The Ethereal Aether Loyd S. Swenson, 1972-01-01 The Ethereal Aether is a historical narrative of one of the great experiments in modern physical science The fame of the 1887 Michelson Morley aether drift test on the relative motion of the earth and the luminiferous aether derives largely from the role it is popularly supposed to have played in the origins and later in the justification of Albert Einstein s first theory of relativity its importance is its own As a case history of the intermittent performance of an experiment in physical optics from 1880 to 1930 and of the men whose work it was this study describes chronologically the conception experimental design first trials repetitions influence on physical theory and eventual climax of the optical experiment Michelson Morley and their colleague Miller were the prime actors in this half century drama of confrontation between experimental and theoretical physics The issue concerned the relative motion of Spaceship Earth and the Universe as measured against the background of a luminiferous medium supposedly filling all interstellar space At stake it seemed were the phenomena of astronomical aberration the wave theory of light and the Newtonian concepts of absolute space and time James Clerk Maxwell s suggestion for a test of his electromagnetic theory was translated by Michelson into an experimental design in 1881 redesigned and reaffirmed as a null result with Morley in 1887 thereafter modified and partially repeated by Morley and Miller finally completed in 1926 by Miller alone then by Michelson s team again in the late 1920s Meanwhile Helmholtz Kelvin Rayleigh FitzGerald Lodge Larmor Lorentz and Poincaré most of the great names in theoretical physics at the turn of the twentieth century had wrestled with the anomaly presented by Michelson s experiment As the relativity and quantum theories matured wave particle duality was accepted by a new

generation of physicists The aether drift tests disproved the old and verified the new theories of light and electromagnetism By 1930 they seemed to explain Einstein relativity and space time But in historical fact the aether died only with its believers

Dionysus Reborn Mihai Spariosu, 2019-06-30 Mihai Spariosu here explores the significance of the closely linked concepts of play and aestheticism in philosophical and scientific discourse since the end of the eighteenth century Spariosu points out that since its birth in archaic and classical Hellenic thought the concept of play has always been subject to the influences of various rational and prerational sets of values Spariosu maintains that there have been not one but two major modern concepts of aestheticism artistic aestheticism related to a prerational mentality and introduced in modern thought by Schopenhauer and Nietzsche and philosophical scientific aestheticism initiated by Kant and Schiller and shaped by rationalism According to Spariosu the first has often arisen in response to the attempts of philosophy and science to impose their standards on art and the second has often been called on to deal with the epistemological crises that periodically shake these disciplines Spariosu also looks closely at some of the play concepts that surface in modern science in connection with the Darwinian theory of evolution and the play of scientific discourse itself as exemplified by the new physics and the contemporary philosophy of science A penetrating and cogently argued book Dionysus Reborn will be welcomed by readers interested in Continental philosophy scientific discourse and the aesthetics of play including literary theorists comparatists philosophers intellectual historians and social scientists

Meaning and Authenticity Cesar Grana, 2023-03-31 This outstanding collection of hitherto unpublished work written over the last fifteen years of the author s life reveals the development and maturation of his ideas about sociology and art and specifically about the relationship between them Grafia sees in the artistic traditions of Western society the sociological sources of our sense of cultural form as well as cultural and

intellectual meaning He discusses theories of art and theories of artists as they have changed over time although the book is neither a history of art nor a criticism of specific artistic works Rather it is a defense of the sociology of art Grafton believes that the difficult and ambitious questions in the sociology of art are not merely questions of the proper role or status of the artist or the recognition of art as an ornament perhaps the supreme ornament of our culture He believes that what the sociologist must come to terms with is the view of art as the representation indeed the revelation of what is most telling and pervasive in culture itself This perspective assumes that the most serious claims made for art are in fact inseparable from the unique claims that are made about art Art can make visible what is implicit in our lives Art can put before us a statement of what we are but do not always recognize in ourselves Art is the mask and mimicry through which society gestures to us its ultimate and most poignant meanings Grafton contends that this vision of art derives from Hegelian aesthetics and he believes that this grand view whether one takes an idealist a literary or a Marxist materialist position also implies a dramatically changed conception of society itself The essays cover a variety of subjects from Marx museums and modern literature to Durkheim Daniel Bell and bullfighting the last being the apotheosis of cultural expression rendered into artistic form Throughout Grafton considers questions of the social origins of our artistic and intellectual traditions the influence of these traditions on our ways of thinking about society and their pervasiveness as standards for social meaning
