Key Concepts in Practice Paul R. Katz, Stefania Travagnin, 2019-05-20 In recent years the study of modern Chinese religions has developed into a highly innovative yet challenging field One of the main reasons for this involves an ongoing and largely unresolved debate regarding what methods and theories are appropriate for analyzing the wide range of beliefs and practices we encounter This series of three volumes is based on the conviction that in this critical period of research on modern Chinese religions it is time for scholars to review the development of our field reconsider its present state of theories and analytical models and open a new chapter in the understanding of methodologies we employ Our research is grounded on the need to re-evaluate concepts and practices that inform both the religious sphere and contemporary scholarship including endogenous Chinese concepts and exogenous ideas from the West and Japan that have been foundational in shaping our knowledge of the Chinese religious landscape In this third volume of our series we examine a variety of key concepts through their praxis in modern Chinese lived religions

The Gülen Movement Salih Cingilloğlu, 2017-03-10 This book presents findings from research into one of the world's most influential Islamic movements the Gülen Movement from the perspective of social transformation through adult education At the core of research questions lies how the movement enrolls volunteers from all walks of life and transforms them to adopt its aims at the expense of their individual ideals The book reveals the socio-psychological mechanisms that make such transformation possible by looking at how followers integrate weekly lectures and discussions on the theory and practice of Islam into their personal and social lives The Gülen Movement offers a moderate interpretation of Islam and stresses the vitality of establishing communication with the members of all faiths This book provides a window into how and why religion may roll into extremism by presenting findings from an opposite perspective the participants in the research all define themselves as truly pious but do not even imply an act of violence in tens of hours of interviews In short the book weaves the strands of Islamic movement and adult

education into a unified whole and limns the snapshot of a social movement offering a comprehensive discussion of the role of adult education within the movement as well as its transformative potential and its wider social and political implications
