Literary Research and the Era of American Nationalism and Romanticism Angela Courtney, 2007-12-07 The early years of American nationhood beginning at the close of colonial rule and ending with the onset of the Civil War saw both a young country and its literature grow in confidence and develop an awareness of self identity Pride in the new nation was a primary characteristic of much literary output in the early years of the country whether in the form of fiction poetry drama essay travel writing or journal As the country grew and generations began to be born on the new land Romanticism took hold lauding not only the construct of the nation but also the natural power and potential of the country This era of American literary expression has left behind a rich legacy of traditionally canonized authors as well as material published in the growing periodical press that was of immediate importance to the population at the time Literary Research and the Era of American Nationalism and Romanticism Strategies and Sources examines the resources that deal with the literature produced in the approximately 70 years of antebellum American literature Covering all formats the volume discusses bibliographies indexes research guides archives special collections microform and digital primary text resources and how they are best utilized for a literary research project Suggestions are offered for best practices for research while exploring a wide selection of resources that run the gamut from classic standards of American literary bibliography through contemporary open access digital resources **Literary Research and British Postmodernism** Bridgit

McCafferty, Arianne Hartsell-Gundy, 2015-09-02 *Literary Research and British Postmodernism* is a guide for scholars that aims to connect the complex relationships between print and multimedia technological advancements and the influence of critical theory that converge in postwar British literature. This era is unique in that strict boundaries between fiction, nonfiction, multimedia, and print are not useful. Postmodern literature is defined by the breaking down of boundaries as a reaction to modernism and requires an innovative, multifaceted approach to research. In this guide, the authors explore these complex relationships and offer strategies for researching this new period of literature. This book takes a holistic approach to postmodern literature that recognizes the way in which digital media, film, critical theory, popular music, and more traditional print sources are inextricably linked. Through this approach, the authors present a broad view of postmodernism that includes a wide variety of British authors writing in the last half of the twentieth century. The book's definition of postmodern includes any British literature following World War II that engages issues central to postmodern theory, including the social construction of gender, sexuality, and power; the subjectivity of truth; technology as a social force; intertextuality; metafiction; postcolonial narrative; and fantasy. This guide aims to aid researchers of postwar British literature by defining best practices for scholars conducting research in a period so broadly varied in the way it defines literature.
