Philosophy Across Borders Emma Ingala, Gavin Rae, 2024-11-14 This book brings into conversation geographically diverse theorists to question the meaning purpose and place of conceptual borders in philosophy It shows how contemporary theory is constituted by a dynamic practice in which the boundaries created to define it are simultaneously overcome in their establishment Philosophy has often taken itself to be distinguished from and superior to alternative ways of thinking To do so philosophical thinking has found itself rigidly affirming the need to think within borders to obtain conceptual clarity and certainty and or secure its own independent existence The chapters in this volume call into question the need to retreat behind demarcated boundaries that mark the domain of philosophy proper to instead offer a performative account of how philosophy can creatively work across geographical cultural linguistic borders without foreclosing that analysis conceptually In so doing the contributors tackle issues including the historical establishment of philosophical borders the metaphysics of

philosophical borders the relationship between Western and non Western thinking the ethics of transgressing borders and the political implications of Western rationality on and for non Western societies Philosophy Across Borders will therefore be of interest to scholars and advanced students working in philosophy aesthetics critical theory comparative philosophy cultural studies feminist theory history of ideas political theory and postcolonial studies

The Philosopher Justin Smith-Rui, 2017-10-31 How the role of the philosopher has changed over time and across cultures and what it reveals about philosophy today What would the global history of philosophy look like if it were told not as a story of ideas but as a series of job descriptions ones that might have been used to fill the position of philosopher at different times and places over the past 2 500 years The Philosopher does just that providing a new way of looking at the history of philosophy by bringing to life six kinds of figures who have occupied the role of philosopher in a wide range of societies around the world over the millennia the Natural Philosopher the Sage the Gadfly the Ascetic the Mandarin and the Courtier The result is at once an unconventional introduction to the global history of philosophy and an original exploration of what philosophy has been and perhaps could be again By uncovering forgotten or neglected philosophical job descriptions the book reveals that philosophy is a universal activity much broader and more gender inclusive than we normally think today In doing so The Philosopher challenges us to reconsider our idea of what philosophers can do and what counts as philosophy

Colorblind Tools Marzia Milazzo, 2022-10-15 Winner of the 2023 Association for Ethnic Studies Outstanding Book Award A study of anti Blackness and white supremacy across four continents demonstrates that colorblindness is neither new nor a subtype of racist ideology but a constitutive technology of racism In Colorblind Tools Marzia Milazzo offers a transnational account of anti Blackness and white supremacy that pushes against the dominant emphasis on historical change pervading current racial theory This emphasis on change she contends misses critical lessons from the past Bringing together a capacious archive of texts on race produced in Brazil Cuba Mexico Panama the United States and South Africa from multiple disciplines and genres Milazzo uncovers transnational continuities in structural racism and white supremacist discourse from the inception of colonial modernity to the present In the process she traces the global workings of what she calls colorblind tools technologies and strategies that at once camouflage and reproduce white domination Whether examining Rijno van der Riet's defense of slavery in the Cape Colony discourses of racial mixture in Latin American eugenics and their reverberations in contemporary scholarship the pitfalls of white antiracism or Chicana indigenist aesthetics Milazzo illustrates how white people collectively disavow racism to maintain power across national

boundaries and how anti Black and colonial logics can be reproduced even in some decolonial literatures Milazzo s groundbreaking study proves that colorblindness is not new nor is it a subtype of racist ideology or a hallmark of our era It is a constitutive technology of racism a tool the master cannot do without

Logical Empiricism as Scientific Philosophy Alan W. Richardson,2024-01-18 This Element offers a new

account of the philosophical significance of logical empiricism that relies on the past forty years of literature reassessing the project. It argues that while logical empiricism was committed to empiricism and did become tied to the trajectory of analytic philosophy, neither empiricism nor logical analysis per se was the deepest philosophical commitment of logical empiricism. That commitment was rather securing the scientific status of philosophy, bringing philosophy into a scientific conception of the world.
