Science Fiction Blues:

Science Fiction Blues Brian Wilson Aldiss, 1988 The Best American Science Fiction and Fantasy 2017 N.K.

Jemisin, Peter S. Beagle, Caroline M. Yoachim, Brian Evenson, Dale Bailey, 2020-06-11 Stories by N. K. Jemisin, Dale Bailey, Peter S. Beagle and more. Showcases the nuanced, playful, ever-expanding definitions of the genre. The Washington Post Science fiction and fantasy can encompass so much, from far future deep space sagas to quiet contemporary tales to unreal kingdoms and beasts. But what the best of these stories do is the same across the genres: they illuminate the whole gamut of the human experience, interrogating our hopes and our fears. With a diverse selection of stories from major award winners, bestsellers, and rising stars chosen by series editor John Joseph Adams and guest editor Charles Yu, The Best American Science Fiction and Fantasy 2017 continues to explore the ever-changing world of SFF today, with Yu bringing his unique view, literary, meta, and adventurous, to the series' third edition. Superb. This mostly dystopic, sometimes darkly humorous collection of 20 hard-hitting stories feels timely, confronting contemporary cultural crises. Publishers Weekly starred review. Animals and Science Fiction Nora Castle, Giulia Champion, 2024-03-22 Animals and Science Fiction is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts, including novels, short stories, poetry, film, and TV, photography, erotica, video games, and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism, and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global SF studies, film studies, and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction. **Wild Blue Media** Melody Jue, 2020-02-28 In Wild Blue Media, Melody Jue destabilizes terrestrial-based ways of knowing and reorients our perception of the world by considering the ocean itself as a media environment, a place where the weight and opacity of seawater transform how information is created, stored, transmitted, and perceived. By recentering media theory on and under the sea, Jue calls attention to the differences between perceptual environments and how we think within and through them as embodied observers. In doing so, she provides media studies with alternatives to familiar theoretical frameworks, thereby challenging scholars to navigate unfamiliar oceanic conditions of orientation, materiality, and saturation. Jue not only examines media about the ocean, science fiction narratives, documentary films, ocean data visualizations, animal communication methods, and underwater art, but reexamines media through the ocean, submerging media theory underwater to estrange it from terrestrial habits of perception while reframing our understanding of mediation, objectivity, and metaphor. Brian W. Aldiss Paul Kincaid, 2022-07-12 Brian W. Aldiss wrote classic science fiction novels like *Report on Probability A* and *Hothouse Billion*.

Year Spree his groundbreaking study of the field defined the very meaning of SF and delineated its history Yet Aldiss s discomfort with being a guiding spirit of the British New Wave and his pursuit of mainstream success characterized a lifelong ambivalence toward the genre Paul Kincaid explores the many contradictions that underlay the distinctive qualities of Aldiss s writing Wartime experiences in Asia and the alienation that arose upon his return to the cold austerity of postwar Britain inspired themes and imagery that Aldiss drew upon throughout his career He wrote of prolific nature overwhelming humanity believed war was madness even though it provided him with the happiest period of his life and found parallels in the static lives of Indian peasants and hidebound English society As Kincaid shows contradictions created tensions that fueled the metaphorical underpinnings of Aldiss s work and shaped not only his long career but the evolution of postwar British science fiction
