Rise Of Free Trade Imperialism The Empire Of Free Trade And Imperialism 1750 185:

The Rise of Free Trade Imperialism Bernard Semmel, 2004-02-05 The Rise of Free Trade Imperialism seeks to uncover some of the intellectual origins of the imperialism of the classic period the sources from which later theories of imperialism were constructed and the character of the ideology which underlay the dismantling of the old colonial system and the construction of the Victorian Pax Britannica The author discusses the development and diffusion of a number of the central arguments of the science of political economy from the standpoint of a historian rather than an economist which were crucial not only to the construction of theories of capitalist imperialism but also served as a spur both to efforts at colonization and to establishing a British Workshop of the World **The Rise of Free Trade Imperialism** Bernard Semmel, 1978

Politics and Trade in Britain, 1776-1914 Gordon Bannerman, 2023-07-27 This volume explores the period between Smith's 1776 *The Wealth of Nations* and ends in the early days of the Anti Corn Law League campaign on the eve of the 1841 General Election which prominently featured contrasting commercial policy options between Conservative and Liberal parties During this period we witness the growth of free trade sentiment with opposition to monopolies like the old Chartered Companies and attempts to create more liberal bilateral commercial treaties Most importantly we see the imposition of the protectionist Corn Laws in 1815 at the behest of a Parliament largely based on the landed interest Between 1815 and 1846 the Corn Laws become the fulcrum of the entire debate on commercial policy the keystone in the arch of the protective system and slowly divisions begin to emerge throughout society and between the political parties culminating in the formation of the Anti Corn Law League and their attempt to influence politics via pressure from without The sources include printed matter such as the diaries of Lord Colchester various parliamentary papers on commercial policy printed correspondence of William Pitt Lord Melbourne Joseph Sturge periodical literature from numerous sources such as the *Eclectic Review* and *The Oriental Herald* Also included is a considerable body of newspaper material from the *Manchester Times* *Dundee Advertiser* and *The Chartist* reflective of the growing importance of the provinces and manufacturing interests in commercial and local and national politics

The Emergence of Capitalism in Early America Christopher W. Calvo, 2020-02-03 Due to the enormous influence of Adam Smith's *The Wealth of Nations* on Western liberal economics a tradition closely linked to the United States many scholars assume that early American economists were committed to Smith's ideas of free trade and small government Debunking this belief Christopher W. Calvo provides a comprehensive history of the nation's economic thought from 1790 to 1860 tracing the development of a uniquely American understanding of capitalism *The Emergence of Capitalism in Early America* shows how American economists challenged adjusted and adopted the ideas of European thinkers such as Adam Smith David Ricardo and Thomas Malthus to suit their particular interests Calvo not only explains the divisions between American free trade and the version put forward by Smith but he also discusses the sharp differences between northern and southern liberal economists Emergent capitalism fostered a dynamic discourse in early America including a homegrown

version of socialism burgeoning in antebellum industrial quarters as well as a reactionary brand of conservative economic thought circulating on slave plantations across the Old South This volume also traces the origins and rise of nineteenth century protectionism a system that Calvo views as the most authentic expression of American political economy Finally Calvo examines early Americans awkward relationship with capitalism s most complex institution finance Grounded in the economic debates Atlantic conversations political milieu and material realities of the antebellum era this book demonstrates that American thinkers fused different economic models assumptions and interests into a unique hybrid capitalist system that shaped the trajectory of the nation s economy

Henry Goulburn, 1784-1856 Brian Jenkins, 1996-03-14 Between 1812 and 1821 Goulburn worked in the War and Colonial Office where he effectively administered Britain s far flung possessions Appointed chief secretary for Ireland in 1821 a Protestant to offset a Catholic viceroy Goulburn was at the heart of the final rearguard action by the opponents of Catholic emancipation As chancellor of the exchequer for the Duke of Wellington 1828 30 and Sir Robert Peel 1841 46 he participated in such momentous decisions as Catholic emancipation and the repeal of the Corn Laws An opponent of parliamentary reform he worked closely with Peel his lifelong friend to build the Conservative Party and served as a parliamentary champion of the Established Church Jenkins examines the conservative values Goulburn held and the moral dilemma of an essentially good man who depended on the institution of slavery for his private income A modest man and a loyal lieutenant Goulburn himself allowed that he had been content to walk in the shadow of political giants This self effacement helps account for the lack of wide recognition generally given him but does not detract from his significant contribution to British history Henry Goulburn accords a remarkable politician his rightful place

