Singles Myths And Realities New Perspectives On The Family By Cargan:

Singles Leonard Cargan, Matthew Melko, 1982-04 Most people on learning that someone is unmarried assume that it is not by choice Unmarried women particularly are seen as being incompetent or unattractive Marriage in an economy dominated by males is still seen as a form of success while a single woman is regarded as a failure Single men are often seen as being immature selfish tied to mother or deeply inadequate The authors of this book compare singles with marrieds to separate myths and realities Questionnaires were also given to members of a singles organization The research yielded such interesting results as far from being selfish singles devote more time to community work They are not richer even without the expense of children because they have to pay so much tax They do have more fun but they are indeed more lonely This book presents one of the first extended scientific studies of this much misunderstood minority This is a well conducted survey of a group that has not received much attention in the past and should be of interest to all professionals concerned with marriage and family Personality and Individual Differences Single Women/Family Ties Katherine R. Allen, 1989-07 This important qualitative study illuminates lifelong single women's contributions to family development in relation to their widowed peers Allen examines the social and historical contexts of the women's childhoods their experiences as young adults and the processes leading to their being single or married Midlife variations in family caregiving experiences and the meaning of being single in old age are also discussed **Monographic Series** Library of Congress, 1982 **Therapy with Single Parents** Joan D Atwood, Frank Genovese, 2014-02-25 Provide effective counseling to members of single parent families With more than half of all first marriages ending in divorce it's time to re think the notion that divorce means failure Therapy with Single Parents focuses on the strengths of the single parent family rather than its weaknesses stressing the need to look at the socially constructed norms values and definitions associated with marriage and family in order to provide effective counseling This unique book examines experiences that are common to single parents and presents interventive strategies for treating single parent family issues drawing on clinical case studies to provide technical knowledge in everyday language Current research shows that single parents account for 27 percent of family households that include children under 18 and that the number of single mothers in the United States more than tripled between 1970 and 2000 Therapy with Single Parents challenges outdated notions that the single parent family is somehow deficient and associated with adjustment problems in children It doesn't ignore the anger pain sadness and guilt experienced by many members of single parent families but offers therapeutic considerations from a more balanced approach The book examines the social psychological and sexual experiences of newly single parents and addresses the ups and downs they'll face in dealing with schools the workplace and social services Therapy with Single Parents examines social and psychological differences between divorce and widowhood cognitive behavioral principles of single parent families what children can learn from divorce dealing with the ghosts of past relationships relationship rules dealing with adult children and extended families the effect of change in

divorcing families the feminization of poverty the therapeutic value of social networks Therapy with Single Parents is an invaluable resource for psychologists professional counselors social workers and marriage and family therapists The book presents a thorough in depth examination of the single parent family system as a viable healthy family form *The Second Child* Robert B. Stewart,1990-10 The processes by which family members adjust to the birth of a second child are explored in this volume Interviews with both parents and with toddler first born children focused on how the birth of the second child affected the relationships between other family members their roles within the family and their feelings about themselves A major finding was that while mothers become active parents on the birth of the first child it is often not until the second child is born that the father shows great interest in family life and assumes a significant part of the responsibility for household and childcare tasks Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman,2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 **Family, Ties and Care** Hans Bertram, Nancy Ehlert,2011-11-29 Families international the new milestone How may care be secured particularly in ageing societies how may families relatives and friends support each other and live together beyond market reasons How can social welfare be secured How do different countries and different cultures solve the problems they may or may not now or in days to come share with other countries and cultures Families as is found in this publication by internationally renowned experts are the base and well of society's fortune in a humane paradigm Furthermore it is the very backbone of lifelong solidarity in inter generational relations and the very place where the readiness of taking on care and responsibility are experienced and learned The publication's underlying idea opens up two perspectives on the one hand differences and similarities in family life forms are chiselled out on the base of an international cooperation Simultaneously the international authors are called upon to express their ideas about their own country's future more distinctly and clearly thus distinctions and similarities of

the respective paths of development are rather easily perceived **Working Wives/Working Husbands** Joseph H. Pleck, National Council on Family Relations, 1985 Based on two sample surveys examines husbands participation in family work in relation to wives employment wives desires for greater husband participation sex role attitudes and psychological involvement *Family Perspective* , 1990 **Handbook of Clinical Behavior Therapy with the Elderly Client** Patricia A. Wisocki, 2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population
