Legalism Paul Dresch, Hannah Skoda, 2012-08-30 Law and law like institutions are visible in human societies very distant from each other in time and space When it comes to observing and analysing such social constructs historians anthropologists and lawyers run into notorious difficulties in how to conceptualize them Do they conform to a single category of law How are divergent understandings of the nature and purpose of law to be described and explained Such questions reach to the heart of philosophical attempts to understand the nature of law but arise whenever we are confronted by law like practices and concepts in societies not our own In this volume leading historians and anthropologists with an interest in law gather to analyse the nature and meaning of law in diverse societies They start from the concept of legalism taken from the anthropologist Lloyd Fallers whose 1960s work on Africa engaged unusually with jurisprudence The concept highlights appeal to categories and rules The degree to which legalism in this sense informs people's lives varies within and between societies and over time but it can colour equally both simple and complex law Breaking with recent emphases on practice nine specialist contributors explore in a wide ranging set of cases the place of legalism in the workings of social life The essays make obvious the need to question our parochial common sense where ideals of moral order at other times and places differ from those of modern North Atlantic governance State centred law for instance is far from a central case Legalism may be aspirational connecting people to wider visions of morality duty may be as prominent a theme as rights and rulers from thirteenth century England to sixteenth century Burma appropriate as much they impose a vision of justice as consistency The use of explicit categories and rules does not reduce to simple questions of power The cases explored range from ancient Asia Minor to classical India and from medieval England and France to Saharan oases and southern Arabia In each case they assume no knowledge of the society or legal system discussed The volume will appeal not only to historians and anthropologists with an interest in law but to students of law engaged in legal theory for the light it sheds on the strengths and limitations of abstract legal philosophy *A Companion to Britain in the Later Middle Ages* S. Mendicant Houses of Medieval London, 1221-1539 Jens Röhrkasten,2004 The mendicant Orders had a profound impact on urban society life and culture from the thirteenth century onwards Being engaged in extensive and ambitious pastoral activities they depended on outside support for their material existence Their influence extended into ecclesiastical as well as secular affairs leading to the creation of a network of connections to different social groups and on occasion even an involvement in politics The role of the mendicants in a medieval capital has not yet been systematically studied A first attempt to study a city of this scale is here made for London *English and French Towns in Feudal Society* Rodney Howard Hilton,1995-05-04 This is a comparative study of the role of English and French towns in feudal society in the middle ages In bringing together much material which dissolves old categories and simplifications in the study of medieval towns Professor Hilton provides an important new perspective on medieval society and on the nature of feudalism He argues that medieval towns were not as is often thought the harbingers of capitalism and emphasises the way in which urban social structures fitted into rather than challenged feudalism
