Reducing Nuclear Danger The Road Away From The Brink:

Reducing Nuclear Danger McGeorge Bundy, William J. Crowe, Sidney David Drell, 1993 The end of the U S Soviet standoff and the increasing risk of political adventurers such as Saddam Hussein developing nuclear capability have profoundly altered the shape of global nuclear danger In *Reducing Nuclear Danger* three of America s top experts on nuclear affairs offer a thoughtful prescription for effective international action to cut existing nuclear arsenals and to prevent further proliferation They argue that the United States must take a cooperative leadership role to achieve worldwide control of nuclear weapons The immediate tasks to this end are to execute the already agreed upon reductions in U S and Russian forces ensure that Russia remains the only nuclear state of the former Soviet Union and substantially strengthen the international efforts against the spread of nuclear weapons The authors favor adopting a strict doctrine of using nuclear weapons only as a defensive last resort along with other specific changes in current policy Prominent in their prescriptions is an eventual drastic reduction of the current Russian American warhead ceilings They also advocate a new policy for American leaders toward other nations as well as the American people of open public explanation of nuclear danger This important and insightful book on the current nuclear danger should be read by all citizens with an interest in resolving what remains our greatest global risk at a time of unprecedented opportunity *The Consequences of Nuclear Proliferation* Devin T. Hagerty, 1998 Hagerty analyzes how India and Pakistan interacted in diplomatic and military crises before their 1998 nuclear tests He presents detailed studies of the January 1987 Indo Pakistani crisis precipitated by India s Brasstacks military exercises and the 1990 confrontation over Kashmir Hagerty concludes that relations between India and Pakistan in recent years support the argument that nuclear proliferation does not necessarily destabilize international relations and may even reduce the risk of war Iraq Heather Bleaney, Roper, Peter Sluglett, 2004-06-01 Well considered answers to the many questions raised by the situation in Iraq past and present are rare This first comprehensive thematically organised bibliography devoted to Iraq is based on the full Index Islamicus database and is drawn from a wide variety of European language journals and books Featuring an extensive introduction to the subject and its literature by Peter Sluglett this bibliography will help readers to find their way through the massive secondary literature now available Following the pattern established by the Index Islamicus both journal articles and book publications are included as well as important internet resources The editors have taken care to add much new material to bring its coverage up to date and supplement the previously published volumes while the most important and or influential publications are conveniently highlighted in the introduction An indispensable gateway for all those with a more than superficial interest in what is and what has been happening in this nation so much the focus of attention today **Nuclear Weapons, Scientists, and the Post-Cold War Challenge** Sidney D. Drell, Sidney David Drell, 2007 Cet ouvrage rassemble une s lection significative des crits et discours de Sydney Drell Environ de 1993 2007 **In Retrospect** Robert McNamara, 2017-09-06 1 NATIONAL BESTSELLER The

definitive insider's account of American policy making in Vietnam Can anyone remember a public official with the courage to confess error and explain where he and his country went wrong This is what Robert McNamara does in this brave honest honorable and altogether compelling book Arthur Schlesinger Jr Written twenty years after the end of the Vietnam War former Secretary of Defense Robert McNamara's controversial memoir answers the lingering questions that surround this disastrous episode in American history With unprecedented candor and drawing on a wealth of newly declassified documents McNamara reveals the fatal misassumptions behind our involvement in Vietnam Keenly observed and dramatically written In Retrospect possesses the urgency and poignancy that mark the very best histories and the unsparing candor that is the trademark of the greatest personal memoirs Includes a preface written by McNamara for the paperback edition

Double-Edged Sword Appu K. Soman, 2000-08-30 An examination of the political and diplomatic role of American nuclear weapons in conflicts with a non nuclear China in the Korean War and the Taiwan Strait crises of 1954 1955 and 1958 this study analyzes the American tendency to become involved in confrontations with far weaker powers over issues of very little strategic significance to the United States Washington threatens these adversaries with the use of incommensurate levels of force then ultimately backs down in the face of international and domestic opposition to ill considered plans to use force Unlike works on nuclear history that have either focused on superpower nuclear conflicts and ignored cases of American nuclear diplomacy toward non nuclear adversaries or those that have focused merely on the outcomes of nuclear threats against non nuclear powers this book considers in depth American nuclear diplomacy toward China during the whole period of Sino American military confrontations Soman offers new insights on Truman's decision to enter the Korean War the extent of nuclear diplomacy during the war and the way in which the war ended He argues that the goal of American nuclear diplomacy in the spring of 1955 was to provoke a war with China rather than to deter a Chinese attack on Taiwan Finally he lays out for the first time in print the elaborate diplomacy that Secretary of State John Foster Dulles initiated to defuse the 1958 crisis involving a major shift in American policy that still remains hidden from the public as well as historians Highlighting the central role of nuclear diplomacy in these crises this book draws conclusions on the efficacy of such diplomacy the impact of these crises on the development of policies of massive retaliation and limited war the consequences of Dulles's brinkmanship and the revival of nuclear diplomacy by the Clinton administration in conflicts with non nuclear adversaries **Air University Library Index to Military Periodicals**, 1995 **Beam Line: Summer 1998, Vol. 28, No. 2**, **Beam Line**, 1998 [Arms for Uncertainty](#) Stephen J. Cimbala, 2016-04-08 Nuclear weapons are here to stay They have survived into the twenty first century as instruments of influence for the US Russia and other major military powers But unlike the Cold War era future nuclear forces will be developed and deployed within a digital driven world of enhanced conventional weapons As such established nuclear powers will have smaller numbers of nuclear weapons for the purpose of deterrence working in parallel with smarter conventional weapons and elite military personnel The challenge is to agree

proportional reductions in nuclear inventories or abstinence requiring an effective nonproliferation regime to contain aspiring or threshold nuclear weapons states This is the most comprehensive view of nuclear weapons policy and strategy currently available The author's division of the nuclear issue into the three ages is a never seen before analytical construct With President Obama reelected the reduction and even elimination of nuclear weapons will now rise to the top of the agenda once more Moreover given the likelihood of reductions in US defense spending the subject of the triad which is covered in Chapter One will no doubt be an important subject of debate as will the issue of missile defense covered in Chapter 10 This book provides an excellent analysis of the spread of nuclear weapons in Asia and the Middle East and the potential dangers of a North Korean or Iranian breakout subjects that dominate current policy debates *The Future of the Non-Proliferation Treaty* Darryl Howlett, John Simpson, 2016-07-27 In 1995 a Conference is to be convened to review and extend the Treaty on the Non-Proliferation of Nuclear Weapons NPT The Future of the NPT brings together a distinguished group of individuals including the elected President of the 1995 NPT Conference to analyse four crucial agenda areas relevant to the Conference the preConference activities to be undertaken by both States Parties and the Conference Secretariat those security issues that relate to a review of the treaty such as nuclear disarmament and security assurances peaceful uses and verification questions and regional issues With nuclear nonproliferation currently occupying a prominent position on the international security agenda the 1995 Conference offers a unique opportunity for a constructive discussion on these areas and it is hoped that this volume will provide a contribution to that end **A World of Giving** Patricia L Rosenfield, 2014-11-04 The age of international philanthropy is upon us Today many of America's most prominent foundations support institutions or programs abroad but few have been active on the global stage for as long as Carnegie Corporation of New York A World of Giving provides a thorough objective examination of the international activities of Carnegie Corporation one of America's oldest and most respected philanthropic institutions which was created by steel baron Andrew Carnegie in 1911 to support the advancement and diffusion of knowledge and understanding The book explains in detail the grantmaking process aimed at promoting understanding across cultures and research in many nations across the world A World of Giving highlights the vital importance of Carnegie Corporation's mission in guiding its work and the role of foundation presidents as thought and action leaders The presidents trustees and later on staff members are the human element that drives philanthropy and they are the lens through which to view the inner workings of philanthropic institutions with all of their accompanying strengths and limitations especially when embarking on international activities It also does not shy away from controversy including early missteps in Canada race and poverty issues in the 1930s and 1980s related to South Africa promotion of area studies affected by the McCarthy Era the critique of technical assistance in developing countries the century long failure to achieve international understanding on the part of Americans and recent critiques by Australian historians of the Corporation's nation transforming work there This is a comprehensive review of one foundation's work on the international stage as well as

a model for how philanthropy can be practiced in a deeply interconnected world where conflicts abound but progress can be spurred by thoughtful forward looking institutions following humanistic principles *Atomic Fragments* Mary Palevsky, 2000-06-29 More than most of us Mary Palevsky needed to come to terms with the moral complexities of the atomic bomb Her parents worked on its development during World War II and were profoundly changed by that experience After they died unanswered questions sent their daughter on a search for understanding This compelling sometimes heart wrenching chronicle is the story of that quest It takes her and us on a journey into the minds memories and emotions of the bomb builders Scientists Hans Bethe Edward Teller Joseph Rotblat Herbert York Philip Morrison and Robert Wilson and philosopher David Hawkins responded to Palevsky s personal approach in a way that dramatically expands their previously published statements Her skill and passion as an interlocutor prompt these men to recall their lives vividly and to reexamine their own decisions debating within themselves the complex issues raised by the bomb The author herself seeking to comprehend the widely differing ways in which individual scientists made choices about the bomb and made sense of their work deeply reconsiders those questions of commitment and conscience her parents faced In personal vignettes that complement the interviews she captures other remembrances of the bomb through commemorative events and chance encounters with people who were there Her concluding chapter reframes the crucial moral questions in terms that show the questions themselves to be the abiding legacy we all share This beautifully written book bridges generations to make its readers participants in the ongoing dialogue about science and philosophy war and peace *A Model of Prevention* David A. Hamburg, 2015-11-17 An autobiography of a ground breaking medical doctor Dr David A Hamburg started as a medical student with interest in stress disorders paying special attention to the propensity toward violence including the evolution of human aggression This lead him on a path to becoming one of the most highly celebrated doctors in America he was a member of President Clinton s Committee of Advisors on Science and Technology and was awarded the Presidential Medal of Freedom the highest civilian award of the United States Most recently he chaired committees at the United Nations and European Union on the prevention of genocide This book will be inspirational for emerging scientists today Designing Denuclearization Bruce Larkin, 2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however

is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin's text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization

No More Killing Fields David A. Hamburg, 2002 Drawing on work conducted by the Carnegie Commission on Preventing Deadly Conflict a study of the prevention of war and genocide examines such concepts as preventive diplomacy the role of civil society socioeconomic development and international cooperation

Fallout Grégoire Mallard, 2014-10-20 Many Baby Boomers still recall crouching under their grade school desks in frequent bomb drills during the Cuban Missile Crisis a clear representation of how terrified the United States was of nuclear war Thus far we have succeeded in preventing such catastrophe and this is partly due to the various treaties signed in the 1960s forswearing the use of nuclear technology for military purposes In *Fallout* Grégoire Mallard seeks to understand why some nations agreed to these limitations of their sovereign will and why others decidedly did not He builds his investigation around the 1968 signing of the Nuclear Nonproliferation Treaty NPT which though binding in nature wasn't adhered to consistently by all signatory nations Mallard looks at Europe's observance of treaty rules in contrast to the three holdouts in the global nonproliferation regime Israel India and Pakistan He seeks to find reasons for these discrepancies and makes the compelling case that who wrote the treaty and how the rules were written whether transparently ambiguously or opaquely had major significance in how the rules were interpreted and whether they were then followed or dismissed as regimes changed In honing in on this important piece of the story Mallard not only provides a new perspective on our diplomatic history but more significantly draws important conclusions about potential conditions that could facilitate the inclusion of the remaining NPT holdouts *Fallout* is an important and timely book sure to be of interest to policy makers activists and concerned citizens alike

U.S.-Israeli Relations at the Crossroads Gabriel Sheffer, 1997 The dramatic global regional and domestic changes that occurred after the unpredicted collapse of the Soviet Union have created a need to examine a host of theoretical and practical issues particularly in regard to security and foreign relations The U S Israeli special relationships is no exception This seemed and is still viewed as one of the most solid and stable bilateral relationships Yet the new international and domestic reality in both the U S and Israel warrants a thorough re-examination The essays in this collection deal with among other things the general global setting and its implications for this relationship with hard strategic factors and less tangible aspects such as American images of Israel the attitudes of other American religious denominations and the situation of the American Jewish community

Nuclear Coexistence William C. Martel, William T. Pendley, 1998-02 This study seeks to address the emerging

incongruence between the proliferation of nuclear weapons and the U S policy for managing this process American society and its political leadership must accept the need to adapt its policy to the rapidly changing circumstances in nuclear proliferation Contents proliferation in the emerging international order nuclear proliferation incentives and disincentives emerging nuclear states thinking through issues and options Ukraine Pakistan North Korea Iran and non state actors rethinking U S proliferation policy for the future recommendations The American Bibliography of Slavic and East European Studies for 1994 Patt Leonard, Rebecca Routh, 1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs
