Religion Confronting Science And There Was Light:

Religion Confronting Science Donivan Bessinger,1991 **Faith Confronts Nuclear Power** John R.

Gugel,2015-10-22 Faith Confronts Nuclear Power is a theological critique that attempts to call people to action in the battle against nuclear power Nuclear power is a sophisticated terribly expensive and frightfully dangerous way to boil water What is it doing to the earth our God created How do we care for the earth if we allow it to continue Looking at nuclear power through the eyes of faith a Lutheran pastor John Gugel is alarmed at the apparent lack of concern on this issue and seeks to call people to action **Creation, Catastrophe & Calvary** John Templeton Baldwin,2000 In this scientific age what

difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions Creation Catastrophe and Calvary shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel s Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature **Religions**

Confronted with Science & Technology Marc Luyckx,1992 **The Creation/Evolution Controversy** James L.

Hayward,1998-04-30 This collection of 447 annotated references provides an overview of the literature addressing the creation evolution controversy for students teachers lawyers writers historians scientists sociologists clerics and other interested persons Fifty four annotations in the chapter on historical references highlight influential volumes published between 1543 and 1980 classic works that inform the views of later writers These historical works are listed chronologically in order of publication The remaining 393 entries feature books published from 1981 the year of the Scopes II trial in Arkansas to 1996 and include works that address historical sociological philosophical religious cosmological geological biological and anthropological issues surrounding the creation evolution controversy The annotations are written in an informative impartial style Except for references in the chapter containing historical sources and in the chapter featuring works on the history of the creation evolution controversy references are grouped under theistic and non theistic headings An introductory essay describes the history of evolutionary theory and creationism and defines the distinguishing features of each thought system An annotated list of periodicals featuring articles on creationism and evolutionism is also provided With author title and subject indexes **Science, Faith And Ethics** Larry L Hench,2001-11-19 Every day headlines emphasise the impact that technology has on the manipulation of life We all want to live longer healthier happier lives To live at all costs and maintain life at all costs has become a popular aim This book examines those costs it probes the consequences of putting one s faith in science It explores the belief that with science comes certainty The use and misuse of implants transplants

cloning genetic manipulation health care resources birth and death control are debated in terms of the complex scientific economic and ethical issues involved

The Irrepressible Conflict in Religion John Herman Randall, 1925 **Science, Reason and Religion** Derek Stanesby, 2013-05-02 Philosophy matters This is the message of this highly original inquiry into the relationship between science and religion It is only when we examine the intellectual presuppositions on which science and religion are based with regard to such fundamentals as truth objectivity and realism that we perceive the link between these two enterprises which are essential to any characterization of man The book offers a lucid and enlightening account of the main movements in the philosophy of science in the twentieth century and then proceeds to demonstrate their consequences for philosophy of religion After examining the wide and all pervasive influence of positivism and its offspring relativism in both science and theology he suggests that the attempt to provide an alternative made by Karl Popper offers the most satisfactory way forward in man's twofold enquiry in terms of his relationship with God and with the world

When Religious Faith Collides with Science Jan M. Long, 2016-08-17 A 2014 Gallup Poll indicated that 26 percent of Americans believe that humans came into existence less than 10 000 years ago with a much larger 37 percent believing the world was created in six 24 hour days Those percentages represent around 83 million and 118 million people respectively suggesting these to be ideas that resonate with a large swath of the population Given the prevalence of such thinking the question looms Is it possible that so many people could be wrong or is science simply mistaken about some of these matters This book is very much about the importance process plays in the conclusions that are reachable with Jan Long proposing that process itself can answer such questions doing so in a way that offers credibility He proposes that process entails a set of well established rules for how knowledge is acquired and these can help guide the formation of a sacred construct about beginnings In the final analysis it is a process that seeks to replace dogmatic thinking with humble and tentative expressions about that which is knowable about the many mysteries of reality that convey to sentient beings awe and wonder

Hermeneutics, Politics, and the History of Religions Christian K. Wedemeyer, Wendy Doniger, 2010 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach's death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people's minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men's writings and their lives and in Eliade's case the relationship between his political commitments and his writings in fiction history of religions and autobiography

Both men's contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars' legacies

Science Confronts the Paranormal Kendrick Frazier, 2023-10-17 A Gallop poll surveyed 506 American teenagers aged 13 to 18 and discovered the following: 69% believe in angels, 59% believe in ESP, 55% believe in astrology, 28% believe in clairvoyance, 24% believe in Bigfoot, 22% believe in witchcraft, 20% believe in ghosts, 18% believe in the Loch Ness Monster. Carl Sagan has said that the wonders of real science far surpass the supposed and imagined mysteries of fringe science. Yet as statistics show, the paranormal is still an endless source of fascination for people around the world. This collection of critical essays and investigative reports examines virtually every area of fringe science and the paranormal from a refreshingly scientific and clear-minded viewpoint. The authors are noted scientists, philosophers, psychologists, and writers. All bring to the task a determination to sift sense from nonsense and fact from fiction in an area notorious for misinformation, misperception, self-delusion, and wishful thinking. They do so in a way that highlights the differences between real science and pseudoscience. They've made special efforts first to find the actual facts behind numerous claims that have popular appeal and then to explain and communicate what scientific investigation and reasoning reveal about them. Subjects treated to incisive and entertaining examination include astrology, ESP, psychic detectives, psychic predictions, parapsychology, remote viewing, UFOs, creationism, the Shroud of Turin, coincidences, cult archaeology, palmistry, and fringe medicine. There are also explorations of the implications of paranormal beliefs for science education.

