semantics of the attitudes the book turns to a semantic analysis of eventuality and abstract object denoting nominals in English The book then substantially revises and extends the dynamic semantic framework of DRT to develop an analysis of anaphoric reference to abstract objects and eventualities that exploits discourse structure and the discourse relations that obtain between elements of the structure A dynamic semantically based theory of discourse structure SDRT is proposed along with many illustrative examples Two further chapters then provide the analysis of anaphoric reference to propositions VP ellipsis The abstract entity anaphoric antecedents are elements of the discourse structures that SDRT develops The final chapter discusses some logical and philosophical difficulties for a semantic analysis of reference to abstract objects For semanticists philosophers of language computer scientists interested in natural language applications and discourse philosophical logicians graduate students in linguistics philosophy cognitive science and artificial intelligence

Accessing Noun-Phrase Antecedents (RLE Linguistics B: Grammar) Mira Ariel,2014-02-03 Accessing Noun Phrase Antecedents offers a radical shift in the analysis of discourse anaphora from a purely pragmatic account to a cognitive account in terms of processing procedures Mira Ariel defines referring expressions as markers signalling the degree of Accessibility in memory of the antecedent The notion of Accessibility is explicitly defined the crucial factors being the Salience of the antecedent and the Unity between the antecedent and the anaphor This analysis yields an astonishing array of new results The precise distribution of referring expressions in actual discourse is directly predicted Several universals of anaphoric relations are stated Thus although not all languages necessarily have the same markers and nor do they assign them precisely the same function Ariel shows that they all obey the same Accessibility marking hierarchy This book will be compulsory reading for anyone with an interest in the semantics and pragmatics of referring expressions in the interaction of semantics and pragmatics and more generally in the interaction between peripheral and central cognitive systems