The Political Economy of Mercantilism Lars Magnusson, 2015-06-12 Since the days of Adam Smith Mercantilism has been a hotly debated issue Condemned at the end of the 18th century as a false system of economic thinking and political practice it has returned paradoxically to the forefront in regard to issues such as the creation of economic growth in developing countries This concept is often used in order to depict economic thinking and economic policy in early modern Europe its meaning and content has been highly debated for over two hundred years Following on from his 1994 volume *Mercantilism The Shaping of an Economic Language* this new book from Lars Magnusson presents a more synthetic interpretation of Mercantilism not only as a theoretical system but also as a system of political economy This book incorporates samples of material from the 1994 publication alongside new material ordered in a new set of chapters and up date discussions on mercantilism up to the present day Tracing the development of a particular political economy of Mercantilism in a period of nascent state making in Western and Continental Europe from the 16th to the 18th century the book describes how European rulers regarded foreign trade and industrialisation as a means to achieve power and influence amidst international competition over trades and markets Returning to debates concerning whether Mercantilism was a system of power or of wealth Magnusson argues that it is in fact was both and that contemporaries almost without exception saw these goals as interconnected He also

emphasises that Mercantilism was an all European issue in a time of trade wars and the struggle for international power and recognition In examining these issues this book offers an unrivalled modern synthesis of Mercantilist ideas and practices

The Material of World History Tina Mai Chen,David S. Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes *Compound Containment* Dong Jung Kim,2022-03-07 When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state Scholars of great power politics have traditionally focused on examining a reigning power s military containment of a challenging power In direct contrast *Compound Containment* demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics Since economic capacity and military power are intimately linked to one another countering a challenging power requires addressing both economic and military dimensions Nonetheless this nexus of security and economy in a reigning power s response to a challenging power cannot be explained by traditional theories that dominate research in international security Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power compound by simultaneously employing restrictive economic measures Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power challenging power competition This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures *Concepts for International Law* Jean d'Aspremont,Sahib Singh, Concepts shape how we understand and participate in international legal affairs They are an important site for order struggle and change This comprehensive and authoritative volume introduces a large number of concepts that have shaped at various points in history international legal practice and thought intimates at how the many projects of international law have grappled with and influenced the world through certain concepts and introduces new concepts into the discipline *The Expansion of England*

Bill Schwarz, 2005-08-04 The organized study of history began in Britain when the Empire was at its height. Belief in the destiny of imperial England profoundly shaped the imagination of the first generation of professional historians. But with the Empire ended, do these mental habits still haunt historical explanation? Drawing on postcolonial theory in a lively mix of historical and theoretical chapters, *The Expansion of England* explores the history of the British Empire and the practice of historical enquiry itself. There are essays on Asia, Australasia, the West Indies, South Africa and Britain. Examining the sexual, racial and ethnic identities shaping the experiences of English men and women in the nineteenth century, the authors argue that habits of thought forged in the Empire still give meaning to English identities today. **Progress, Pluralism, and Politics**

David Williams, 2021-01-13 Liberal thinkers of the eighteenth and nineteenth centuries were alert to the political costs and human cruelties involved in European colonialism, but they also thought that European expansion held out progressive possibilities. In *Progress, Pluralism and Politics*, David Williams examines the colonial and anti-colonial arguments of Adam Smith, Immanuel Kant, Jeremy Bentham and L. T. Hobhouse. Williams locates their ambivalent attitude towards European conquest and colonial rule in a set of tensions between the impact of colonialism on European states, the possibilities of progress in distant and diverse places, and the relationship between universalism and cultural pluralism. In so doing, he reveals some of the central ambiguities that characterize the ways that liberal thought has dealt with the reality of an illiberal world. Of particular importance are appeals to various forms of universal history, attempts to mediate between the claims of identity and the reality of difference, and the different ways of thinking about the achievement of liberal goods in other places. Pointing to key elements in still ongoing debates within liberal states about how they should relate to illiberal places, *Progress, Pluralism and Politics* enriches the discussion on political thought and the relationship between liberalism and colonialism. **China's Development from a Global Perspective**

