Howard P Lehman, 1993-07-13 The Dreyfus Affair or simply L Affaire was the defining event in French life between the disasters of the Franco Prussian War and the First World War After decades of prosperity and growth following the Prussian invasion the destruction of the Paris Commune and the seemingly successful creation of the Third Republic the Affair cruelly exposed the bitter divisions within French society The French army was torn apart ministers were forced to resign new political groupings were created and ultimately the Affair led to an attempted coup and contributed to the paranoia that almost resulted in a catastrophic Anglo French war in 1898 This short work fills the need for a comprehensible concise book which focuses on the scale and complexity of the Dreyfus Affair **Debt Disaster?** John F. Weeks, 1989-08-01 Written for the nontechnical reader and intended to intervene in the policy debate Debt Disaster offers informative analysis controversial assessments and concrete solutions to bring a close the bleakest period for the Third World since the end of World War II Out of this volume comes a clear message the indebted countries cannot grow if they seek to pay their debts no matter what policies they follow The contributors include Barry Herman Rolph van der Hoeven Karin Lissakers Paul M Sacks Chris Canavan Robert Liebenenthal Peter Nicholas Robin A King Michael D Robinson Richard D Fletcher Jose D Epstein William L Canak Danilo Levi Louellen Stedman Peter Hakim Vali Jamal Bruce Morrison Rudiger Dornbusch Osvaldo Sunkel William Darity Jr and Michael Pl Claudon **Free Markets and Food Riots** John K. Walton, David Seddon, 2011-08-10 This book describes and explains the extraordinary wave of popular protest that swept across the so called Third World and the countries of the former socialist bloc during the period from the late 1970s to the early 1990s in response to the mounting debt crisis and the austerity measures widely adopted as part of economic reform and adjustment Explores this general proposition in a cross national study of the austerity protests or the IMF Riots that have affected so many debtor nations

since the mid 1970s Argues that modern austerity protests like the classical bread riots in eighteenth century Europe are political acts aimed at injustice but acts that are an integral part of the process of international economic and political restructuring Evaluates how modern food riots are most important for what they reveal about global economic transformation and its social and political consequences Provides a general framework drawing on comparative and historical material and then trace the cycle of uneven development debt neo liberal reform and protest in Latin America Africa Asia the Middle East and Eastern Europe Focusses on the role of women in structural adjustment and protest politics and the features of seemingly anomalous cases which qualify the general argument

Lloyd-Sherlock,1997-07-23 Many countries in the developing world are facing a rapid acceleration in population ageing To date this problem has generated little interest either from academics or policy makers Studies which focus exclusively on social security are of little relevance for the majority of elderly in these regions for whom the possibilities of saving or making pension contributions are remote This book takes a more comprehensive approach combining analysis of social security issues in all developing countries with micro level case studies of poor urban elderly survival strategies in Buenos Aires

The Making of Citizens Bryan Roberts,2020-11-25 Originally published as Cities of Peasants this highly acclaimed account of the expansion of capitalism in the developing world has now been extensively rewritten and updated Focusing on Latin America Bryan Roberts traces the evolution of developing societies and their economies to the present Taking account of the move towards more open economies a shrinking of the state and various transitions towards democracies he shows how urban growth has produced new patterns of social stratification creating opportunities for social mobility but doing little to decrease income inequality or political and social pressures Underlying social changes have broadened the practice of citizenship in developing countries limiting authoritarian rule but within a context of entrenched social inequalities and persisting political instability This book conveys both the flavour of life in the cities of the third world and the immediacy of their problems

Dictatorship, Democracy, and Globalization Klaus Friedrich Veigel, 2010-11-01 The collapse of the Argentine economy in 2001 involving the extraordinary default on 150 billion in debt has been blamed variously on the failure of neoliberal policies or on the failure of the Argentine government to pursue those policies vigorously enough during the 1990s But this is too myopic a view Klaus Veigel contends to provide a fully satisfactory explanation of how a country enjoying one of the highest standards of living at the end of the nineteenth century became a virtual economic basket case by the end of the twentieth Veigel asks us to take the long view of Argentina's efforts to re create the conditions for stability and consensus that had brought such great success during the country's first experience with globalization a century ago The experience of war and depression in the late 1930s and early 1940s had discredited the earlier reliance on economic liberalism In its place came a turn toward a corporatist system of interest representation and state led inward oriented economic policies But as major changes in the world economy heralded a new era of globalization in the late 1960s and early 1970s the corporatist system broke down and no social class or economic interest group was strong enough to create a new social consensus with respect to Argentina's economic order and role in the world economy The result was political paralysis leading to economic stagnation as both civilian and military governments oscillated between protectionism and liberalization in their economic policies which finally brought the country to its nadir in 2001

