Hamburger, 2002-09-26 Throughout the Middle Ages John the Evangelist identified as the author of both the Book of Revelation and the most profound and theologically informed of the four Gospels provided monks and nuns with a figure of inspiration and an exemplar of vision and virginity Rather than the historical apostle this book's protagonist is a persona of the Evangelist established in theology the liturgy and devotional practice the model mystic who by virtue of his penetrating insight was seen as having become a mirror image of Christ In St John the Divine Jeffrey Hamburger identifies a remarkable set of images from the ninth to the fifteenth centuries that identify the inspired Evangelist so closely with the deity that he appears as his living image and embodiment Hamburger explores the ways these representations of St John in the guise of Christ elucidate the significance of images as such in medieval theology and mysticism Above all he shows how these artworks presented together for the first time epitomize the relationship between the visible and the invisible between ideas however abstract and the concrete images that medieval Christians confronted face to face Publisher's description **Gender, Sexuality, and Material Objects in English Renaissance Verse** Pamela S. Hammons, 2016-12-05 An important contribution to recent critical discussions about gender sexuality and material culture in Renaissance England this study analyzes female and male authored lyrics to illuminate how gender and sexuality inflected sixteenth and seventeenth century poets' conceptualization of relations among people and things human and non human subjects and objects Pamela S Hammons examines lyrics from both manuscript and print collections including the verse of authors ranging from Robert Herrick John Donne and Ben Jonson to Margaret Cavendish Lucy Hutchinson and Aemilia Lanyer and situates them in relation to legal theories autobiographies biographies plays and epics Her approach fills a crucial gap in the conversation which has focused upon drama and male authored works by foregrounding the significance of the lyric and women's writing Hammons exposes the poetic strategies sixteenth and

seventeenth century English women used to assert themselves as subjects of property and economic agents in relation to material items ranging from personal property to real estate despite the dominant patriarchal ideology insisting they were ideally temporary passive vehicles for men's wealth The study details how women imagined their multiple complex interactions with the material world the author shows that how a woman poet represents herself in relation to material objects is a flexible fiction she can mobilize for diverse purposes Because this book analyzes men's and women's poems together it isolates important gendered differences in how the poets envision human subjects use control possession and ownership of things and the influences effects and power of things over humans It also adds to the increasing evidence for the pervasiveness of patriarchal anxieties associated with female economic agency in a culture in which women were often treated as objects
