of each tradition and ultimately encourages enhanced understanding dialogue and even rapprochement between these sometimes antagonistic adversaries

Jorge Luis Borges, Post-Analytic Philosophy, and Representation Silvia G. Dapía, 2015-08-20 Making an important contribution to studies in Literature and Philosophy this book reads Jorge Luis Borges philosophically particularly in reference to his use of representation and reality Rather than attempting to subordinate Borges to a set of philosophical constructs to reduce Borges texts to mere exemplifications or illustrations of philosophical theories the book uses Borges's short stories to demonstrate how philosophical questions related to representation develop out of literature and actually serve as precursors to the various strains of post analytic philosophy that later developed in the United States The volume discusses American post analytic philosophers Richard Rorty Hilary Putnam Donald Davidson Nelson Goodman and Arthur Danto as well as a wide ranging set of philosophical ideas including reflections on Keynes Hayek Schopenhauer and many others Chapters offer detailed readings of Borges texts extending from 1939 to 1983 locating where he thematizes issues of representation and pursuing the logic of Borges's text toward its philosophical implications without neglecting their literary value The book argues that Borges exploration of the relationship between representation and reality places him unmistakably in the position of a precursor to the post analytic philosophers Illuminating the role that language plays in the creation of reality and representation this volume makes significant contributions not only to Borges scholarship but also post structuralism post analytic studies of language semiotics comparative literature and Latin American literature

The Subject of Liberation Charles Wells,2014-07-31 The book shares i ek s central problem of how to revitalize the radical political left through theory It initially follows the argument developed in The Ticklish Subject that contemporary leftist thought is divided by antagonism between a Marxist revolutionary politics founded on Enlightenment philosophy and a politics of identity founded on post modern post structuralism How i ek used Lacan s theory of character structures is examined here to describe this theoretical deadlock and explain how the dominant contemporary ideologies of liberal

tolerant multiculturalism and reactionary pseudo fundamentalism compete to mobilize the individual subject's unconscious drive to enjoyment. The book thus emphasizes the moments in which Lacan hints that Lacanian theory may describe a practice that facilitates the resolution of antagonisms that placate radical leftist politics. It challenges prevalent interpretations of Lacanian ends of analysis to ultimately connect the psychoanalytic cure to the leftist project of social and political liberation. *The Subject of Liberation* argues that if Lacan is to be useful to leftist politics then the left has to develop its own definitions of the post-analytic subject and proposes one such definition developed out of Lacanian and Žižekian theory.

The Death of Philosophy Isabelle Thomas-Fogiel, 2011. Philosophers debate the death of philosophy as much as they debate the death of God. Kant claimed responsibility for both philosophy's beginning and end while Heidegger argued it concluded with Nietzsche. In the twentieth century figures as diverse as John Austin and Richard Rorty have proclaimed philosophy's end with some even calling for the advent of postphilosophy. In an effort to make sense of these conflicting positions which often say as much about the philosopher as his subject, Isabelle Thomas Fogiel undertakes the first systematic treatment of the end of philosophy while also recasting the history of western thought itself. Thomas Fogiel begins with postphilosophical claims such as scientism which she reveals to be self-refuting for they subsume philosophy into the branches of the natural sciences. She discovers similar issues in Rorty's skepticism and strands of continental thought. Revisiting the work of late nineteenth and early twentieth century philosophers when the split between analytical and continental philosophy began, Thomas Fogiel finds both traditions followed the same path: the road of reference which ultimately led to self-contradiction. This phenomenon, whether valorized or condemned, has been understood as the death of philosophy. Tracing this pattern from Quine to Rorty, from Heidegger to Levinas and Habermas, Thomas Fogiel reveals the self-contradiction at the core of their claims while also carving an alternative path through self-reference. Trained under the French philosopher Bernard Bourgeois, she remakes philosophy in exciting new ways for the twenty-first century.

The American Philosopher Giovanna Borradori, 2008-04-15. In this lively look at current debates in American philosophy, leading philosophers talk candidly about the changing character of their discipline. In the spirit of Emerson's *The American Scholar*, this book explores the identity of the American philosopher. Through informal conversations, the participants discuss the rise of post-analytic philosophy in America and its relations to European thought and to the American pragmatist tradition. They comment on their own intellectual development as well as each other's work charting the course of American philosophy over the past few decades. Giovanna Borradori, in her substantial introduction, explains the history of the analytic movement in America and the home-grown reaction against it. In the late nineteenth and early twentieth centuries, American philosophy was a socially engaged interdisciplinary enterprise. In transcendentalism and pragmatism, then the dominant currents in American thought, philosophy was connected to history, psychology, and public issues. But in the 1930s, the imported European movement of logical positivism redefined philosophical discourse in terms of mathematical logic and theory of language. Under the influence of this analytic view, American

philosophy became a professionalized discipline divorced from public debate and intellectual history and antagonistic to the other more humanistic tradition of continental thought The American Philosopher explores the opposition between analytic and continental thought and shows how recent American work has begun to bridge the gap between the two traditions Through a reexamination of pragmatism and through an attempt to understand philosophy in a more hermeneutical way the participants narrow the distance between America's distinctly scientific philosophy and Europe's more literary approach Moving beyond classical analytic philosophy the participants confront each other on a number of topics The logico linguistic orientations of Quine and Davidson come up against the more discursive interdisciplinary agendas of Rorty Putnam and Cavell Nozick's theory of pluralist anarchism goes face to face with the aesthetic neo foundationalism of Danto And Kuhn's hypothesis of paradigm shifts is measured against MacIntyre's ethics of virtues Borradori's conversations offer an unconventional portrait of the way philosophers think about their work scholars and students will not be its only beneficiaries so will everyone who wonders about the current state of American philosophy
