Remembering W. Von LEYDEN, 1961 *Dreaming and Memory: Philosophical Issues* Daniel Gregory, Kourken Michaelian, 2024-10-22 This edited volume is the first systematic philosophical investigation of the complex and multifarious relationships between dreaming and memory Featuring fifteen contributions by leading researchers it explores a range of issues that arise when dreaming and memory are considered together What does one remember when one remembers what one dreamt and what is it for a memory of a dream to be accurate What are the phenomenological cognitive and epistemic similarities and dissimilarities between dreaming and remembering How does the self figure in dreams and memories The book will serve as an indispensable resource both for philosophers interested in dreaming or memory and for their philosophically minded colleagues in empirical disciplines and will provide an invaluable starting point for advanced students in need of a snapshot of the state of the art in philosophical research on dreaming and memory Chapters 2 10 and 16 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Solving, Resolving, and Dissolving Philosophical Problems Peter M. Hacker, 2025-03-17 Equips readers with the intellectual tools required to tackle perennial philosophical problems *Solving Resolving and Dissolving Philosophical Problems* is addressed to all who are interested in philosophical questions It presupposes little philosophical knowledge only curiosity and an open mind It demands a willingness to learn not doctrine but method and the courage to suspend judgement and to challenge received ideas Advocating the method of the 3 C s Connective Contrastive and Contextual Analysis the book demonstrates the method by putting it to work examining fifteen salient philosophical questions that concern all thinking people It is organized thematically into four parts Part I introduces questions in philosophy of psychology the nature of the mind the mind body problem the nature of consciousness and its demystification knowledge of other minds Part II deals with epistemological questions knowledge belief memory imagination thinking dreaming Part III deals with value the roots of morality the nature of good and evil the need for a secular conception of the soul happiness The application of the method in the essays produces striking original and unanticipated results that will give readers pause The final part of the book articulates in detail the methodology of the 3 C s exemplified by the fifteen essays and defends it against objections *Solving Resolving and Dissolving Philosophical Problems On the Methodology of Connective Contrastive and Contextual Analysis* is an excellent textbook for undergraduate students in introductory philosophy courses alongside more advanced scholars as well as an invaluable resource for educated general readers with an

interest in philosophical methodology **Things We Know: Fifteen Essays on Problems of Knowledge** Frank B. Ebersole, 2001-12-11 Reading Ebersole requires and often succeeds in producing a radical reorientation of ones thinking from a book review Things We Know is a collection of fifteen essays that focus on perennial philosophical problems about knowledge The essays let you participate in Frank Ebersoles unique struggles to come to terms with such questions as Can we know the world the past the future of Gods existence whether our actions are free the foundations of logic and language This is not just another philosophy book about problems of knowledge In Things We Know Ebersole by carefully using examples exposes the problems to be the products of philosophical pictures The examples also make the pictures less compelling Thus by reading this philosophy book readers can join the author in working to free themselves from some perplexing philosophical concerns How the Second Edition differs from the First Edition This edition differs from the First Edition University of Oregon Books 1967 in three ways An essay is added Everymans Ontological Argument has been inserted as Essay 14 following two other essays about the ontological argument Everymans Ontological Argument was published in the Fall 1978 issue of Philosophical Investigations The original Chapter 14 Where the Action Is is now Chapter 15 An essay is replaced The original Essay 3 How Philosophers See Stars has been replaced by a modified version that was printed in Philosophy Today no 2 1969 The replacement includes some further improvements The text is improved Throughout the book the author has made corrections stylistic improvements and changed the wording as needed to make clearer his line of thought Summary Each of the fifteen essays takes up a philosophical problem In most of the essays Ebersole first clarifies the problem and reviews common attempts to resolve the problem Then he focuses on the central ideas and terms used to state the problem and creates examples of people using the terms under consideration The examples are unique because of their focus on the context and point of what we say If his investigations fail to find a use of the terms that supports the philosophical problem he is led to conclude that the problem does not really derive from a philosophical insight but rather arises from a philosophical picture or model Preface The essays in Things We Know address some of the perennial philosophical problems of knowledge The essays are unified by being similar in method and philosophic aim Ebersole exposes a picture behind each problem In the essays he works through some of the ways that pictures control our thinking and tries to make the pictures less compelling Chapters 1 6 Perception and Language Chapter 1 Seeing Red in Red Things Philosophical problem Must words for simple visual properties e g red refer to things because the things share some property e g redness Can we see this property Topics investigated Family resemblances properties of colors when we regard things as the same when we regard colors as the same when we regard things as having common properties language world philosophical pictures Philosophers discussed A J Ayer J Herder J S Mill Chapter 2 Seeing Things Philosophical problem Do hallucinations and afterimage **The Metaphysics of Memory** Sven Bernecker, 2008-05-08 This book investigates central issues in the philosophy of memory and is the first book on the metaphysics of memory in four decades It defends a version of

the causal theory of memory and argues for direct realism about memory **Routledge Philosophy GuideBook to Wittgenstein and On Certainty** Andy Hamilton, 2014-10-17 Ludwig Wittgenstein is arguably the most important philosopher of the twentieth century In *On Certainty* he discusses central issues in epistemology including the nature of knowledge and scepticism The Routledge Philosophy Guidebook to Wittgenstein and *On Certainty* introduces and assesses Wittgenstein's career and the background to his later philosophy the central ideas and text of *On Certainty* including its responses to G E Moore and discussion of fundamental issues in the theory of knowledge Wittgenstein's continuing importance in contemporary philosophy This GuideBook is essential reading for all students of Wittgenstein and for those studying epistemology and philosophy of language *On Certainty* Wittgenstein's final work addresses a category of world picture propositions discovered by G E Moore These challenge Wittgenstein's enduring commitment to a well defined category of empirical propositions and help to generate a critique of scepticism Developing Wittgenstein's view that scepticism is self undermining the Guidebook offers a combative yet therapeutic interpretation that locates *On Certainty* between the standpoints of Kant and Hume **Relational Remembering** Sue Campbell, 2003-10-07 Tracing the impact of the memory wars on science and culture *Relational Remembering* offers a vigorous philosophical challenge to the contemporary skepticism about memory that is their legacy Campbell's work provides a close conceptual analysis of the strategies used to challenge women's memories particularly those meant to provoke a general social alarm about suggestibility Sue Campbell argues that we cannot come to an adequate understanding of the nature and value of memory through a distorted view of rememberers The harmful stereotypes of women's passivity and instability that have repopulated discussions of abuse have led many theorists to regard the social dimensions of remembering only negatively as a threat or contaminant to memory integrity Such models of memory cannot help us grasp the nature of harms linked to oppression as these models imply that changed group understandings of the past are incompatible with the integrity of personal memory Campbell uses the false memory debates to defend a feminist reconceptualization of personal memory as relational social and subject to politics Memory is analyzed as a complex of cognitive abilities and social narrative activities where one's success or failure as a rememberer is both affected by one's social location and has profound ramifications for one's cultural status as a moral agent **New Directions in the Philosophy of Memory** Kourken Michaelian, Dorothea Debus, Denis Perrin, 2018-04-27 Although philosophers have explored memory since antiquity recent years have seen the birth of philosophy of memory as a distinct field This book the first of its kind charts emerging directions of research in the field The book's seventeen newly commissioned chapters develop novel theories of remembering and forgetting analyze the phenomenology and content of memory debate issues in the ethics and epistemology of remembering and explore the relationship between memory and affectivity Written by leading researchers in the philosophy of memory the chapters collectively present an exciting vision of the future of this dynamic area of research **Memory: Oxford Bibliographies**
