Public Health and Primary Care Alison Hill, Siân Griffiths, Stephen Gillam, 2007-07-05 This book is written for people working in primary care who want to understand more about how they contribute to improving the health and health care of the populations that they serve and for people working in public health who want to understand the essential contribution of primary care to improving health It sets out the nature purpose and relevance of public health approaches to primary care practitioners and primary care organisations Primary care teams have had a long established role in public health providing preventive services to populations through the registered population in general practice This model of a registered practice population has withstood multiple reconfigurations and reorganisations within the NHS and is the envy of many countries trying to create a public health system with primary care at its heart There are clear differences in approach with the inevitable conflicts between the rights of the individual set against the responsibility to ensure services are delivered fairly and equitably to whole populations This book explores this dilemma showing how people working in primary care can cross the divide to become part of the public health system and in doing so are well placed to make a difference to the health of their

practice however medicine often opts for reductionist perspectives of patients as passive mechanical systems and diseases as puzzles At the same time huge political and organisational changes mean time and resources are scarce putting further pressure on consultations This book discusses how we can start to resolve these tensions The first part considers problems posed by the increasing bureaucratisation of primary care the impact of information technology in the consultation the effects of chronic disease on our sense of self and how an emphasis on biology over biography leads to over diagnosis The second part proposes solutions based on a strong ontology of consciousness concepts of creative capacity coherence and engagement and will show how these can enhance the self esteem of patients and doctors and benefit their therapeutic dialogue Combining theoretical perspectives from philosophy sociology and healthcare research with insights drawn from clinical practice this edited volume is suitable for those researching and studying primary healthcare communication and relationships in healthcare and the medical humanities *The Exceptional Potential of General Practice* Graham

Watt, 2018-12-07 This innovative and timely book draws on pioneering precedents basic principles current examples and international experience to capture the narratives examples and ideas that underlie and demonstrate the exceptional potential of general practice If health care is not at its best where it is needed most health inequalities will widen The unworried unwell are not hard to reach but they are easy to ignore and are often ignored With patient contact population coverage continuity coordination flexibility long term relationships and trust general practices are the natural hubs of local health systems practitioners are not only scientists but also responsible citizens and if they did not raise their voice who else should Written for family doctors looking to strengthen local collaboration it brings together the traditional strengths of consultations caring continuity coordination and coverage with the current and future challenges of building capacity community creativity consistency collegiality and campaigning It highlights the critical importance of working with patients maximising the use of serial encounters integrating care joint working between practices social prescribing community development and advocacy based on patient and practitioner experience Drawing on the highly regarded work of Deep End GPs serving the poorest communities in Scotland www.gla.ac.uk/deepend the book is an invaluable handbook for all primary care doctors irrespective of health care system or country seeking to provide unconditional continuity of personalised care for all patients whatever problem or combination of problems a patient may have *The political economy of health care*

Julian Tudor Hart, 2010-09-01 With a foreword by Tony Benn Drawing on clinical experience dating from the birth of the NHS in 1948 Julian Tudor Hart a politically active GP in a Welsh coal mining community charts the progress of the NHS from its 19th century origins in workers mutual aid societies to its current forced return to the market His starting point is a detailed analysis of how clinical decisions are made He explores the changing social relationships in the NHS as a gift economy how these may be affected by reducing care to commodity status and the new directions they might take if the NHS resumed progress independently from the market This edition of this bestselling book has been entirely rewritten with two new

chapters and includes new material on resistance to that world wide process The essential principle in the book is that patients need to develop as active citizens and co producers of health gain in a humanising society and the author s aim is to promote it wherever people recognise that pursuit of profit may be a brake on rational progress **Thinking Nursing** Mason, Tom, Mason-Whitehead, Elizabeth, 2003-12-01 Thinking Nursing This major new textbook provides a unique one stop resource that introduces nursing students to the disciplines that underpin nursing practice The broad range of subjects covered includes Sociology Psychology Anthropology Public Health Philosophy Economics Politics and Science Written by nursing lecturers with nursing students in mind this book enables nurses to grasp the principles behind these disciplines and apply the concepts to everyday health care practices Each chapter offers The theoretical background of the major tenets of each discipline A comprehensive discussion of how they relate to practice Cross references to other relevant chapter sections Suggestions for further reading A glossary of key terms Practical advice is also available in a chapter dedicated to methods of research planning and construction of written work Moreover the textbook encourages creative and lateral thinking beyond its use in planning and writing assignments Thinking Nursing is essential reading for nursing students on Common Foundation Programmes both at diploma and degree level and qualified nurses undertaking additional specialist training including masters degrees as well as those involved in planning designing and the implementation of educational courses for nurses **The Need For Health Care** W.R. Donaldson, 2020 Public health issues are rarely out of the news The 9 11 terrorist attacks the Grenfell Tower fire new designer drugs outbreaks of Ebola

and links between social media and mental health occupy our thoughts and our screens However awareness of these events as public health issues is a recent phenomenon for many years after the Second World War the history of the field was eclipsed by advances in clinical science and patient care In *Practising Public Health An Eyewitness Account* John Ashton sets the record straight The former Regional Director of Public Health in the North West of England and co founder of the WHO Healthy Cities Project shares his adventures and experiences as a leader in public health at a time of unprecedented change and challenge He presents case studies from the frontline of public health and tells stories that are now part of modern history Fighting for a better public health at community national and international levels John shows us how public engagement and partnership goes hand in hand with political action The stories in this book illustrate the importance of using your imagination challenging the status quo and thinking on your feet when initiating change John also reveals the thinking behind his renowned hands on approach to public health and explains why he insists on bridging the gap between theory and practice *Practising Public Health* connects the work of nineteenth century public health giants to that of today s twenty first century pioneers taking time to reflect over dissect and highlight the events decisions and people involved in its development With case studies and story telling this book is ideal for undergraduate and postgraduate public health courses worldwide It is also of high value to other health professional groups such as nurses and health visitors social workers and community development activists as well as politicians and policy makers *Beyond Reflective Practice* Helen

Bradbury,Nick Frost,Sue Kilminster,Miriam Zukas,2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual s internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices *Beyond Reflective Practice* examines what new forms of professional reflective practice are emerging It examines in particular the relationships between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts A
