Groups of Galaxies in the Nearby Universe Ivo Saviane, Valentin D. Ivanov, Jordanka Borissova, 2007-08-01 For every galaxy in the field or in clusters there are about three galaxies in groups The Milky Way itself resides in a group and groups can be found at high redshift The current generation of 10 m class telescopes and space facilities allows the observation of the members of nearby groups with exquisite detail and their properties can be correlated with the global properties of their host group Groups in the local Universe offer us the chance to study galaxies in environments characterized by strong interactions In the cosmological context groups trace large scale structures better than clusters and the evolution of groups and clusters appears to be related All these aspects of research on groups of galaxies are summarized in this book written by scientists working in various fields

business professionals *Caring for Souls in a Neoliberal Age* Bruce Rogers-Vaughn, 2016-11-08 This volume offers a detailed analysis of how the current phase of capitalism is eating away at social interpersonal and psychological health. Drawing upon an interdisciplinary body of research, Bruce Rogers Vaughn describes an emerging form of human distress, what he calls third order suffering, that is rapidly becoming normative. Moreover, this new paradigm of affliction is increasingly entangled with already existing genres of misery such as sexism, racism, and class struggle, mutating their appearances and mystifying their intersections. Along the way, Rogers Vaughn presents stimulating reflections on how widespread views regarding secularization and postmodernity may divert attention from contemporary capitalism as the material origin of these developments. Finally, he explores his own clinical practice, which yields clues for addressing the double unconsciousness of third order suffering and outlining a vision for caring for souls in these troubling times.
