The Science of Mind (Hardcover Library Edition) Ernest Holmes, 2021-06-10. First published in 1926, *The Science of Mind* proposes a science with a new relationship between humans and God. By Ernest Holmes, an American New Thought writer, teacher, and leader, He was the founder of a spiritual movement known as Religious Science, part of the greater New Thought movement. It declares that people can change their lives by vigorously engaging their minds in religious activities. Holmes believed that science, philosophy, and religion could all be connected for the betterment of each individual. According to Holmes, God is a never-ending energy source present in the whole universe. Through prayer, a person can reach God and heal spiritual, mental, and physical wounds. He believed that God's action and will occurred in the present, and that with each and every choice, a person makes, they are creating the Eternal Now. This thought was revolutionary, especially to New Age philosophy.
