Religious Origins of Modern Science Eugene M. Klaaren, 1985-07-31 *Religious Origins of Modern Science* Eugene M. Klaaren, 1977 *Religion and the Rise of Modern Science* Reijer Hooykaas, 2000 At a time when religion and science are seen by many to be antagonists locked in a battle to the death Professor Hooykaas offers a startling proposition modern science he suggests is in good part a product of the Judeo Christian influence on western thought Religious Origins of Modern Science Eugene Marion Klaaren, 1977 **The Foundations of Modern Science in the Middle Ages** Edward Grant, 1996-10-28 Contrary to prevailing opinion the roots of modern science were planted in the ancient and medieval worlds long before the Scientific Revolution of the seventeenth century Indeed that revolution would have been inconceivable without the cumulative antecedent efforts of three great civilisations Greek Islamic and Latin With the scientific riches it derived by translation from Greco Islamic sources in the twelfth and thirteenth centuries the Christian Latin civilisation of Western Europe began the last leg of the intellectual journey that culminated in a scientific revolution that transformed the world The factors that produced this unique achievement are found in the way Christianity developed in the West and in the invention of the university in 1200 As this 1997 study shows it is no mere coincidence that the origins of modern science and the modern university occurred simultaneously in Western Europe during the late Middle Ages **Companion to the History of Modern Science** G N Cantor, G.N. The Rationality of Theism Paul Copan,Paul Moser,2004-07-31 The Rationality of Theism is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God offering a positive case for theism as well as rebuttals of recent influential criticisms of theism

On the Origin of Consciousness Scott D. G. Ventureyra,2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration

Calvinism and the Making of the European Mind ,2014-09-18 Calvinism must be assigned a significant place among the forces that have shaped modern European culture Even now despite its history of religious fragmentation and secularization Europe continues to bear the marks of a pervasive Calvinist ethos The character of that ethos is however difficult to pin down In this volume many of the traditional scholarly conundrums about the relationship between Calvinism and the cultural history of Europe are revisited and re investigated to see what new light can be shed on them For example how has the ethos of Calvinism or more broadly the Reformed tradition affected economic thinking and

practice the development of the sciences views on religious toleration or the constitution of European polities In general what kind of transformations did Calvinism s distinct spirituality bring about Such questions demand painstaking and detailed scholarly work a fine sample of which is published in this volume **The Great Turning Point** Terry

Mortenson,2004 Many people in the Church today have the idea that young earth creationism is a fairly recent invention popularized by fundamentalist Christians in the mid 20th century Is this view correct In fact scholar Terry Mortenson has done fascinating original research on this subject in England and documents that several leading pre Darwin scholars and scientists known as scriptural geologists did not believe in long ages for the earth This book is a thoroughly researched work of reference for every library certainly every creationist library Terry Mortenson spent much time and work on this project in both the United States and Great Britain The history of the Church and evolution is fascinating and it is interesting to see not only the tremendous influence that evolution has had on the Church but on society as well **The Religion of Technology**

David F. Noble,2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble s groundbreaking book reveals the religious roots and spirit of Western technology It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind s lost divinity Covering a period of a thousand years Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God like knowledge and powers Noble describes how technological advance accelerated at the very point when it was invested with spiritual significance By examining the imaginings of monks explorers magi scientists Freemasons and engineers this historical account brings to light an other worldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism Freemasons were early advocates of industrialization and the fathers of the engineering profession Wernher von Braun saw spaceflight as a millenarian new beginning for humankind The narrative moves into our own time through the technological enterprises of the last half of the twentieth century nuclear weapons manned space exploration Artificial Intelligence and genetic engineering Here the book suggests that the convergence of technology and religion has outlived its usefulness that though it once contributed to human well being it has now become a threat to our survival Viewed at the dawn of the new millennium the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs David F Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re examine our enchantment with unregulated technological advance **Faith Encounters of the Third Kind** David J. Brewer,2021-09-21 Interreligious dialogue that

strives for both hospitality and honest discussion of difference Is it possible to have both Is it possible for religious traditions

to engage one another in a spirit of humility while also working together toward mutual descriptions of God and the world. This is the goal of this book to find points at which each of the religious traditions are vulnerable and open enough to listen to each other and to help each other toward a shared description of reality. If you share these concerns for interfaith dialogue as well as for deeply held notions of conviction and truth then the invitation is open for mutual constructive engagement.

The Cambridge Companion to Christian Ethics Robin Gill, 2001 Provides a comprehensive introduction to Christian ethics which is both authoritative and up to date.

A Thicker Jesus Glen Harold Stassen, 2012-10-25 Why have some Christians such as Dietrich Bonhoeffer and Martin Luther King Jr been able to speak truth to power at great personal cost while others readily capitulate to injustice? In this magnum opus Christian ethicist Glen Stassen argues that such robust Christianity stems from believing in a thicker Jesus who is Lord over the whole of life and not just one compartment of it. Belief in this thicker Jesus results in incarnational discipleship and can help Christians deal with the challenges of what Charles Taylor has identified as a secular age. Stassen elegantly weaves the characteristics of incarnational discipleship as correctives to secularism.

Religion and the Challenges of Science William Sweet, Richard Feist, 2007-01-01 Does science pose a challenge to religion and religious belief? This volume provides background to the current science and religion debate yet focuses as well on themes where recent discussion of the relation between science and religion has been particularly concentrated.