Kevin T. Leicht, J. Craig Jenkins, 2009-11-28 Political sociology is the interdisciplinary study of power and the intersection of personality society and politics The field also examines how the political process is affected by major social trends as well as exploring how social policies are altered by various social forces Political sociologists increasingly use a wide variety of relatively new quantitative and qualitative methodologies and incorporate theories and research from other social science cognate disciplines The contributors focus on the current controversies and disagreements surrounding the use of different methodologies for the study of politics and society and discussions of specific applications found in the widely scattered literature where substantive research in the field is published This approach will solidly place the handbook in a market niche that is not occupied by the current volumes while also covering many of the same theoretical and historical developments that the other volumes cover The purpose of this handbook is to summarize state of the art theory research and methods used in the study of politics and society This area of research encompasses a wide variety of perspectives and methods that span social science disciplines The handbook is designed to reflect that diversity in content method and focus In addition it will cover developments in the developed and underdeveloped worlds *Democracy Within Reason* Miguel Angel Centeno, 2010-11-01 Labor Migration to the United States Wayne A. Cornelius, 1990 Creative State Natasha Iskander, 2011-06-15 At the turn of the twenty first century with the amount of money emigrants sent home soaring to new highs governments around the world began searching for ways to capitalize on emigration for economic growth and they looked to nations that already had policies in place Morocco and Mexico featured prominently as sources of best practices in this area with tailor made financial instruments that brought migrants into the banking system captured remittances for national development projects fostered partnerships with emigrants for infrastructure design and provision hosted transnational forums for development planning and emboldened cross border political lobbies In *Creative State* Natasha Iskander chronicles how these innovative policies emerged and evolved over forty years She reveals that the Moroccan and Mexican policies emulated as models of excellence were not initially devised to link emigration to development but rather were deployed to strengthen both governments domestic hold on power The process of policy design however was so iterative and improvisational that neither the governments nor their migrant constituencies ever predicted much less intended the ways the new initiatives would gradually but fundamentally redefine nationhood development and citizenship Morocco s and Mexico s experiences with migration and development policy demonstrate that far from being a prosaic institution resistant to change the state can be a remarkable site of creativity an essential but often overlooked component of good governance International Perspectives on Homelessness Valerie Polakow, Cindy Guilleen, 2001-08-30 Homelessness strikes in all types of nations from wealthy western nations to poor undeveloped countries Each government and culture attends to this worldwide problem differently This work collects eleven case studies of selected countries from around the world in order to offer a wide perspective on the dilemma of homelessness Students can use this ready reference to compare

and contrast homelessness populations analyze the ways in which various countries approach this issue and to evaluate what is precluding and encouraging this reaching issue The problem of homelessness is clearly defined here from a global perspective In addition the history and resulting conflicts that have risen from homelessness are outlined This ready reference analyzes the metamorphosis of the homelessness what solutions have been suggested and how effective these solutions have been Students will learn to think critically about homelessness and what the future holds for each country as it battles with this seemingly unavoidable occurrence

Neoliberalism and Class Conflict in Latin America H. Veltmeyer,J.

Petras,S. Vieux,2016-07-27 The 1980s in Latin America saw the implementation of a sweeping programme of economic reforms either imposed as a condition for securing new loans or to embrace the neoliberal doctrine of structural adjustment the ideology of a newly formed transnational capitalist class However the structural adjustment programme also generated widespread resistance especially from within the popular sector of civil society This book analyses both the politics of the adjustment process and the political dynamics of this resistance in Latin America

The Domestic Domain Paul

Pennartz,Anke Niehof,2019-05-23 First published in 1999 the primary focus of this book is what goes on inside the black box of households beginning with decision making but branching out to develop a comprehensive view of the domestic domain It brings together theoretical frameworks relevant to the study of family households from several root disciplines each framework highlighting a different approach Each approach is applied to important problems concerning the functioning of family households The book focuses on households and their members as active agents who manage both material and immaterial resources The private sector to which family households belong is not viewed as just responding to impulses from the formal economy and to public policies but as a dynamic system in its own right In the view of Paul Pennartz and Anke Niehof households not only accommodate to social change but also mediate and generate social change In the book key studies are presented which exemplify approaches and issues The key studies cover a wide range of societies in Europe North and Latin America Asia and Africa thus also exemplifying the comparative perspective which is another important feature of the book Pennartz and Niehof examine issues including the organisational approach and resource allocation the power approach and the division of household production tasks and the opportunity structure approach and the housing market
