Preface *Seismic Design of Building Structures* Michael R. Lindeburg, Majid Baradar, 2001 In California engineers taking the civil PE exam are also required to take two open book exams on seismic and surveying Each exam is 2 1 2 hours with around 50 multiple choice problems Both exams are given every April and October Seismic Design of Building Structures is the main review for the seismic exam It is complemented with a Solved Problems book and a Practice Exams book For the surveying exam the review text is Surveying Principles for Civil Engineers A Practice Exam is also offered All these books reference the 1997 UBC which is used on the current exams

Eurocode-Compliant Seismic Analysis and Design of R/C Buildings Ioannis Avramidis, A. Athanatopoulou, Konstantinos Morfidis, Anastasios Sextos, Agathoklis Giaralis, 2015-11-18 This book aims to serve as an essential reference to facilitate civil engineers involved in the design of new conventional ordinary reinforced concrete R C buildings regulated by the current European EC8 EN 1998 1 2004 and EC2 EN 1992 1 1 2004 codes of practice The book provides unique step by step flowcharts which take the reader through all the required operations calculations and verification checks prescribed by the EC8 provisions These flowcharts are complemented by comprehensive discussions and practical explanatory comments on critical aspects of the EC8 code regulated procedure for the earthquake

resistant design of R C buildings Further detailed analysis and design examples of typical multi storey three dimensional R C buildings are included to illustrate the required steps for achieving designs of real life structures which comply with the current EC8 provisions These examples can be readily used as verification tutorials to check the reliability of custom made computer programs and of commercial Finite Element software developed used for the design of earthquake resistant R C buildings complying with the EC8 EN 1998 1 2004 code This book will be of interest to practitioners working in consulting and designing engineering companies and to advanced undergraduate and postgraduate level civil engineering students attending courses and curricula in the earthquake resistant design of structures and or undertaking pertinent design projects
