Lord Nuffield:

Lord Nuffield Peter Hull,2008-03-04 It is largely as a result of the career of William Richard Morris Viscount Nuffield that the university city of Oxford became one of Britain's foremost industrial cities William Morris left school at fourteen and because he had shown an aptitude for taking things to pieces and reassembling them he was apprenticed to a bicycle repairer Within nine months he set up his own cycle business and from then on his rise to become one of Britain's leading industrialists Though not a great engineer he was an astute business man and expert mechanic he saw the need for a small economical car that was of high quality yet could be produced in large numbers His special talent enabled him to obtain the right parts and to assemble them and so the first Morris Oxford car appeared in 1913 Production boomed in the 1920s and Morris became a millionaire and was made a peer but he was generous with money and gave away over GBP30 000 000 in his lifetime much of it to hospitals and other medical causes in which he had a deep interest He also financed the establishment of Nuffield College Oxford which bears his title His name ceased to appear on motorcars after 1983 when Morris Motors was part of British Leyland but the MG Morris Garages badge has survived The Life of Lord Nuffield Philip Walter Sawford Andrews,Elizabeth Brunner,1959 *Our Mornings May Never be* Joan MacDonald,2002 **William Morris, Viscount Nuffield** R. J. Overy,1976 *Oxford* David Horan,1999 Following in the footsteps of historic figures and writers Horan reveals the many dimensions social and cultural of a city where tradition and modernity interconnect From the quadrangles and chapels of the university center to the multicultural bustle of the Cowley Road he explores both the historic and contemporary faces of Oxford Maps and illustrations **Economics, Politics and Social Studies in Oxford, 1900-85** Sir Norman Chester,1986-06-18 **The Real T E Lawrence** Andrew Norman,2025-08-30 Explores the enduring mysteries of Lawrence's postwar obscurity and complex sexuality T E Lawrence soldier and writer the co leader with King Faisal of Saudi Arabia of the Arab Campaign during the First World War became a legend in his own lifetime And yet to this day there is much about him which remains a mystery two aspects of his character being of particular interest This first is why having become a famous figure with the world at his feet did he choose subsequently to live a life of obscurity in the lower ranks of the armed services The second concerns Lawrence's sexuality Some of his biographers have been accused of bringing sex into their volumes for reasons of sensationalism and publicity To be fair however it was Lawrence himself who first raised the subject by including in his book *Seven Pillars of Wisdom* an account of the Desert Campaign details of how he was captured and raped by the Turks Lawrence who never married is known to have engaged in masochistic rituals So what was the true nature of and explanation for his sexuality This is the challenge of *The Real T E Lawrence* **The Bolt Collection** Richard Arthur Bolt,1925 A collection of miscellaneous international publications related to maternal and child welfare collected by Richard Bolt the founder of the University of California Berkeley School of Public Health Volumes are collated alphabetically by country of origin of each publication *First Impressions* Charmian Coates,2007-03 Oxford in the 1950s Sixteen year old

How Britain Shaped the Manufacturing World, 1851-1951 Philip Hamlyn Williams,2022-07-28 The peoples of the British Isles gave to the world the foundations on which modern manufacturing economies are built This is quite an assertion but history shows that in the late eighteenth century a remarkable combination of factors and circumstances combined to give birth to Britain as the first manufacturing nation Further factors allowed it to remain top manufacturing dog well into the twentieth century while other countries were busy playing catch up Through two world wars and the surrounding years British manufacturing remained strong albeit while ceding the lead to the United States This book seeks to tell the remarkable story of British manufacturing using the Great Exhibition of 1851 as a prism Prince Albert and Sir Henry Cole had conceived an idea of bringing together exhibits from manufacturers across the world to show to its many millions of visitors the pre eminence of the British 1851 was not the start but rather a pause for a bask in glory This book traces back from the exhibits in Hyde Park s Crystal Palace to identify the factors that gave rise to this pre eminence then follows developments up until the Festival of Britain exactly one century later Steam power and communication by electric telegraph both British inventions predated the Exhibition After it came the sewing machine and bicycle motor car and aeroplane but also electrical power radio and the chemical and pharmaceutical industries where Britain played a leading part

The Most Dangerous Enemy Stephen Bungay,2010-09-25 Stephen Bungay s magisterial history is acclaimed as the account of the Battle of Britain Unrivalled for its synthesis of all previous historical accounts for the quality of its strategic analysis and its truly compulsive narrative this is a book ultimately distinguished by its conclusions that it was the British in the Battle who displayed all the virtues of efficiency organisation and even ruthlessness we habitually attribute to the Germans and they who fell short in their amateurism ill preparedness poor engineering and even in their old fashioned notions of gallantry An engrossing read for the military scholar and the general reader alike this is a classic of military history that looks beyond the mythology to explore all the tragedy and comedy the brutality and compassion of war
