Natural History Essays:

Natural History Essays (hb) Henry David Thoreau, 2011-04 Celebrate the tradition of literary naturalists and writers who embrace the natural world as the setting for some of our most euphoric and serious experiences These books map the intimate connections between the human and the natural world Literary naturalists transcend political boundaries social concerns and historical milieus they speak for what Henry Beston called the other nations of the planet Their message acquires more weight and urgency as wild places become increasingly scarce

Essays on Natural History and Rural Economy John Walker, 1812 *Natural History Essays* Graham Renshaw, 1904 **Essays and Observations on Natural History, Anatomy, Physiology, Psychology, and Geology** John Hunter, 1861 **More Natural History Essays** Graham Renshaw, 1905 *Wild Apples and Other Natural History Essays* Henry David Thoreau, 2010-04-15 This volume of seven essays and a late lecture by Henry David Thoreau makes available important material written both before and after Walden First appearing in the 1840s through the 1860s the essays were written during a time of great change in Thoreau's environs as the Massachusetts of his childhood became increasingly urbanized and industrialized William Rossi's introduction puts the essays in the context of Thoreau's other major works both chronologically and intellectually Rossi also shows how these writings relate to Thoreau's life and career as both writer and naturalist his readings of Ralph Waldo Emerson and Charles Darwin his failed bid for commercial acceptance of his work and his pivotal encounter with the utter wildness of the Maine woods In the essays themselves readers will see how Thoreau melded conventions of natural history writing with elements of two popular literary forms travel writing and landscape writing to explore concerns ranging from America's westward expansion to the figural dimensions of scientific facts and phenomena Thoreau the thinker observer wanderer and inquiring naturalist all emerge in this distinctive composite picture of the economic natural and spiritual communities that left their marks on one of our most important early environmentalists

Leonardo's Mountain of Clams and the Diet of Worms Stephen Jay Gould, 1999 This unique volume of 21 recent essays published in *Natural History* magazine consciously formulates a humanistic natural history telling how humans have learned to study and understand nature rather than a history of nature itself 41 illustrations

Eight Little Piggies Stephen Jay Gould, 1993 This collection of essays range from history to the latest theories in biology from controversies over palaeontology to the origins of language The title is a pun and as always with Gould the joke has a point that illustrates the largest pattern of life's history for

millennia the animals that populated the earth had four toes on each foot or six If evolution had taken a tiny shift if man s ancestors had inherited a couple of genes in a different form our canonical number based on man s fingers and toes might be eight instead of ten Stephen Jay Gould has also written Wonderful Life Bully for Brontosaurus and Finders Keepers **Final**
