Reflexive Modernization Politics Tradition And Aesthetics In The Modern Social Order:

Reflexive Modernization Ulrich Beck, Anthony Giddens, Scott Lash, 1994 Three prominent social thinkers discuss how modern society is undercutting its formations of class stratum occupations sex roles the nuclear family and more Reflexive modernization or the way one kind of modernization undercuts and changes another has wide ranging implications for contemporary social and cultural theory as this provocative book demonstrates **Reflexive Modernization** Ulrich Beck, Anthony Giddens, Scott Lash, 1994-01 In this book three social thinkers discuss the implications of reflexive modernization for social and cultural theory today Ulrich Beck's vision of the risk society has already become influential Beck offers a new elaboration of his basic ideas connecting reflexive modernization with new issues to do with the state and political organization Giddens offers an in depth examination of the connections between institutional reflexivity and the de traditionalizing of the modern world We are entering he argues a phase of the development of a global society A global society is not a world society but one with universalizing tendencies Lash develops the theme of reflexive modernization in relation to aesthetics and the interpretation of culture In this domain he suggests we need to look again at the conventional theories of postmodernism aesthetic modernization has distinctive qualities that need to be uncovered and analyzed

Institutional Dynamics in Environmental Governance Bas Arts, Pieter Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives

Risk and Presidential Decision-making Luca Trenta, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential

decision making in foreign policy It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography international relations and Presidential studies Based on developments in the health and environment literature the book identifies the President as the ultimate risk manager demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side Every decision represents a risk vs risk trade off in which the management of one target risk leads to the development countervailing risks The book applies this framework to the study three major crises in US foreign policy the Cuban Missile Crisis the seizure of the US Embassy in Tehran in 1979 and the massacre at Srebrenica in 1995 Each case study results from substantial archival research and over twenty interviews with policymakers and academics including former President Jimmy Carter and former Senator Bob Dole This book is ideal for postgraduate researchers and academics in US foreign policy foreign policy decision making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences The case studies will also be of great use to undergraduate students Norbert Elias in Troubled Times Florence Delmotte, Barbara Górnicka, 2021-08-02 This edited collection brings together texts that discuss current major issues in our troubled times through the lens of Norbert Elias s sociology It sheds light on both the contemporary world and some of Elias s most controversial concepts Through examination of the current affairs political and social contemporary changes the authors in this collection present new and challenging ways of understanding these social processes and figurations Ultimately the objective of the book is to embrace and utilise some of the more polemical aspects of Elias s legacy such as the exploration of decivilizing processes decivilizing spurts and dys civilization It investigates to what extent Elias s sociological analyses are still applicable in our studies of the developments that mark our troubled times It does so through both global and local lenses theoretically and empirically and above all by connecting past present and possible futures of all human societies **Conflicting Philosophies and International Trade Law** Michael Burkard, 2017-10-17 This book reveals how conflicting worldviews are at the root of public controversies on policy and trade issues It highlights the particularly controversial disputes at the level of the World Trade Organization in the case of regulating beef hormones and GMOs aiming to show how negotiators of international agreements members of dispute settlement bodies and policy makers in general could have recourse to concepts of other disciplines such as epistemology and philosophy in order to address deadlocked legal disputes Ultimately the book is a manifesto for independent and critical research *Young Europeans, Work and Family* Julia Brannen, Susan Lewis, Anne Nilsen, 2002-11 Based on qualitative research with young people aged from 18 to 30 in five European countries this book examines young peoples pathways to adulthood and their perspectives on their future work and family lives *The International Political Economy of Risk* Robert Deuchars, 2017-11-28 The discipline of international political economy faces a number of critical challenges at present as it seeks to incorporate a number of relatively new issues one of these being risk This captivating and enlightening study

redresses the neglect of risk in this field by focusing on objectivist rationalism Highlighting some of the calculative practices rationalism makes possible it demonstrates the deeply political nature of supposedly value neutral technical pursuits such as accounting auditing the practice of statistics sampling and credit rating All these practices are implicated in modernist forms of power and governance The volume draws on work from various disciplines including sociology anthropology political economy and philosophy to explain the apparent unravelling of the rationalist quest for more reliable forms of knowledge It is highly suitable for courses on international relations international political economy

Networked Governance and Transatlantic Relations Gabriella Paar-Jakli, 2014-04-29 In today's complex and interconnected world scholars of international relations seek to better understand challenges spurred by intensified global communication and interaction The complex connectedness of modern society and politics compels us to investigate the pattern of interconnections among actors who inhabit social and political spaces Gabriella Paar-Jakli's study aims to advance theory and practice by examining the networks used by specialists in North America and Europe to achieve their policy goals in the area of science and technology Her book suggests that to overcome policy problems transnationally three critical factors should be considered First as science and technology policy becomes increasingly critical to resolving global issues it should be regarded as an integral element of the foreign policy process Second as liberal international relations theory argues the increasing role of NGOs must be taken seriously alongside states as vital agents of policy reform Third as transatlantic relations remain center to maintaining the

global order they must be reconsidered Paar Jakli assesses the role of digital networks as facilitators of regional cooperation Utilizing various techniques of social network analysis her research indicates an active and structurally discernible network in cyberspace among transatlantic organizations and demonstrates the role of virtual networks as facilitators of cooperative arrangements in transatlantic relations Paar Jakli's original research uses social network analysis to investigate transatlantic cooperation a new approach that will be noteworthy to network and transatlantic scholars as well as policymakers

Competition Law and Economic Inequality Jan Broulík, Katalin Cseres, 2022-12-15 The gap between the rich and poor is widening across the globe This book explores whether this major societal challenge of our time can be addressed by the means of competition law The primary goal of today's competition law is to ensure that market power does not lead to an inefficient production of goods and services Nevertheless even such efficiency oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn Furthermore many competition law regimes do take into account distributive considerations too The chapters investigate the relationship between competition law and economic inequality from philosophical historical and economic perspectives Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets As such the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries The book is a must read for researchers public officials judges and practitioners within the competition law community It will also appeal to anyone more broadly interested in issues of inequality and economic policy
