upon the challenge of analysing a cross border phenomenon in which direct encounters between state agents and the victims are few through the lens of legal obligations the book unearths avenues for arguing

that the ECHR is applicable to border deaths on the high seas and showcases the Court's creativity in bridging the gap between the Convention and people in need of protection. Furthermore, it demonstrates that the ECHR is applicable to border deaths occurring within the territorial seas of states. It discusses the right to life as well as the specific obligations of states in respect to border deaths at sea and demonstrates that in many instances EU policies fall short of the standards set under the right to life. This book will be of key interest to scholars, students, and practitioners in migrant rights, international human rights law, public international law, including refugee and migration law, maritime law, and security studies.

Aboriginal Customary Law: A Source of Common Law Title to Land Ulla Secher, 2014-12-01. Described as ground breaking in Kent McNeil's Foreword, this book develops an alternative approach to conventional Aboriginal title doctrine. It explains that aboriginal customary law can be a source of common law title to land in former British colonies, whether they were acquired by settlement or by conquest or cession from another colonising power. The doctrine of Common Law Aboriginal Customary Title provides a coherent approach to the source, content, proof, and protection of Aboriginal land rights, which overcomes problems arising from the law as currently understood and leads to more just results. The doctrine's applicability in Australia, Canada, and South Africa is specifically demonstrated. While the jurisprudential underpinnings for the doctrine are consistent with fundamental common law principles, the author explains that the Australian High Court's decision in *Mabo* provides a broader basis for the doctrine, a broader basis which is consistent with a re-evaluation of case law from former British colonies in Africa, as well as from the United States, New Zealand, and Canada. In this context, the book proffers a reconceptualisation of the Crown's title to land in former colonies and a reassessment of conventional doctrines, including the doctrine of tenure and the doctrine of continuity. With rare exceptions, the existing literature does not probe as deeply or question fundamental assumptions as thoroughly as Dr Secher does in her research. She goes to the root of the conceptual problems around the legal nature of Indigenous land rights and their vulnerability to extinguishment in the former colonial empire of the Crown. This book is a formidable contribution that I expect will be influential in shifting legal thinking on Indigenous land rights in progressive new directions. Legal Language and the Sea Mary C. Lavissière, Audrey Cartron, Laurent Gautier, 2025-08-04. While maritime law and law of the sea are highly researched domains of law, there are few studies about the language associated with these fields. In a global society that is increasingly impacted by environmental, health, social, humanitarian, and political crises that partly unfold on the sea, this volume unites legal scholars and linguists who work on the language of these fields. The book includes chapters that focus on macro levels of linguistic analyses, e.g. discourse and genre analysis, and micro levels, e.g. terminology, as well as translation. Several languages for maritime legal purposes are studied, including English, French, and Chinese.
