

INTRODUCTION TO ETHICS

- Ethics can be defined broadly as a set of moral principles or values that govern the actions and decisions of an individual or group. While personal ethics vary individual to individual at any point in time, most people within a society are able to agree about what is considered ethical and unethical behavior. In fact, a society passes laws that define what its citizens consider to be the more extreme forms of unethical behavior.
- Each of us has such a set of values, although we may or may not have considered them explicitly. Philosophers, religious organizations, and other groups have defined in various ways ideal sets of moral principles or values.
