Wickland, Kessinger Publishing is the place to find hundreds of thousands of rare and hard to find books with something of interest for everyone **Creativity** Matthew Fox, 2004-06-17 The author of *Original Blessing* explores how the highest communion with the Divine can be found right at our fingertips in the simplest expressions of human creativity Drawn from a sermon that has electrified listeners here is a concise powerful meditation on the nature of creativity from Episcopal priest and radical theologian Matthew Fox *Creativity* is Fox at his most dynamic It is immensely practical and leaves the reader with a message to put into action in life Fox tantalizingly suggests that the most prayerful most spiritually powerful act a person can undertake is to create at his or her own level with a consciousness of the place from which that gift arises

feed in Australia and international research students in Sweden The chapters reveal not just that different groups have different ideas about a world worth living in but also show that through their collaborative research initiative the authors and their research participants were bringing worlds like these into being The volume extends an invitation to readers and researchers in education and the social sciences to consider ways to foster education that realises transformed selves and transformed worlds the good for each person the good for humankind and the good for the community of life on the planet The book also includes theoretical chapters providing the background and rationale behind the notion of education as initiating people into living well in a world worth living in An introductory chapter discusses the origins of the concept and the phrase Postformal Education Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past Gidley's challenge is to co evolve a radically new education All who seek to play a part must read this book Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA
