Religion In The Modern World From Cathedrals To Cults:

Religion in the Modern World Steve Bruce, 1996 The people of the Middle Ages did what the Church told them God required The sovereign consumers of the modern world pick and mix their own religions Starting with the Reformation and ending with New Age spirituality this book offers a comprehensive sociological description and explanation of the changes in the religious life of Western society that have accompanied modernization This major new book from a leading sociologist of religion tracks the Church's changing role from monolith to Sect to Denomination and at the end of the twentieth century to the Cult What were the forces that brought about this change What is the real role for the Church in the modern world Professor Steve Bruce answers these questions in a clearly argued and accessible way Including substantial chapters on religion in the USA religion and ethnicity and the New Age Religion in the Modern World is an invaluable resource for students of sociology religion or history and anyone with a real interest in looking behind the headlines for the place of religion in today's society

Choice and Religion Steve Bruce, 1999 The orthodox view is that the democracies of the western world have become increasingly secular over the twentieth century Fewer and fewer people have chosen to believe and the church has declined markedly as religion has changed from being part of an identity ascribed at birth to being a matter of personal choice Choice and Religion provides a detailed critique of the rational choice approach to religion to demonstrate that industrialisation has secularised the western world and that diversity far from making religion more popular by allowing individuals to maximize their returns undermines it The claim that diversity and competition promote religion is refuted with evidence from a wide variety of western societies Bruce examines the Nordic countries and the ex communist states of eastern Europe to explore the consequences of different sorts of state regulation and to show that ethnicity is a more powerful determinant of religious change than market structures Where religion matters it is not because individuals are maximising their returns it is because it defines group identity and is heavily implicated in social conflict

extensive theoretical and practical experience of studying local churches *Christians in a Secular World* Kurt Bowen, 2005-05 A detailed assessment of the degree to which religious commitment or lack thereof affects the psychological state of Canadians and the social fabric of Canada **Religions of Modernity** Stef Aupers, Dick Houtman, 2010 Religions of Modernity challenges the social scientific orthodoxy that once unleashed the modern forces of individualism science and technology inevitably erode the sacred and evoke the profane The book's chapters some by established scholars others by junior researchers document instead in rich empirical detail how modernity relocates the sacred to the deeper layers of the self and the domain of digital technology Rather than destroying the sacred tout court then the cultural logic of modernization spawns its own religious meanings unacknowledged spiritualities and magical enchantments The editors argue in the introductory chapter that the classical theoretical accounts of modernity by Max Weber Emile Durkheim and others already hinted at the future emergence of these religions of modernity **The Blackwell Companion to Sociology of Religion** Richard K. Fenn, 2008-04-15 The Blackwell Companion to Sociology of Religion is presented in three comprehensive parts Written by a range of outstanding academics the volume explores the current status of the sociology of religion and how it might look in future Explores the current status of the sociology of religion and how it might look at the beginning of the next millennium Traces the boundaries between sociology and other closely related disciplines such as theology and social anthropology Edited by one of the best known and most widely respected sociologists of religion Accessibly presented in three comprehensive parts The Legal Architecture of English Cathedrals Norman Doe, 2017-08-15 This original book is a comprehensive richly documented and critical examination of laws applicable to Anglican cathedrals in England some of the most iconic monuments in the national heritage and centres of spiritual and cultural capital Law is the missing link in the emerging field of cathedral studies The book fills this gap It explores historical antecedents of modern cathedral law traces aspects of them that still endure and explains the law with particular reference to the recommendations of the Archbishops Commission on Cathedrals 1994 which led to the most radical changes in the legal history of these churches since the Reformation culminating in the Cathedrals Measure 1999 and associated later legislation The book compares the domestic constitutions and statutes of all the cathedrals of the Church of England today old foundations new foundations and parish church cathedrals as well as policies and guidelines applicable to or adopted by them Whilst national law acts as a fundamental unifying force there is considerable diversity as between these in terms of the breadth and depth of their coverage of topics In the socio legal tradition the book also explores through interviews with clergy and others at half of the cathedrals how laws are experienced in practice These reveal that whilst much of the law is perceived as working well there are equally key areas of concern To this end the book proposes areas for further research and debate with a view to possible reform Taking an architectural feature of cathedrals as the starting point for each chapter from cathedral governance through mission ministry music and education to cathedral property what emerges is that law and

architecture have a symbiotic relationship so that a cathedral is itself a form of juristecture
