F. Wideen, 2018-05-11 Originally published in 1994 The story of Hansel and Gretel is familiar to many people Most believe that the witch was wicked But has this issue ever been seriously challenged In the Introduction to this book Marvin Wideen describes the day he saw this well known fairy story being taught and through it draws us along a path of education reform in Lakeview School British Columbia and shows how by this process of reform the school changed from within He considers the ideology supporting educational change what change means to those who undertake it and how the experience relates to the larger social and political context The book effectively demonstrates that change will always create anxiety needs careful and sensitive implementation and occurs in isolation or as a result of activity within a larger context **Students Changing Schools** Cynthia Taines, 2007 **An UnCommon Theory of School Change** Kevin Fahey, Angela Breidenstein, Jacy Ippolito, Frances Hensley, 2019-04-19 This is a book for activists and educators who not only think schools need to be improved but are also fiercely committed to their reinvention and hopeful that it can be achieved *A School Changes* Jerrold E. Morris, 1979 A documented volume about what is going on in the classroom where traditional education is treated as an enemy Barriers to Change Barbara J. Falsey, 1988 This dissertation is a case study of an educational program serving low income minority students in an inner city public high school The program involves an experiential curriculum that is based on Outward Bound It is an elective program that is jointly planned and implemented by the high school and a small non profit organization

dedicated to outdoor education and educational reform The program involves both classroom work and a series of outdoor activities These activities include rock climbing camping and canoeing The formal goals of the program are to raise students self esteem to improve students school attendance and to improve students academic performance Although this study began as an evaluation of program effects on student outcomes it evolved into an analysis of the reform process itself The historical roots of the program s design and ideology are described and the ways in which the organizational context in which it is implemented creates tensions in and obstacles to the realization of the program model are discussed and analyzed The research design involved both qualitative and quantitative methods These include a a year and a half of participant observation in the classroom on trips with the students and in meetings at both the school and the non profit organization b surveys of and interviews with students at the beginning and end of their participation in the program and 3 an analysis of students official school records The quantitative analysis of students self esteem and school performance suggests that the program has only very modest measurable effects on students The program has however indirect and unanticipated benefits not only for the students but for the school the teachers and the staff of the non profit organization as well In the face of the obstacles that the reformers encounter these benefits sustain the commitment of the staffs at the two organizations and the enthusiasm of the students The study demonstrates the difficulties that exist in attempting to implement and study in a contemporary urban high school a program which grew out of a very different time and context Leaves v vi *Resources for Social [sic] Change II* Simon Wittes, University of Michigan.