María Dolores Elizalde, Wang Jianlang, 2017-11-06 For a long time the idea of China as a culture and society which was voluntarily secluding itself from the rest of the world was dominant. But in reality, China has always been part of the world, just as the world has always sought to penetrate China. The relationship between China and the world was in the past sometimes smooth and at other times it was difficult, but nevertheless the bond remained alive. This collection presents an analysis of China from a global perspective within a broad temporal and spatial spectrum. It reveals the early relations established between the Roman Empire and China, the dynamics developed with the countries of the Indian Ocean, Southeast Asia and Japan, and the gradual path of Europeans and Americans towards China. The book reviews the development of diplomatic relations, the signing of agreements and alliances, and the rise and resolution of conflicts. It also analyses the forging of economic relations, the establishment of commercial exchanges, and the creation of companies, professional bodies and institutions of collaboration. *Thomas Carlyle*

John Morrow, 2007-03-10 The new and authoritative account of a key Victorian figure now in paperback format. **Settlers and the Agrarian Question**

and economy **Spheres of Influence in the Age of Imperialism** Noam Chomsky,1972 **Travel, Travel Writing, and British Political Economy** Brian P. Cooper,2021-11-10 The book draws on the history of economics literary theory and the history of science to explore how European travelers like Alexander von Humboldt and their readers circa 1750 1850 adapted the work of British political economists such as Adam Smith to help organize their observations and in turn how political economists used travelers observations in their own analyses Cooper examines journals letters books art and critical reviews to cast in sharp relief questions raised about political economy by contemporaries over the status of facts and evidence whether its principles admitted of universal application and the determination of wealth value and happiness in different societies Travelers citing T R Malthus s population principle blurred the gendered boundaries between domestic economy and British political economy as embodied in the idealized subjects domestic woman and economic man The book opens new realms in the histories of science in its analyses of debates about gender in social scientific observation Maria Edgeworth Maria Graham and Harriet Martineau observe a role associated with women and methodically interpret what they observe an act reserved in theory by men **Trade, Development, and Foreign Debt** Michael Hudson,1992 **Trade, Development, and Foreign Debt: International finance** Michael Hudson,1992 An alternative history of the major theoretical concepts that have shaped international economics since mercantilist times It shows that the policies of laissez faire and free trade adopted by institutions such as the World Bank and the IMF have had a devastating effect on developing countries leading to greater polarisation rather than to convergence The author s analysis demonstrates the importance of debunking economic orthodoxy and reassessing instead the value of protectionist and structuralist approaches to trade and development **Liberalism in Empire** Andrew Sartori,2014-07-03 While the need for a history of liberalism that goes beyond its conventional European limits is well recognized the agrarian backwaters of the British Empire might seem an unlikely place to start Yet specifically liberal preoccupations with property and freedom evolved as central to agrarian policy and politics in colonial Bengal Liberalism in Empire explores the generative crisis in understanding property s role in the constitution of a liberal polity which intersected in Bengal with a new politics of peasant independence based on practices of commodity exchange Thus the conditions for a new kind of vernacular liberalism were created Andrew Sartori s examination shows the workings of a section of liberal policy makers and agrarian leaders who insisted that norms governing agrarian social relations be premised on the property constituting powers of labor which opened a new conceptual space for appeals to both political economy and the normative significance of property It is conventional to see liberalism as traveling through the space of empire with the extension of colonial institutions and intellectual networks Sartori s focus on the Lockeanism of agrarian discourses of property however allows readers to grasp how liberalism could serve as a normative framework for both a triumphant colonial capitalism and a critique of capitalism from the standpoint of peasant property **African Historical Studies** ,1971