Confronting Religious Denial of Science Catherine M. Wallace, 2016-07-05 *Confronting Religious Denial of Science: Christian Humanism and the Moral Imagination* traces the cultural backstory of contemporary conflicts between biblical literalists who oppose evolution and New Atheists who insist that religion is so pernicious it should be outlawed if not exterminated. That's a clash of fundamentalisms. It's a zero-sum game derived from high Victorian misunderstanding of both religion and science. The God whom science supposedly replaces is the Engineer Almighty sitting at his keyboard controlling every event on earth. But that's not a viable concept of God. Far better, Wallace argues, to understand Christianity in Clifford Geertz's terms as a system of symbols that both constitutes a worldview and, according to David Sloan Wilson, encourages prosocial behavior. That reframing makes it possible to reclaim what biblical scholars have said for decades: the miracles of Jesus were confrontational symbolic actions. They contradicted the political status quo in colonial Palestine, not the laws of biology. Prayer, she explains, is not magical thinking. It's a creative, highly disciplined, introspective process most familiar to many people in forms like mindfulness meditation. Wallace offers an intriguing exploration of issues that believers seldom discuss in ways that make sense to the religiously unaffiliated.

Religion and Doctor Who Andrew Crome, James F. McGrath, 2013-11-14 Doctor Who has always contained a rich current of religious themes and ideas In its very first episode it asked how humans rationalize the seemingly supernatural as two snooping schoolteachers refused to accept that the TARDIS was real More recently it has toyed with the mystery of Doctor's real name perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god angel or demon was thought to grant a mortal power over the entity But why does Doctor Who intersect with religion so often and what do such instances tell us about the society that produces the show and the viewers who engage with it The writers of Religion and Doctor Who Time and Relative Dimensions in Faith attempt to answer these questions through an in depth analysis of the various treatments of religion throughout every era of the show's history While the majority of chapters focus on the television show Doctor Who the authors also look at audios novels and the response of fandom Their analyses all written in an accessible but academically thorough style reveal that examining religion in a long running series such as Doctor Who can contribute to a number of key debates within faith communities and religious history Most importantly it provides another way of looking at why Doctor Who continues to inspire to engage and to excite generations of passionate fans whatever their position on faith The contributors are drawn from the UK the USA and Australia and their approaches are similarly diverse Chapters have been written by film scholars and sociologists theologians and historians rhetoricians philosophers and anthropologists Some write from the perspective of a particular faith or belief others write from the perspective of no religious belief All however demonstrate a solid knowledge of and affection for the brilliance of Doctor Who

Coping with Evil Bruce McCausland, 2006-08 I have much more to tell you but you cannot grasp it now But when the Spirit of truth comes He will guide you into the whole truth for He will not speak on His own authority but will tell what is told Him and will announce to you the things that are to come John 16:12-13 Williams translation Coping with Evil addresses one of the most important topics for all humanity evil The menace of evil seems stronger today than ever before Can evil be defeated Do we have the courage even to look at its root causes Drawing on the spiritual investigations of Rudolf Steiner Sri Aurobindo and others and from his own inner work Bruce McCausland takes us on a fascinating journey into the hidden recesses of this very timely subject helping us understand and cope with today's events and our daily lives What is evil What is its source or sources How should we view evil and those who perpetrate it Using what he calls a holoscopic approach McCausland stresses the importance of how we look at a problem Traditional means no longer suffice and have proven inadequate to the task By its very nature evil is illusive and fraught with emotion These obstacles must be overcome if we are to succeed in examining this manifold menace in a meaningful productive manner But whatever we do we cannot ignore it The greatest evil it has been noted is indifference toward evil McCausland discusses the sources of evil in the form of spirit

beings spiritual adversaries called Lucifer and Ahriman He explains how these two beings interact with each other and with humanity as the two extremes of evil with goodness in the center In the end we discover ways to deal with evil both as individuals and as a society In today s climate of fear and its exploitation on every side the question of evil has become an urgent matter of human survival Those who watch or read the news can use this guidebook to understand the forces at work behind daily events It guides the reader through the confusion caused by evil and toward inner freedom **Jonathan**

Edwards Confronts the Gods Gerald R. McDermott,2000-05-11 This is a study of how American theologian Jonathan Edwards 1703 58 battled deist arguments about revelation and God s fairness to non Christians Author Gerald McDermott argues that Edwards was preparing before his death a sophisticated theological response to Enlightenment religion that was unparalleled in the eighteenth century and surprisingly generous toward non Christian traditions **DoD GEN** ,1962

Prophets Facing Backward Meera Nanda,2003 The leading voices in science studies have argued that modern science reflects dominant social interests of Western society Following this logic postmodern scholars have urged postcolonial societies to develop their own alternative sciences as a step towards mental decolonization These ideas have found a warm welcome among Hindu nationalists who came to power in India in the early 1990s In this passionate and highly original study Indian born author Meera Nanda reveals how these well meaning but ultimately misguided ideas are enabling Hindu ideologues to propagate religious myths in the guise of science and secularism At the heart of Hindu supremacist ideology Nanda argues lies a postmodernist assumption that each society has its own norms of reasonableness logic rules of evidence and conception of truth and that there is no non arbitrary culture independent way to choose among these alternatives What is being celebrated as difference by postmodernists however has more often than not been the source of mental bondage and authoritarianism in non Western cultures The Vedic sciences currently endorsed in Indian schools colleges and the mass media promotes the same elements of orthodox Hinduism that have for centuries deprived the vast majority of Indian people of their full humanity By denouncing science and secularization the left was unwittingly contributing to what Nanda calls reactionary modernism In contrast Nanda points to the Dalit or untouchable movement as a true example of an alternative science that has embraced reason and modern science to challenge traditional notions of hierarchy *Herald and Presbyter* ,1914
