Grace and Gravity Lars Spuybroek,2020-11-26 How do we live well The first sentence of Grace and Gravity raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does

not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence Grace and Gravity offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers

The Architecture of Influence Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old The Architecture of Influence explores this fundamental question by analyzing a broad swath of twentieth century architectural works including some of the best known examples of the architectural canon modern and postmodern through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture
