Reflections on Life's Challenges For many of us life is a tough and lonely road to journey on At times we seem to be struggling for a sense of direction and find it extremely difficult to decide on what path to take on the road to personal happiness and success The things that are happening in our daily lives seem to be overwhelming us to the point that sometimes we do not know what to do who to turn to or where to run to so as to solve our challenges Our goal is of course personal happiness and emotional and physical survival which at times seems to be always just over the horizon There are many successes and challenges taking place in our lives which work to affect us in a major fashion whether it is in a positive or negative way What this book attempts to do is to reflect on some of these issues and put them in context for you the reader In doing so my sincere desire is for you to analyze what is happening in your life and help develop the aptitude to live the life that God has created you to live Laurence Carter *365 Motivational and Inspirational Quotes: Daily Quotes, Reflections, and Strategies*

Questioning Leadership
Gabriele Lakowski, Scott Eacott, Colin W. Evers, 2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools At a time when leadership's dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations
