Scott, 2013-07-17 The 1864 Sand Creek Massacre is one of the most disturbing and controversial events in American history While its historical significance is undisputed the exact location of the massacre has been less clear Because the site is sacred ground for Cheyenne and Arapaho Indians the question of its location is more than academic it is intensely personal and spiritual In 1998 the National Park Service under congressional direction began a research program to verify the location of the Sand Creek site The team consisted of tribal members Park Service staff and volunteers and local landowners In Finding Sand Creek the project's leading historian Jerome A. Greene and its leading archeologist Douglas D. Scott tell the story of how this dedicated group of people used a variety of methods to pinpoint the site Drawing on oral histories written records and archeological fieldwork Greene and Scott present a wealth of evidence to verify their conclusions Greene and Scott's team study led to legislation in the year 2000 that established the Sand Creek Massacre National Historic Site *Deaccessioning and Its Discontents* Martin Gammon, 2018-07-24 The first history of the deaccession of objects from museum collections that defends deaccession as an essential component of museum practice Museums often stir controversy when they deaccession works formally remove objects from permanent collections with some critics accusing them of betraying civic virtue and the public trust In fact Martin Gammon argues in *Deaccessioning and Its Discontents* deaccession has been an essential component of the museum experiment for centuries Gammon offers the first critical history of deaccessioning by museums from the seventeenth to the twenty-first century and exposes the hyperbolic extremes of deaccession denial the assumption that deaccession is always wrong and deaccession apology when museums justify deaccession by finding some fault in the object as symptoms of the same misunderstanding of the role of deaccessions in proper museum practice He chronicles a series of deaccession events in Britain and the United States that range from the disastrous to the beneficial and proposes a typology of principles to guide future deaccessions Gammon describes the liquidation of the British Royal Collections after Charles I's execution when masterworks were used as barter to pay the king's unpaid bills as establishing a precedent for future deaccessions He recounts among other episodes U.S. Civil War veterans who tried to reclaim their severed limbs from museum displays the 1972 Hoving affair when the Metropolitan Museum of Art sold a number of works to pay for a Velázquez portrait and Brandeis University's decision later reversed to close its Rose Art
